

RESEARCH PAPER 00/24
8 MARCH 2000

The National Lottery

This paper outlines how money raised from National Lottery ticket sales is distributed between prize money, good causes, Camelot and the Government.

It presents data on ticket sales and awards in every constituency and shows the distribution of awards by region and between rural and urban areas.

Finally, this paper examines the chances of winning the lottery and the pattern of winning numbers.

This paper updates research paper 99/73

Summary of main points

- £26 billion has been spent on lottery tickets since the launch in November 1994.¹ On average, £38 million has been sold in each constituency.
- Over £7 billion has been raised for good causes. By the end of Camelot's 7-year licence in September 2001, the Lottery will have made an estimated £11 billion for good causes.
- Around 53,000 Lottery awards had been made by the end of December 1999, with an average value of £137,700 each.
- On average, each parliamentary constituency has received 80 awards with an average value of £10 million.
- The constituency of Cities of London and Westminster has received the most Lottery grants (434) and the highest value of awards (£887 million²).
- The most tickets sold were in the same constituency. To 13 November 1999, £190 million worth of tickets had been sold there; for every £1 spent on the lottery, the constituency received £4.70 in awards for good causes.
- The constituency which has received the fewest awards from the Lottery is Billericay with 12. Hayes and Harlington has been awarded the lowest value of awards, at £418,000.
- £49 million and £46 million worth of tickets have been sold in Billericay and Hayes and Harlington respectively. This means that for every £1 spent on the lottery in these constituencies, they have received 1 penny in awards for good causes.
- £664 million was paid to the Exchequer in Lottery Duty, corporation tax and VAT in 1998/99, representing 12.8 per cent of sales.

I Introduction

The National Lottery was established under the *National Lottery etc Act 1993*, and the first draw was on 14 November 1994. About 30 million people play it every week, by buying tickets for the two weekly 'on-line' draws or purchasing 'instant-win' scratchcards. In the last financial year, 1998/99, ticket sales were worth just over £5.2 billion. Total ticket sales to the end of December 1999 have been £26 billion³.

A. Distribution of sales

Over the lifetime of the current Lottery licence, the money from ticket sales will be allocated in the following proportions:

50%	Prize winners
28%	National Lottery Distribution Fund
13%	Lottery Duty, Corporation Tax and VAT
5%	Retailer commission
3%	Camelot operating expenses
1%	Profit

Table 1 on page 9 shows figures from Camelot's accounts for the financial years since 1994/95. In 1998/99 ticket sales totalled £5.2 billion. Of this, £2.6 billion was given in prize money, £625 million was paid in Lottery Duty and £1.5 billion was paid to the National Lottery Distribution Fund (NLDF).

1. National Lottery Distribution Fund

The largest part of the money accruing to the National Lottery Distribution Fund (NLDF) comes from the Ticket Sales Payment as set out in the licence agreement. Each week Camelot is obliged to pay a percentage of net (after Lottery Duty) ticket sales to the NLDF. The percentages are set for different levels of ticket sales such that the marginal rate of payment to the NLDF increases with ticket sales. In 1998/99 28.6% of sales were paid to the NLDF.

There are also other transfers to the NLDF. The aggregate value of all unclaimed prizes for which the claim period has expired is paid to the NLDF. Camelot forecasts that unclaimed prizes will amount to 1.0% of ticket sales each year. In 1998/99 total unclaimed prize money paid into the NLDF was £88 million⁴, which is about 1% of prize money.

³ Taken from: <http://www.national-lottery.co.uk/news/index.html#facts>

⁴ Includes prize fund shortfall, Camelot Annual Review 1999, *Add Something Extra*

2. Government

Lottery Duty has been set at 12%. Lottery Duty is intended to be revenue-neutral, making up for lost VAT on other retail sales. If spending is diverted to lottery tickets from products attracting high levels of duty (alcohol, tobacco etc.) then the Exchequer loses out. Conversely if spending is diverted from low-taxed items (confectionery, newspapers) or from planned savings, the Exchequer gains. As ticket sales have been higher than forecast, so has the amount raised from Lottery Duty. Table 2 on page 14 shows that £143 million was paid in Lottery Duty in 1994/95, £626 million in 1995/96 and £567 million in 1996/97, £662 million in 1997/98 and £625 million in 1998/99.

Other payments to the Exchequer will include Corporation Tax on Camelot's profits. This tax amounted to £104 million in the first five financial years of operation. As sales of Lottery tickets are exempt from VAT, VAT is not recoverable on the company's costs and is therefore a charge against profits. The VAT charge for Camelot for 1998/99 was £18 million compared with £20 million in 1997/98; this includes VAT on capital expenditure. In 1998/99, the total amount raised by the Exchequer from the Lottery in terms of Lottery Duty, Corporation Tax and VAT was £664 million, or 12.8% of ticket sales.

