Summary

According to the latest available estimates from political parties' head offices, press releases and media estimates

- The **Labour Party** has around 517,000 members, as of end of March 2017.
- The **Conservative Party** had 149,800 members as of December 2013, the latest available estimate published by CCHQ.
- The **Scottish National Party** has around 120,000 members, as of July 2016.
- The **Liberal Democrat Party** has 82,000 members, as of February 2017.
- The **Green Party** (England and Wales) has 55,500 members, as of July 2016.
- **UKIP** has around 39,000 members, as of July 2016.
- The **Plaid Cymru** has 8,273 members, as of July 2016.

Membership of UK political parties

Latest available data (as of March 2017)

Source Latest available figures provided by party head offices and media releases

Notes Conservative figures are as of December 2013 (Latest available estimates); Labour figures are as of end of [March 2017](#); Lib Dem figures are as of [February 2017](#)

Membership of the Conservatives, Labour and the Liberal Democrats has increased to around 1.6% of the electorate in 2016, compared to a historic low of 0.8% in 2013. Across the UK, Labour Party membership increased from 0.6% in 2013 to 1.1% in 2016.

Membership of "other" parties has changed markedly in recent years. In July 2016 SNP membership was around 120,000, compared to 25,000 in December 2013; across Scotland, assuming all Scottish National Party members are in Scotland, SNP membership increased from 0.6% of the electorate in 2013 to 2.9% in 2016. In July 2016 Green Party (England and Wales) membership was around 55,000, compared to 13,800 in December 2013. UKIP's membership increased from 32,000 in December 2013 to around 47,000 in May 2015, though has since fallen to 39,000 in July 2016.

In 2015 income from membership fees comprised 46% of the SNP's income, 35% of the Green Party's (England and Wales), 21% of Plaid Cymru's, 19% of Labour's, 18% of UKIP's, 11% of the Liberal Democrat's and 2% of the Conservative's.

4 Membership of UK political parties

Identification with political parties fell to a historic low in 2012, according to the British Social Attitudes Survey, but has since risen to its highest level since 1987. Academic surveys suggest people of professional/managerial occupations are disproportionately represented among the Conservative, Liberal Democrat and Green Parties, while UKIP party members were more likely than their counterparts to have left school at 16.

This note uses a range of sources to examine party membership and support in the UK, specifically membership levels, the income membership fees generate and the social characteristics of party members. For context, it also provides data on membership to non-party political organisations including trade unions, charities and campaigns.

1. Introduction

In summer 2016 approximately 1.6% of the electorate was a member of either the Conservative, Labour or the Liberal Democrat parties. This is a rise compared to 2013, when membership of these three parties reached a historic low of around 0.8%. In contrast, in 1983 around 3.8% of the electorate were a member of the Conservative, Labour or Liberal Democrat parties.

Change in UK Political Party membership has not been uniform either between parties or over time. Labour experienced a rise in membership ahead of the 1997 General Election before subsequently falling again. More recently the SNP, Labour, Liberal Democrats, UKIP and Green Party have all recorded rises.

As of March 2017, Labour has 517,000 members and, as of February 2017, the Liberal Democrats had 82,000 members. As of July 2016, the SNP had 120,000 members, the Green Party (England and Wales) had 55,500 and UKIP had 39,000.

The Conservative Party does not routinely publish membership figures. As of December 2013 the party had, according to CCHQ, an estimated 149,800 members.¹ As of July 2016 the party has between 130,000 to 150,000 members, according to academic estimates.²

Political parties are under no legal obligation to publish membership statistics. There is no uniformly recognised definition of membership, nor is there an established method or body to monitor it. Three source types – figures voluntarily included in financial submissions to the Electoral Commission, party press releases and media estimates – form the basis of this briefing. Throughout, figures submitted to the Electoral Commission are used in charts and tables and are considered to be the most authoritative source.

In 2015 income from membership fees comprised 46% of the SNP's income, 35% of the Green Party's (England and Wales), 21% of Plaid Cymru's, 19% of Labour's, 18% of UKIP's, 11% of Liberal Democrat's and 2% of the Conservative's.

