

BRIEFING PAPER

Number 6385, 16 August 2018

Unemployment by ethnic background

By Feargal McGuinness

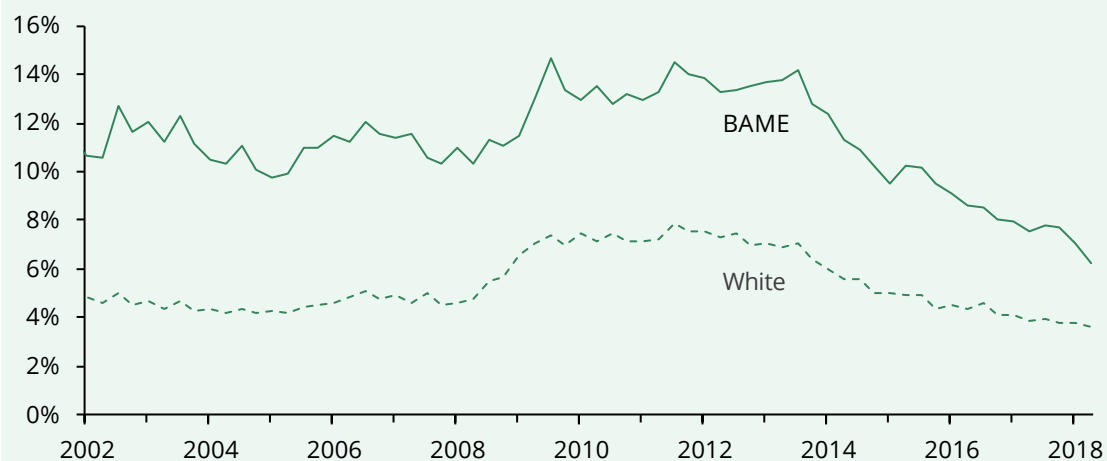

1. Unemployment rates

The UK unemployment rate was 4.0% in April-June 2018. The rate was **3.6% for people from a White background** compared to **6.3% for people from BAME (Black, Asian and Minority Ethnic) backgrounds**, although there was substantial variation between different ethnic minority groups.¹

Both these figures have decreased sharply over the past five years and are below their levels in the early to mid-2000s. After the economic downturn in 2008, there was an increase in unemployment rates across ethnic groups. The unemployment rate for people from a White background reached a peak of 7.8% while the rate for people from BAME backgrounds increased to 14.7% following the downturn.

Unemployment rate by ethnic background: UK, 2002-18

People aged 16+, not seasonally adjusted

Source: ONS, *UK Labour Market, August 2018*, Table A09

Unemployment figures are survey based. Relatively small numbers of respondents from ethnic minority groups mean that unemployment estimates for ethnic minorities are more volatile than estimates for White people, as is visible from the jagged line on the graph.

¹ The unemployment rate is the proportion of the economically active population who are unemployed. Someone is economically active if they are in work (employed) or if they are looking for and available for work (unemployed). Otherwise the person is economically inactive: not in work and not looking for work.

2 Unemployment by ethnic background

The table shows unemployment rates for different ethnic groups in the year to March 2018. The unemployment rate was highest for people from a Bangladeshi background (12%), followed by those from a Pakistani or Black background (9%). The unemployment rates for people from Indian or Chinese backgrounds was similar to that for White people.

Survey error means that where there is only a small difference in unemployment rates between groups, it is best to view these rates as being about the same.

Unemployment by ethnic background, UK

Data at April 2017 to March 2018; Thousands

	Number unemployed	Unemployment rate
White	1,120	4%
Black/African/Caribbean/Black British	90	9%
Indian	50	5%
Pakistani	50	9%
Other ethnic group	40	8%
Mixed/Multiple ethnic groups	30	7%
Bangladeshi	30	12%
Any other Asian background	20	6%
Chinese	10	4%
Total	1,430	4%

Source: ONS *Annual Population Survey* microdata

Notes: All numbers rounded to nearest 10,000 and may not sum due to rounding. Estimates based on survey responses so subject to sampling error.

1.1 Estimates by age group

Across ethnic groups, unemployment rates are higher for young people than for older age groups.

Among people aged 16-24, unemployment rates were highest for people from a Black background (26%) and from a Pakistani or Bangladeshi background (23%) in the year to March 2018. This compared to a rate of 11% for people from a White background.