3. Retailers

The Camelot retailer agreement allows retailers to earn 5% commission on sales of both the on-line and instants games, as well as earning 1% commission on prizes paid out between £10 and £200. For this reason, the proportion of sales going to retailers has been around 5.1% in each year. Retailer commission for the year 1998/99 totalled £256 million and since the launch, on-line retailers have each benefited by an average £32,000 commission.⁵

4. Camelot

After Lottery Duty, payments to the NLDF, retailers' commission and prizes, Camelot was left with around 4.8% of ticket sales in 1998/99. £181 million or 3.8% of ticket sales was paid in operating costs, consisting mainly of advertising and marketing expenditure, administration costs and depreciation. Operating costs also include terminal and data communication costs - mainly the cost of maintaining the terminals and on-line lottery network. This left profit after tax at around 1.0% of ticket sales or about £50 million.

B. Distribution of Lottery funds to good causes

When Camelot's 7-year licence to run the Lottery began in November 1994, it was expected that the total sales of the Lottery would amount to £32 billion, of which £9 billion would go to good causes. At present, it is forecast that the Lottery will generate between £11.0 billion and £11.6 billion for good causes by the end of the licence in September 2001,⁶ which suggests total ticket sales will be in the region of £40 billion.

The distributing bodies which allocate Lottery funds for six good causes are:

- The Arts Councils for England, Scotland, Wales and Northern Ireland
- The National Lottery Charities Board (NLCB)
- The National Heritage Memorial Fund
- The UK Sports Council & the Sports Councils for England, Scotland, Wales and Northern Ireland
- The Millennium Commission
- The New Opportunities Fund (NOF)

Each of the thirteen bodies are responsible for sifting through the applications made to them for Lottery money, determining which are eligible, and deciding which among these should be awarded a grant. They are required to comply with directions given by the Secretary of State, on matters of policy and financial propriety - but the Secretary of State does not have any role in deciding which applications for Lottery grants are successful.

The New Opportunities Fund (NOF) - the new sixth good cause - was set up under the *National Lottery Act 1998* and started inviting applications for grants in January 1999.⁷ The creation of NOF was set out in the White Paper *A People's Lottery* published in July 1997.⁸ At this time, the predicted size of the NLDF over the seven-year licence was £10 billion: £1 billion more than first estimated. It was proposed that this extra £1 billion be channelled into a new fund to support initiatives in health, education and the environment and a one-off £200 million grant to set up NESTA (the National Endowment of Science, Technology and the Arts). By October 1998 the official estimate of the NLDF over its lifetime had risen to £10.6 billion and the Government proposed splitting the proceeds so that £1.9 billion was given to arts, charities, heritage and sport, £2.0 billion to the Millennium Commission, and the remainder to NOF.⁹ By May 1999 this estimate had risen by a further £250 million, of which it was anticipated that NOF would take one-third, and the remaining four original causes share the remaining two

⁶ HC Deb 27 October 1999 c 862

⁷ Prior to the introduction of NOF, the NLDF was divided into five equal parts for the five good causes: arts, sport, the heritage, charities and the celebration of the millennium.

⁸ Cm 3709 July 1997

⁹ HC Deb 19 October 1998 c 919W

thirds.¹⁰ Finally in October 1999 the Government published estimates, based on three different scenarios, showing the forecast income for the good causes at £11.21 billion (medium forecast), pitched between a low forecast of £11.02 billion and a high forecast of £11.64 billion. Taking this medium forecast, it is anticipated that it would be shared by the six good causes as follows:

<i>£ billion</i>	
Good cause	Medium Forecast
Charities	1.91
Heritage	1.92
Arts	1.88
Sports	1.91
Millennium Commission (including interest)	2.02
New Opportunities Fund	1.22
Interest for the period	0.35
1 October to 30 September 2001	
Total (including interest)	11.21 ¹¹

Legislation amending each distributing body's percentage share of the NLDF was introduced in February 1999.¹² For a temporary 13-week period starting on 15 February, the shares of the NLDF going to arts, charities, heritage and sport were 5%, as NOF's share rose to 60%.¹³ From 17 May, the share of the first four bodies has returned to 16²/₃%, as NOF's share has fallen to 13¹/₃%.¹⁴ Once the Millennium Commission's total Lottery income reaches its target of just over £2 billion, it is intended that its current 20% share will go to NOF.