Identification with political parties fell to a historical low in 2012 but has since risen to its highest level since 1987: The 33rd British Attitudes Survey found that in 2015 around 41% of people identified very or strongly with a political party. At the same time support for parties other than the Conservatives, Labour and the Liberal Democrats is at a historic high. At 2015 General Election 24.9% voted for "other" parties and in 2016 Local Elections, 21%.³

Trade Union membership (6.5 million in 2015, Labour Force Survey) remains many times higher than party memberships. Multiple non-party political campaigns and organisations, like Countryside Alliance and CND, claim memberships rivalling those of political parties.

² The Financial Times (2016) [Who, and where, are the Conservative party's members?](#)

³ At Local Elections 2016, UKIP got 12% of votes that went to other parties (House of Commons Library Briefing paper CBP 7596).

2. Trends in UK party membership

2.1 About the data

Political parties are under no official obligation to publish membership data. There is no commonly agreed definition of “party membership” nor any official body to monitor it. These three factors, together with continually evolving membership structures, mean that the quality of available data varies between parties and over time.

There are three main source types for party membership data:

Figures cited in submissions to the Electoral Commission

Many parties provide party membership figures for the year ending 31 December in annual accounts submitted to the Electoral Commission. All parties are required to submit these accounts by the Political Parties, Elections and Referendums Act (2000); however, they are not obliged to include membership data. When annual accounts do include these figures, they are probably the most reliable and estimates available. The charts and tables throughout this paper use these figures wherever possible.

Party press releases

Party press releases (or releases provided on request from party head offices) commonly provide the most up-to-date membership figures. However, they are both irregularly released - published at the whim of the party - and inconsistent over time and between parties. This is as parties are free to define and estimate “membership” themselves.

Media and academic estimates

Media and academic estimates can be used to supplement Electoral Commission submissions and party press releases. This is particularly necessary for the Conservative Party, which until 2013 did not publish membership estimates.

In many cases historical data series are only rough estimates and may overstate membership. Conservative membership prior to 1993 could have been exaggerated, as does Labour membership up to the 1980s. Now that political parties are required to publish their accounts, the figures (where given) are likely to be more reliable.

There is no commonly accepted definition of “party membership” or a “party member”. Some parties restrict the voting rights of certain members, for example, while others offer gradations in membership costs to suit a member’s desired level of engagement with the party. Most recently some parties have experimented with including social media followers within their membership or supporters total. Readers should be aware that what is meant by party membership can change – and keep this in mind when analysing membership data either between parties or over time.

2.2 Historic trends: 1928 - 2002

On two occasions, in the years either side of the 1997 General Election and since the 2010 General Election, membership of the Labour Party has surpassed that of the Conservatives.

Membership peaked for both the Conservatives and Labour in the early 1950s. In 1953 the Conservative Party had a reported membership of 2.8 million; in the same year, Labour claimed over a million members. However, these figures are academic estimates and subsequent studies suggest estimates for both parties were inflated. Changes in monitoring practices introduced in the late 1970s improved the quality of Labour Party estimates; increased media and Parliamentary attention has encouraged improvements to Conservative Party estimates since the early-1990s.

Figure 1: Membership of the Conservative, Labour and Liberal Democrat* party 1928-2017

Membership, thousands

Notes * Including predecessor parties.

Labour party membership figures for 2015 and 2016 include party members and affiliated supporters, but exclude registered supporters.

Liberal Democrat party head office information, February 2017

Conservative Party

Historically the Conservative Party has not produced systematic membership estimates, though in recent years Conservative Home has quoted estimates from CCHQ. This reluctance to publish estimates is due to the structure of the party and the process via which individuals become full members.⁴

First, the Conservative Party is strictly speaking three separate organisations: the National Union of Conservative and Unionist Associations (responsible for constituency associations), the Conservative Central Office and the Conservative Parliamentary Party (run from the Whip's office). This fragmentary nature was confirmed in 1982 by the Court of Appeal.

Second, historically individuals applied to join their local Conservative associations specifically; that an individual became a member of the national union did not necessarily follow.

Conservative Party membership climbed steeply after the Second World War, from about 910,000 in 1946 to a reported record high of 2.8 million in 1953. The Conservatives had more individual members than any other party up to the mid-1990s, when there were about 400,000 Conservative Party members.

Labour Party

The Labour Party has published figures for individual membership since 1928. Until 2004 figures were provided in the annual Conference Report published by the Party's National Executive Committee, and total membership is now recorded in Labour's financial statements.