Unemployment by age and ethnic background

Data at April 2017 to March 2018; Thousands

	16-24		25-49		50+		Total	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate
White	410	11%	450	3%	260	3%	1,120	4%
Black	30	26%	40	7%	20	6%	90	9%
Bangladeshi/ Pakistani	30	23%	40	7%	<10	7%	70	10%
Indian	<10	13%	30	5%	<10	5%	50	5%
Other ethnic backgrounds	30	16%	50	5%	20	6%	100	7%
Total	520	12%	610	3%	310	3%	1,430	4%

Source: ONS *Annual Population Survey* microdata

Notes: All numbers rounded to nearest 10,000 and may not sum due to rounding. Estimates based on survey responses so subject to sampling error.

"Other ethnic backgrounds" includes people from Chinese, other Asian, mixed/multiple or other ethnic backgrounds.

Across age groups, unemployment rates were lower for White people than for other ethnic backgrounds. Some of the reported difference between groups, or the lack of difference, is likely to be attributable to survey error.

1.2 Estimates by gender

The **unemployment rate for White men was 4.1% in the year to March 2018, slightly higher than for White women (3.6%)**. This continues a longstanding trend where unemployment rates tend to be higher for men than for women from a White background. The employment rate is still higher for men than for women, because women are more likely than men to be economically inactive (not in work and not looking for work).

However, among people from BAME backgrounds, unemployment rates for men and women have diverged in recent years so that **the unemployment rate is higher for BAME women (8.5%) than for men (6.6%)**. This is observed across most ethnic minority groups. BAME men also have a higher employment rate than BAME women.

The unemployment rate was highest for women from a Pakistani or Bangladeshi background at around 14%, compared to an overall female employment rate of 4%.

Unemployment by ethnic background and gender: UK,

Data at April 2017 to March 2018; Thousands

	Male		Female		Total	
	Number	Rate	Number	Rate	Number	Rate
White	630	4%	490	4%	1,120	4%
Black	40	7%	50	10%	90	9%
Bangladeshi/ Pakistani	40	8%	40	14%	70	10%
Indian	20	4%	30	7%	50	5%
Other ethnic backgrounds	60	7%	50	6%	100	7%
Total	780	4%	650	4%	1,430	4%

Notes: All numbers rounded to nearest 10,000 and may not sum due to rounding. Estimates based on survey responses so subject to sampling error.

"Other ethnic backgrounds" includes Chinese, other Asian, mixed/multiple or other ethnic backgrounds.

2. Sources and notes

The original sources for the data in this briefing paper are the quarterly Labour Force Survey and the Annual Population Survey, run by the Office for National Statistics (ONS). The annual figures are more robust than the quarterly figures as they are based on a larger number of survey respondents, so are used for the more detailed analyses in sections 1.2 and 1.3.

Quarterly data on unemployment and employment by ethnic background is published in [Table A09](#) of the Office for National Statistics's monthly *UK Labour Market* bulletin. New data are published four times a year, in February, May, August and November. Estimates are not seasonally adjusted, meaning they do not take into account changes that would usually be expected to occur within the course of the year.

The annual data presented in this paper is not routinely available from other published sources but can be obtained via analysis of the underlying Annual Population Survey microdata, as has been done here.²

All figures are based on surveys and are therefore subject to sampling error. Estimates for ethnic minority groups are more volatile than estimates for the population as a whole, since estimates are based on smaller numbers of survey respondents. Some of the reported differences between groups (or the lack of difference) may simply be down to statistical 'noise' rather than genuine differences.

Further information on youth unemployment is available in the Library's briefing paper on *Youth unemployment statistics*. A summary analysis of the latest labour market statistics and trends for the UK is available in the Library's monthly paper, *People claiming unemployment benefits by Constituency*.

About the Library

The House of Commons Library research service provides MPs and their staff with the impartial briefing and evidence base they need to do their work in scrutinising Government, proposing legislation, and supporting constituents.

As well as providing MPs with a confidential service we publish open briefing papers, which are available on the Parliament website.

Every effort is made to ensure that the information contained in these publically available research briefings is correct at the time of publication. Readers should be aware however that briefings are not necessarily updated or otherwise amended to reflect subsequent changes.

If you have any comments on our briefings please email papers@parliament.uk. Authors are available to discuss the content of this briefing only with Members and their staff.

If you have any general questions about the work of the House of Commons you can email hcinfo@parliament.uk.

Disclaimer

This information is provided to Members of Parliament in support of their parliamentary duties. It is a general briefing only and should not be relied on as a substitute for specific advice. The House of Commons or the author(s) shall not be liable for any errors or omissions, or for any loss or damage of any kind arising from its use, and may remove, vary or amend any information at any time without prior notice.

The House of Commons accepts no responsibility for any references or links to, or the content of, information maintained by third parties. This information is provided subject to the [conditions of the Open Parliament Licence](#).