In the case of four of the six good causes, the share of money received by each country in the United Kingdom is specified. The money allotted to arts and sports is divided among the four countries of the UK according to population, though in the case of sports, a 'top' slice of 9.2% goes to the UK Sports Council for UK-wide projects.¹⁵ Both the National Lottery

¹⁰ DCMS press notice 140/99, 17 May 1999

¹¹ "The income data for the individual Good Causes (except the Millennium Commission) exclude interest for the period from 1 October 1999 to the end of the Licence. It is not possible to calculate the future allocation of interest between the Good Causes, because this will depend on the rate at which the Distributors draw income from the NLDF. The estimated total interest for all the Good Causes from 1 October 1999 to the end of the Licence is shown separately." HC Deb 27 October 1999 c 862

¹² Under the *Apportionment of Money in the National Lottery Distribution Fund Order* SI 1999/344. With the creation of NOF, the distribution of funds had been provided for initially under section 15 of the *National Lottery Act 1998*: from 14 October 1997, arts, charities, heritage and sport each received 16²/₃% of the NLDF; NOF received 13¹/₃%; and the Millennium Commission received 20%. It had been proposed to swap the shares of NOF and the Commission from September 1999.

¹³ This temporary increase in cashflow to NOF was to guarantee that it would receive the additional £400 million from the NLDF, allocated to it in October 1998.

¹⁴ The Secretary of State has given guarantees that there will be no further change to the percentages of these four original good causes up to and beyond the end of the licence [HL Deb 12 April 1999 c 104WA].

¹⁵ Under section 23 of the *National Lottery Act 1993*, as amended. The UK Sports Council was established in July 1998; its share of Lottery funds come from that part of the NLDF already allocated to the good cause of sport (DCMS press notice 142/98, 2 July 1998).

Charities Board and NOF divide their share between the four countries on the basis of population figures weighted for deprivation.¹⁶ Similar arrangements do not apply to either heritage or millennium funding. The geographical distribution of funds across these four causes is shown below:

	Arts	Charities	Sports	NOF ¹⁷
England	83.3%	77.5%	75.6%	77.5%
Scotland	8.9%	11.5%	8.1%	11.5%
Wales	5.0%	6.5%	4.5%	6.5%
Northern Ireland	2.8%	4.5%	2.6%	4.5%

Those considering an application for Lottery funding are best advised to contact the relevant distributing body directly and obtain an application pack. This gives guidance on eligibility, as well as setting out the mechanics of making an application. A list of addresses is given in the appendix to this paper. Those interested may wish to refer to, *The National Lottery Yearbook*, published by the Directory of Social Change. It is an annual guide with a purpose to provide all the information needed by those concerned with Lottery policies, practices and outcomes.

Many organisations have been unsuccessful in attracting Lottery funding. Since the National Lottery began, applications for funds have always outstripped those available by a considerable margin and although prospective applicants have lowered their expectations of late, this remains the case. For example, in its *Annual Report* the National Lotteries Charities Board states that it received 20,283 applications in 1997/98, of which only 6,837 were successful.¹⁸ In this context it is unsurprising that many worthy causes may have found it difficult to win grants and, given the sheer diversity of applicants, that some commentators have taken exception to some successful grants for certain causes, because they find little sympathy with the cause itself.

It is important to stress that Lottery grants are not awarded solely on the basis of the 'worthiness' - if one can put it that way - of the cause that is to be funded. Important factors in a successful application will include addressing the criteria and policy of the relevant distributing body, its financial and management structures and assessing evidence of need and commitment to equal opportunities in policy and practice and user involvement. Finally, it is worth underlining that unsuccessful applicants are not prevented from reapplying.

¹⁶ For NOF, these shares are specified in the policy directions issued to the Fund by the Secretary of State (the current directions were issued on 26 April 1999). For the NLCB these shares are self-imposed.

¹⁷ In the case of one NOF initiative - IT training - the percentage breakdown is slightly different; for training teachers and school library staff, the most important part of this initiative, the shares are England 79.7%; Scotland 10.1%; Wales 5.5%; Northern Ireland 4.7%.

¹⁸ *National Lottery Charities Board Annual Report 1997-98* p 27

II Regional and constituency analysis of awards

This section of the paper shows the breakdown of lottery awards by cause, region, and constituency. For data on awards relative to ticket sales, please see the next section.

When using the constituency based data, please note that many awards are intended to benefit a broad spectrum of the population and not just the local residents. In the tables shown, the receiver of the award is recorded by its postal address, so some awards - especially those to bodies in London - include many institutions that are considered of national importance. The Department of Culture, Media and Sport (DCMS) has estimated that awards to these organisations account for around 60% of the total awarded to London.¹⁹ Other areas receive high value awards that benefit a wider area. For instance, Bristol West constituency received an award of £43.5 million to Sustrans, to help create a national cycle network.

The data used are taken from the DCMS Awards Database. DCMS is reliant on the distributing bodies to provide details of individual awards. In some cases bodies may have announced awards but not yet given details to DCMS. This will particularly affect the figures in tables 8 and 9.