Labour doubled its membership between 1928 (when membership figures were first reported) and 1937. Membership was down significantly during the Second World War but rose sharply in the immediate post-war period. In 1952 and 1953 the party claimed over one million members.

Reported membership fell from 666,000 to 348,000 between 1979 and 1980, but the large decrease was probably due to a change in reporting standards and suggests Labour's actual membership before 1980 was exaggerated. From 1956 Constituency Labour Parties were forced to record a minimum membership of 800, which likely inflated the national total.⁵

Membership remained fairly constant throughout the 1980s before climbing in the mid-1990s following a recruitment drive. There was a fall in membership during Labour's time in office between 1997 and 2009, but it increased again in 2010.

⁴ Whitely, Paul; Seyed, Patrick; Richardson, Jeremy; True Blues: the politics of Conservative Party membership (Oxford, 1994)

⁵ Thorpe; Op. Cit.; p227

Liberal Democrat Party and predecessors

Since the creation of the Liberal Democrats in 1988, membership data have been available from the party's internal leadership and presidential elections and more recently from its annual accounts.

Academics Patrick Seyd and Paul Whiteley estimate that the Liberal Party had over 243,000 members in 1960.⁶ They estimate the combined membership of the Liberal Party and the Social Democratic Party to have been approximately 145,000 in 1983 and 138,000 in 1987.⁷

In 1988 the newly created Liberal Democrat Party reported its membership to be around 80,000. The Party claimed about 100,000 members in the early 1990s, falling to around 70,000 in the early 2000s.

2.3 Membership as a percentage of electorate: 1970 – 2016

Membership of the Conservative, Labour and the Liberal Democrat Parties increased to around 1.6% of the electorate in 2016, compared to a historic low point of 0.8 % in 2013. In the UK, Labour Party membership increased from 0.6% in 2013 to 1.1% in 2016.

SNP members represent 0.26% of the total UK electorate, an increase compared to 0.05% in 2013. Across Scotland, assuming all Scottish National Party members are in Scotland, SNP membership increased from 0.6% of the electorate in 2013 to 2.9% in 2016.

2.4 Recent trends: 2002 – 2017

Figure 3 shows party membership figures as derived from annual accounts submitted to the Electoral Commission, data from Parties' Head Offices and, in the case of the Conservatives, media estimates. Where available, **figure 3** shows latest available figures for 2016 and 2017 based on media reports and party press releases.

Figure 3 Party membership by party 2002-2017

Sources Prior to 2016 (All parties excluding Con) figures derived from party annual accounts submitted to the Electoral Commission year ending 31 December. 2016 figures, for all parties except Conservative, are based on information provided by Parties' head offices and recent estimates in news articles as of July 2016. Conservative membership figures derive from 2002-2006 Daily Telegraph; 2008 News of the World estimate; 2010 -2011 estimates reported by the Independent and Daily Mail 2013- 2014 The Times, [Trickle becomes flood as another 10,000 members quit Labour](#), 3 March 2017 [Liberal Democrat party head office information](#), February 2017

Note Labour party membership figures for 2015 and 2016 include party members and affiliated supporters, but exclude registered supporters.

Conservative Party

CCHQ does not routinely publish its membership estimates. The latest estimate published by CCHQ, for December 2013, reports 149,800 members.⁸ As of July 2016, Queen Mary University Professor Tim Bale estimated that Conservative Party has between 130,000 and 150,000 members.⁹

Conservative Party membership fell by more than half from 273,000 to 134,000 between 2002 and 2013, although the decline was temporarily reversed in the mid-2000s.¹⁰

In September 2012 former Conservative Party Co-Chairman Grant Shapps announced the creation of Conservative Party "Friends".¹¹ Subsequently CCHQ has released membership estimates that, in addition to persons regarded as members in the traditional sense, "also tallies a larger figure for the wider party ... including donors, activist and others who play a supportive part but do not pay membership fees". In September 2014 Conservative Home reported this wider estimate to be 224,000.¹²

Conservative Party membership 2002-16

Green Party

The Green Party (England and Wales) had over 55,000 members, as of July 2016, according to data provided by the Green Party's Head Office.¹³ This is a fall of around 6,000 members since April, when a party press releases stated a total of 61,000. Across the UK, Green Party press releases claimed roughly 70,000 people are a members of the "combined UK Green Parties".¹⁴ As of December 2015 the Green Party (England and Wales) had 63,000 members, according to submissions to the Electoral Commission.¹⁵

Membership of the Green Party (England and Wales) held level at approximately 5,000 members between 1998 and 2002. Having steadied at just over 7,000 members 2005-2008, it jumped to 9,600 in 2009 and to 12,800 in 2010 (the year in which the party won its first MP).

