

BRIEFING PAPER

Number 8628, 22 July 2019

Operation Kipion: Royal Navy assets in the Persian Gulf

By Claire Mills

1. Historical presence: the Armilla Patrol

The UK has maintained a permanent naval presence in the Persian Gulf since September 1980, when the Armilla Patrol was established to ensure the safety of British entitled merchant ships operating in the region during the time of the Iran-Iraq War.

During this conflict each nation frequently attacked each other's oil facilities and oil tankers bound for their respective ports, in the so-called "tanker war". Kuwaiti vessels carrying Iraqi oil were particularly susceptible to Iranian attack and foreign-flagged merchant vessels were often caught in the crossfire. By 1987 the threat to international shipping through the Strait of Hormuz forced the United States to intervene in order to secure the shipping lanes. Operation *Earnest Will* became the largest US naval convoy operation since the Second World War.

Later the Armilla Patrol contributed to the Multinational Interception Force (MIF), a naval contingent patrolling the Persian Gulf to enforce the UN-mandated trade embargo against Iraq, imposed after its invasion of Kuwait in August 1990.¹

In the aftermath of the 2003 Iraq conflict, Royal Navy vessels deployed as part of the Armilla Patrol were heavily committed to providing maritime security in the region, the protection of Iraq's oil infrastructure and to assisting in the training of Iraqi sailors and marines.

1.1 Assets

The Type 42 destroyer HMS Coventry was the first vessel to be deployed as part of the Armilla Patrol.

After that the Royal Navy maintained at least one destroyer or frigate in the Persian Gulf, supported by a ship of the Royal Fleet Auxiliary. Later the UK's naval presence varied from a single frigate or destroyer during periods of stability, to large Task Groups during times of crisis, such as the First Gulf War in 1990-1991 and the Iraq Conflict in 2003.

2. Operation Kipion

In June 2011 the Armilla Patrol evolved into [Operation Kipion](#), which represents the Royal Navy's current maritime security presence in the Persian Gulf and the Indian Ocean. With a broader remit, Operation Kipion is a combination of Royal Navy operations in the Middle East patrolling the Strait of Hormuz, Suez Canal and conducting counter piracy in the Indian Ocean.²

The aim of the operation is to promote peace and stability in the region, as well as ensuring the safe flow of oil and international trade.

2.1 Assets

Maritime security patrol

There is typically one Royal Navy escort vessel, with Royal Marines embarked, deployed on maritime security patrol supported by a tanker of the Royal Fleet Auxiliary.

At present Type 23 frigate HMS Montrose is on duty.

On 13 July 2019 it was widely reported in the media that the UK was deploying a second Royal Navy vessel, Type 45 HMS Duncan, to the region "amid rising tensions in the region". However, HMS Duncan was already tasked to deploy to the Gulf to replace HMS Montrose, which is shortly due to enter a period of pre-planned maintenance and crew rotation.

HMS Duncan is currently en route to the region and its deployment is expected to overlap for a short period with HMS Montrose.

Future routine deployments

At the start of August 2019 RFA Wave Knight will also join Operation Kipion as the designated Ready Tanker, in what is a long-planned deployment.

It has also been announced that Type 23 frigate, HMS Kent, will deploy to the region later in 2019 to take over from HMS Duncan and ensure a continuous Royal Navy maritime security patrol presence in the region.

Mine countermeasures squadron

A permanent mine countermeasures squadron is deployed in the Gulf because of the large number of mines present in and around the Persian Gulf as a result of the Iran-Iraq War. Comprising four mine hunter vessels, and a support ship of the RFA, the role of the squadron is to seek out and destroy unexploded sea mines in order to ensure the safe transit of oil and global maritime trade.

At present, the Mine Countermeasures Squadron consists of:

- Two Hunt-class mine countermeasures vessels: HMS Ledbury and HMS Brocklesby
- Two Sandown-class mine hunters: HMS Shoreham and HMS Blyth
- RFA Cardigan Bay.

Command and Control

UK Maritime Component Command, which is based in Bahrain and responsible for the wider region, is the command element of Operation Kipion.

3. UK Naval Support Facility in Bahrain

For many years the Royal Navy's presence in the Gulf has been supported by US facilities at Mina Salman port in Bahrain.

However, in December 2014 the MOD announced that it would re-establish a permanent Royal Navy base at Mina Salman (HMS Jufair).³ It is the first permanent overseas Royal Navy facility operating 'east of Suez' in nearly 50 years and will be the hub for Royal Navy operations in the Persian Gulf, Red Sea and Indian Ocean.

The UK Naval Support Facility (UKNSF) was officially opened in April 2018. It can accommodate approximately 500 Royal Navy personnel and will allow the Royal Navy to provide better maintenance and support to its vessels operating in the region, which will include the new Queen Elizabeth class aircraft carriers.⁴

In October 2018 it was announced that HMS Montrose would be the first Royal Navy vessel to be permanently forward deployed at HMS Jufair, until 2022.

³ HMS Jufair was first established by the Royal Navy in 1935. Following Bahraini independence in 1971 the United States took over the base.

⁴ The Queen Elizabeth class will be able to access facilities at Mina Salman while at anchor. However, they will not be able to berth directly alongside the support facility due to the shallow waters.

About the Library

The House of Commons Library research service provides MPs and their staff with the impartial briefing and evidence base they need to do their work in scrutinising Government, proposing legislation, and supporting constituents.

As well as providing MPs with a confidential service we publish open briefing papers, which are available on the Parliament website.

Every effort is made to ensure that the information contained in these publicly available research briefings is correct at the time of publication. Readers should be aware however that briefings are not necessarily updated or otherwise amended to reflect subsequent changes.

If you have any comments on our briefings please email papers@parliament.uk. Authors are available to discuss the content of this briefing only with Members and their staff.

If you have any general questions about the work of the House of Commons you can email hcinfo@parliament.uk.

Disclaimer

This information is provided to Members of Parliament in support of their parliamentary duties. It is a general briefing only and should not be relied on as a substitute for specific advice. The House of Commons or the author(s) shall not be liable for any errors or omissions, or for any loss or damage of any kind arising from its use, and may remove, vary or amend any information at any time without prior notice.

The House of Commons accepts no responsibility for any references or links to, or the content of, information maintained by third parties. This information is provided subject to the [conditions of the Open Parliament Licence](#).