Charts and tables throughout this paper refer to the membership of the Green Party (England and Wales) only, as opposed to a combined "UK Green Parties" total, as the Green Party (England and Wales), the Scottish Green Party and the Green Party in Northern Ireland are each registered separately with the Electoral Commission. Membership to the Scottish Green Party stated in accounts ending 31 December 2015 was 9,001, up from 1,123 compared to the previous year.

Labour Party

Labour has around 517,000 members as of March 2017, according to data published by The Times. This is a decrease of 37,000 members compared to the peak of 554,000 members in July 2016.¹⁶

Party membership rose immediately following General Election 2015. 422,664 of people voted in the September 2015 leadership contest, in which 59.5% voted for Jeremy Corbyn.¹⁷ In December 2015 Labour party had 388,000 members, according to party accounts submitted to the Electoral Commission.¹⁸

There was a fall in membership during Labour's time in office between 1997 and 2009, but it increased again in 2010. In each year between 2010 and 2014 the Party's membership has held level at approximately 190,000 members.

Section 2.4 provides further detail on the broader membership of the Labour Party, including estimates for registered and affiliated supporters.

Liberal Democrats

The Liberal Democrats have around 82,000 members as of February 2017, according to Party's Head Office (a rise of around 6,000 since July 2016).¹⁹ This is the highest Party's membership figure since 1994. A similar increase in Liberal Democrat party membership was reported after General Election in May 2015.²⁰

The Liberal Democrats claimed about 100,000 members in the early 1990s, falling to around 70,000 in the early 2000s. Membership fell sharply after the 2010 General Election, from 65,000 in 2010 to about 49,000 in 2011. In April 2014 the Party claimed around 44,000 members.²¹

Plaid Cymru

Plaid Cymru had 8,273 members, as of July 2016, according to information from the Party's Central Office. This is a slight increase compared to 8,015 in December 2015.²² On 27 January 2012 Steven Morris of the Guardian reported the party's membership as 7,863.²³

²² Information from Plaid Cymru's Head Office (2 August 2016)

²³ Plaid Cymru press releases; [Plaid publishes report to move the Party of Wales forward](#) (17 January 2012)

Scottish National Party (SNP)

There are around 120,000 members of the Scottish National Party, as of July 2016. Around 4,000 new members joined the SNP following EU Referendum on 23 June 2016.²⁴

Having recorded 16,000 members in 2002, membership of the Scottish National Party fell to 9,500 members in 2003. It has risen in every year since then. Membership rose by approximately 1,000 new members each year to reach around 16,000 members in 2010. In 2011 membership jumped to 20,000, then to 24,000 in 2012. As of 31st December 2013 membership was reported as 25,000.

Following the Scottish Independence Referendum (18 September 2014) the SNP experienced a rapid rise in membership. On 23 September the party claimed its membership was on course to double its pre-referendum total;²⁵ on 10 October membership was reported to have reached 80,000.²⁶ A party press release dated 30 January 2015 stated the party had around 93,000 members.²⁷ According to accounts submitted to the Electoral commission as of 31 December 2015 Party had around 115,000 members.²⁸

Scottish National Party membership 2002-16

United Kingdom Independence Party (UKIP)

UKIP has 39,000 members, as of July 2016, according to the Party's Head Office. UKIP's membership averaged 42,500 during 2015, with a peak of 45,994 at the General Election in May.²⁹ In 2014 UKIP membership have increased by almost 10,000 members, to 42,200 in December 2014, compared to 32,400 in December 2013 (according to accounts submitted to the Electoral Commission).

Increases in UKIP's membership in the past coincided with European Parliament elections. Membership initially jumped from 10,000 in 2002 to peak at 26,000 members in 2004 when the party won 12 seats in elections to the European Parliament (up from two previously). It subsequently fell again to 16,000 in 2006.

Membership has increased every year from 2010 until 2015. Starting from 15,000, the Party claimed 20,000 members in 2012 and 32,000 as of the Party's submission to the Electoral Commission on 31 December 2013. On 16 June 2014 a party press release claimed around 39,000 members.³⁰

2.5 Broader membership of the Labour Party

The relationship of trade unions to the Labour Party has changed in recent years. In March 2014 then Party leader Ed Miliband announced reforms at a special conference. Labour now has three tiers of members/supporters:

Party members: individual members pay an annual fee, are able to attend conference and constituency meetings, are able to represent the Party and, if eligible, vote in party elections (such as selection of party representatives, mayoral candidates and leader).

Affiliated supporters: affiliated supporters are members of an affiliate (levy paying) trade union or another organisation, full lists of which are available online.³¹ They are entitled to attend all Constituency Labour Party member meetings and to attend Conference as visitors; they can vote in leadership, deputy leadership and mayoral elections. Affiliated supporters cannot represent the party, nor can they vote on the selection of party representatives.³²

Registered supporters: the Registered Supporters Scheme was created in 2010 following the Refounding Labour review³³. At the time registered supporters used to pay a £3 fee and now have the right to participate in leadership, deputy leadership and London mayoral elections. As of August 2016 the fee of registered supporters is £25.³⁴

In September 2015's Leadership election, won by Jeremy Corbyn with 59.5% of the vote, 422,664 people voted. This included 245,520 members, 105,598 registered supporters and 71,546 affiliated supporters.³⁵

In last year's Leadership election Jeremy Corbyn was re-elected as the leader of the party with 61.1% of the vote. A total of 506,438 people voted, of which 285,176 were members, 121,527 were registered supporters and 99,745 were affiliated supporters.³⁶

The broader Labour Movement comprises members of affiliated trade unions (ATUs) and the Socialist and Cooperative societies alongside official Party members (members of constituency Labour parties). Prior to the reforms of 2014, ATUs had half the votes at the Labour Party Conference. In 2011, the Party received £8.0 million from these affiliated groups compared with membership income of £5.2 million.

Up to 1992 The Labour Party Conference Report included membership figures for the ATUs and the Socialist and Cooperative (Soc&Coop) societies. ATU membership rose rapidly in the years immediately following the Second World War. It peaked at 6.5 million in 1979 but

³¹ For a full list of Labour's affiliated Trade Unions, see the [Trade Union and Labour Party Liaison Organisation](#). For a full list of Labour's affiliated socialist societies, see the Party's [website](#).

³⁶ Labour Leadership Election 2016, [Results](#)

then fell steadily over the 1980s. In 1992 ATU membership was 4.6 million.

Figure 4: Broader membership of the “Labour Movement” 1900-2016

Membership, millions

Sources Butler & Butler, *British Political Facts*, 2012; Iain McNicol (Twitter feed) [UK labour membership figures](#) (figure as of 20 July 2016)

Individual party membership also increased in the immediate post-war period. In 1952, there were 1.0 million individual party members, representing about one-sixth of broad Labour membership. The sudden decline in individual members as a proportion of broad membership after 1979 is attributable to the likely inflation of membership figures before 1980.

3. Membership revenues

Labour received £9.53 million in membership fees in 2015, more than any other party. Party's membership revenues increased by nearly 60% compared to £5.97 million in 2014. The Green Party's (England and Wales) and SNP's membership revenues have more than doubled. In 2015 the Green Party received £1.02 million compared to £0.43 million in 2014 (+146%) and Scottish National Party got £2.74 million, compared to £1.33 million in 2014 (+106%).

Income from party membership among other parties had increased slightly compared to 2014. In 2015 Plaid Cymru received £0.16 million (+16%), UKIP £1.02 million (+ 8%), the Conservatives £0.82 million (+ 8%) and the Liberal Democrats £0.81 million (+5%).

Figure 5 shows party income from membership revenue for the years 2002 – 2015. Data does not include income from affiliation fees or donations.

Figure 5 Income by party from membership revenues, 2002 – 2015

Income from membership fees increased and as a percentage of total income for all parties except the Conservatives. In 2015 membership revenues comprised:

- 46% of SNP's income (up by 27% compared to 2014);
- 35% of the Green Party's (England and Wales) (up by 11%);
- 21% of Plaid Cymru's (up by 3%);
- 19% of Labour's (up by 4%);
- 18% of UKIP's (up by 3%);
- 11% of the Liberal Democrat's (up by 2%);
- 2% of the Conservative's (fall of 0.1%).

Figure 6 shows income from membership revenues as a percentage of total income for selected parties in 2014 and 2015, derived from accounts submitted to the Electoral Commission

Figure 6 Income from membership revenues as a percentage of total income, by party, 2014

Source: Party annual accounts submitted to the Electoral Commission

Labour’s membership revenues have increased every year 2008 – 2015, rising by 143% over this period. Conservative income from membership fees fell over the same period by 33%, from £1.23 million in 2008 to £0.82 million in 2015. UKIP’s annual membership income increased by £0.82 million (426%), from £0.19 million in 2008 to £1.02 million in 2015, while the SNP’s increased by 647%, from £0.36 million in 2008 to £2.74 million in 2015.

4. Social characteristics: party members & supporters

Identification with political parties fell to a historic low in 2012, according to the British Social Attitudes Survey, but has since risen to its highest level since 1987. Academic surveys suggest the professional/managerial middle class is disproportionately represented among the Conservative, Liberal Democrat and Green Parties, with UKIP party members were more likely than their counterparts to have left school at 16.

This section uses a range of academic studies to examine the social characteristics of party members and supporters. Each study cited below follows a unique series of assumptions and methods to combat this issue. Caution should thus be taken when making comparisons between each source.

4.1 Identification and affiliation with political parties: historic trends

Identification with political parties fell between 1987 and 2012, successive British Social Attitudes Surveys suggest. In 1987 the proportion of the public who identified with a political party 'very' or 'fairly' strongly was 46%, compared to 31% in 2012. Over the same period the proportion who felt no identification with a political party rose from 8% in 1987 to 22% in 2012.

Figure 8a: Strength of party identification

Source British Social Attitudes Survey

Party identification may, however, again be on the rise. Having reached a historic low in 2012, the proportion who identify with a party 'very' or 'fairly' strongly rose to 37% in 2012 and to 41% in 2015 – the highest level in any British Social Attitudes Survey since 1987.

Figure 8b: Strength of party identification, selected 1987 to 2015 (%)

	1987	1997	2001	2005	2010	2012	2014	2015
Very strong	11	9	7	7	7	6	8	9
Fairly strong	35	28	29	28	29	25	29	32
Not very strong	40	47	49	46	41	47	44	38
None	8	10	12	13	17	22	19	15

4.2 Social composition of party supporters

Surveying the social background of party members is difficult as they comprise such a small percentage of the UK's population. This renders traditional means of surveying ineffective.

Paul Whiteley's *Where have all the members gone?* (2009) and Ford & Goodwin's *Revolt on the Right* (2014) utilised large survey samples and other techniques to combat this problem. These techniques are not flawless and do not capture the rapid changes in membership experienced in 2015 and 2016; they so, all the same, offer informed estimates.³⁷

In Whiteley's study, conducted in 2008, 27.7% of party members described themselves as retired compared to 18.9% of electors. Members of a political party were also more likely to hold either professional or managerial status than the wider electorate. While over half (59.3%) of party members held either professional or managerial status, under half (42.8%) of electors were found to do so.

The largest disparity between the social make up of party members and electors is for gender. While 50.1% of electors were male, 67.2% of party members were men.

Robert Ford's and Matthew Goodwin's 2014 book *Revolt on the Right* surveyed the social characteristics of UKIP supporters compared to those of other UK political parties.³⁸ With a sample of around 124,000 British voters between April 2004 and April 2013, Ford and Goodwin were able to build a detailed picture of those people who stated support of a political party.³⁹

Figure 9 Social characteristics of those stating support for a given political party (%), April 2004 - April 2013

³⁸ "Supporters" are those people expressing "fairly strong" or "very strong" support for a given party

³⁹ 7 Ford & Goodwin; *Op.Cit.*; pp. 149-151

They found people with a working class occupation were in the majority among UKIP supporters. Alternatively, the professional/managerial middle class dominated within the Conservative, Liberal Democrats and Green Parties. The proportion of supporters from middle and working class occupations within Labour was approximately balanced.

The age at which a voter left education was also distinct between parties. 60% of Green Party supporters left education at 19 or older, as did 50% of Liberal Democrat and 40% of Conservative supporters. An equal proportion of Labour supporters had either left education at 16 or younger or at 19 or older. UKIP supporters were, in contrast, more likely to have left school at 16 or younger.

4.3 Voting intentions – the rise of “other”

The rise in support for parties other than the Conservatives, Labour and the Liberal Democrats seen in membership data was reflected in the results of the May 2015 General Election.

24.9% of the vote went to parties other than the Conservatives, Labour or the Liberal Democrats in May 2015, the highest share of the vote won by “other” parties at any General Election since 1945. In comparison, in 2010 “other” parties collectively won 12% of the vote - and at each election 1950-1964 just one percent.

Figure 10 shows the rise in the share of the vote gained by “other” parties at General Elections since 1945. Between 1945 and 1970 the three main parties won between 96%-99% of the vote at each General Election. The three main parties won 99% of the vote in every General Election 1950-1964 and 98% of the vote in the 1966 General Election.

The sustained rise of “other” parties began in 1987. The share of the vote won by the three main parties has fallen in every General Election since 1987, in which the three main parties won 96% of the vote and “others” 4%. In 1992 “others” won 6% of the vote, 9% in 1997 and 2001, 10% in 2005 and 12% in 2010.

In May 2015 24.9% of the vote went to “other” parties. Specifically, the SNP won 4.7% of the vote, UKIP 12.6%, the Green Party 3.4% and Plaid Cymru 0.6%. The SNP, UKIP and the Green Party all won their highest ever shares of the vote at this election.

5. Non-party political activity and engagement

In 2015, Trade union membership was at its lowest level since 1945, according to the Certification Office. It remains, nonetheless, higher than party membership levels by an order of magnitude. In contrast, interest in politics has remained relatively constant since 1986; and in fact rose in 2015 compared to 2014.

Active membership of a variety of organisations, the 32nd British Social Attitudes survey shows, is relatively low. In 2014 26% of people described themselves as an active member of a sports, leisure or cultural group, 12% of a religious group and 12% of a voluntary organisation. Nonetheless, this remains notably above political party membership: in 2014 1% of people described themselves as an active member of a political party.

Figure 11 Percentage of people actively participating in selected organisations (%)

Source [British Social Attitudes Survey 32 Politics report, page 5](#)

The BSA survey shows that, in 2014, a further 7% of respondents described themselves as belonging to but not actively participating in a political party. This is likely an exaggeration of the true percentage of political party members; as the BSA puts it, "some of our respondents were probably claiming psychological rather than paid membership."

5.1 Interest in politics

Public interest in politics increased slightly between 1986 and 2015 despite a long term decline in party membership, the 33rd British Social Attitudes Survey reports.⁴⁰ In 1986 29% of people said they were interested in politics either a 'great deal' or 'quite a lot'. In 2015 36% of people did so. The percentage of people to describe themselves as having 'not much' interest in politics or 'none at all' fell from 39% in 1986 to 32% in 2015, after rising to 37% in 2013. Interest in politics is lower among the young. The Office for National Statistics Measuring National Wellbeing Program (2014) found in 2011- 12 that 42% of adults aged 16-24 expressed no interest compared to 21% of those aged 65 and over. Overall 28% of adults surveyed were 'not at all interested' by politics.⁴¹

The Hansard Society's 2016 Audit of Political Engagement suggests that of interest in politics increased. In 2016, 49% of 18-24 year olds surveyed described themselves as very or fairly interested, compared to 32% in 2015. Similarly, share of white population very or fairly interested in politics increased from 51% in 2015 to 60% in 2016. Interest in politics among BME population remained the same (35%).⁴²

Today's teenagers, however, may be more interested by broader social issues than previous generations. A 2013 study by Demos, a cross-party think tank with an interest in citizenship and political participation, claimed that 66% of teachers surveyed thought today's 16 and 17 year olds were more engaged with social issues than past generations. Just over 20% of teachers thought 16-17 year olds to be more interested in party politics than previous generations.⁴³

5.2 Trade union membership

In 2014-15 there were 6.9 million trade union members in the UK, according to the Certification Office. This is the lowest total since 1945 according to records kept by the Department of Employment Statistics Division (1892-1974) and the Certification Office (1974-present)⁴⁴.

According to the Labour Force Survey 6.5 million employees, around a quarter of UK employees, were trade union members in 2015. It is a slight increase from 6.4 million in 2014, the lowest total since the LFS began collecting UK data in 1995.⁴⁵

Trade union membership nonetheless remains, according to both data series, larger than party membership levels by an order of magnitude.

Figure 13 shows trade union membership in the UK since 1892. Membership peaked in 1979 at over 13 million employees, before declining sharply.

Female employees are now more likely to be trade union members than their male counterparts. In 2015 around 28% of female employees were trade union members, compared with 22% of male employees.

This is a reversal of the situation in 1995, when 29.7% of female and 35.0% of male employees were trade union members. Older individuals are more likely to be trade union members. 39% of trade union member employees were aged over 50 in 2015, but only 28% of employees are in this age group.

37% of union members hold professional occupations, compared to 20% of UK employees. Those holding associate professional and technical occupations account for 13% of members, caring, leisure and other service occupations 11% and administrative and secretarial occupations 9%.⁴⁶

Figure 13b: Trade Union membership by gender, 2015

5.3 Non-party political campaigns

This sub-section provides information on a range of organisations active in today’s political landscape. It is not intended as a comprehensive overview of all non-party political bodies.

CND

The Campaign for Nuclear Disarmament was founded in January 1958. CND membership is thought to have peaked in the early-mid 1980s: in 1984 CND local membership was approximately 250,000 while in 1985 CND national membership was approximately 110,000. By 1988 this had fallen to around 130,000 local members and 70,000 national members. The Independent estimated that CND had 32,000 members in 2005. CND’s 2015 accounts reported a total income of around

⁴⁶ Department for Business, Innovation and Skills; [Trade Union Statistics 2015](#)

£702,000, of which subscriptions and regular giving accounted for around £315,000.⁴⁷

Campaign to Protect Rural England

The 'Council for the Preservation of Rural England', later the Campaign to Protect Rural England, was formed in 1926 by Sir Patrick Abercrombie. The Campaign claims to have a presence in every English county and over 200 local groups. The charity's 2014/15 Annual Review claimed approximately 65,000 members. In 2014 around 41%, or around £1,658,000, of income was from membership and committed giving revenues⁴⁸.

Countryside Alliance

The Countryside Alliance was formed in 1997 in reaction to the newly elected Labour Government's pledge to ban hunting with dogs and to promote the rural economy. The Alliance's 2013 Annual Report states an income of around £3,160,000 from subscriptions (67% of total income). The Alliance currently claims around 100,000 members.

The People's Assembly Against Austerity

The People's Assembly Against Austerity was launched on 5th February 2013 with a letter to The Guardian, signed by numerous trade union officials, journalists and activists. As of July 2014 it had approximately 80 local groups operating across Great Britain and around 40,000 people are signed up to its national mailing list. On 20 June 2015 the Assembly claimed around 250,000 people attended its anti-austerity march in London, though this estimate cannot be independently verified.⁴⁹ On 16 April 2016 as The Guardian estimates that: 'anything between 50,000 and 150,000 marched' in their event.⁵⁰

Stop the War coalition

The coalition was founded in September 2001 to oppose the "war on terror". 53 local groups are listed in Stop the War's main website, a list last updated in May 2013. The coalition claims to have organised around 40 national demonstrations. On 15th February 2003 it held what the BBC described as "one of the biggest days of public protest ever seen in the UK" against possible war in Iraq; the BBC estimated that around 1 million people joined the march, while police estimates placed the number at over 750,000.

About the Library

The House of Commons Library research service provides MPs and their staff with the impartial briefing and evidence base they need to do their work in scrutinising Government, proposing legislation, and supporting constituents.

As well as providing MPs with a confidential service we publish open briefing papers, which are available on the Parliament website.

Every effort is made to ensure that the information contained in these publicly available research briefings is correct at the time of publication. Readers should be aware however that briefings are not necessarily updated or otherwise amended to reflect subsequent changes.

If you have any comments on our briefings please email papers@parliament.uk. Authors are available to discuss the content of this briefing only with Members and their staff.

If you have any general questions about the work of the House of Commons you can email hcenquiries@parliament.uk.

Disclaimer

This information is provided to Members of Parliament in support of their parliamentary duties. It is a general briefing only and should not be relied on as a substitute for specific advice.