Table 2 shows the number and value of awards by distributing body at the end of December 1999. The New Opportunities Fund is included as a new distributor. So far it has made 474 awards to a value of £16 million directed towards healthcare and education providers. Tables 3 to 7 show the number and value of awards broken down by 'good cause' and region. The North East, the South West, Scotland, Wales and Northern Ireland had a greater number of awards per capita than the UK as a whole (Tables 3 and 6). The value of awards per capita in London was, at £289.80, more than double that for the UK as a whole, at £122.20 (Tables 4 and 7). And, the average value of award was greatest in London (Table 5).

Tables 10 to 12 show the number and value of awards by constituency and good cause. Table 10 shows the 25 constituencies with the highest and lowest number and value of awards. Cities of London and Westminster constituency has received both the highest number and highest value of awards with 434 awards worth £886 million in total. Billericay has received the lowest number of awards with just 12, while Hayes and Harlington has received the lowest value of awards with £418,000 compared with a constituency average of £10.6 million. Tables 11 and 12 show the number and value of awards respectively for each constituency, along with a ranking.

Details of individual awards to constituencies are available from the Department of Culture, Media and Sport's website at www.lottery.culture.gov.uk. Section III examines ticket sales.

III Ticket sales

Chart 1 shows National Lottery ticket sales from each week from the first draw on 19 November 1994 to the week ending 13 November 1999.

Saturday draw

- Excluding rollover weeks, sales for the Saturday draw averaged around £60 million for the first few months. This rose to an average of around £70 million by the end of 1995. The average remained between £68 million and £70 million for the whole of 1996.
- Following the introduction of the Wednesday draw in February 1997, sales dropped back to an average of around £60 million per week and average around £55 million per week for 1999.

Wednesday draw

- Sales for the Wednesday draws currently average around £27 million per week and have been around this level since its introduction.

Scratchcards

- Scratchcard sales averaged around £40 million per week for the first few weeks after their introduction in March 1995. Sales declined steadily to around £20 million per week by March 1996 and average around £11½ million for 1999.

Total sales

- Overall sales, including scratchcards, were around £87 million per week prior to the introduction of the Wednesday draw. They rose to an average of around £103 million in 1997 but have fallen to around £95 million for 1999.
- Total sales over Camelot's seven-year licence period were originally projected at around £32 billion. In all but the last financial year of its operation, lottery ticket sales have exceeded the projection. (Table 1).

Camelot Annual Report and Accounts

Weekly Ticket Sales

Ticket Sales by Constituency

A profile of ticket sales by constituency was published in response to a written question to the Secretary of State for Culture, Media and Sport.²⁰ The figures show the value of tickets bought at outlets in each constituency. The table is shown on the following pages. It shows the constituencies in alphabetical order and:

- the amount spent per elector in the constituency and the constituency's rank from highest to lowest.
- The total spent on ticket sales in each constituency.
- The amount received in lottery awards for every £1 spent in the constituency.

Since the lottery started, the average constituency spend on tickets has been £38 million. Just under 250 of the 659 constituencies have spent £30-39 million and about two thirds of constituencies have spent between £20 and 59 million.

The most spent on lottery tickets was in the constituency of Cities of London and Westminster, at £190 million. In the Western Isles £10 million has been spent on tickets. The number and size of ticket outlets, the population and the number of visitors to the constituency have a major impact on ticket sales. These figures should not be used as an indicator of residents' tendency to gamble.

There is no link between constituency ticket sales and the decision to distribute awards, so caution should be taken when comparing the two figures. However, the constituencies with the highest and lowest ratios of award value to lottery spending are highlighted and shown overleaf. (Data for all the other constituencies are shown in the subsequent table.) The ratio used is:

- the value of awards so far received by the constituency;
as a percentage of
- the total value of tickets sold in the constituency.

So far, and on average, 24 pence of the £1 ticket money is spent on good causes in each constituency. But, residents in Hayes and Harlington receive little (locally) in reward for local lottery spending (less than 1p for every £1 spent), unlike the constituency of London and Westminster, which benefits most advantageously (£4.70 for every £1 spent).

The constituencies that benefit the most from the lottery awards, relative to spending on lottery tickets, are the city-centre constituencies where national or regional projects are undertaken for the good of all citizens and not just the local residents. London, Glasgow, Birmingham, Liverpool, Bristol, Cardiff, Belfast, Sheffield and Edinburgh all feature in the top twenty-five constituencies in Table 14 (follows). The 25 constituencies that receive least awards locally in return for local ticket sales are suburban or semi-rural

²⁰ HC Deb 343 c301w (27 January 2000)

commuter districts such as Hayes and Harlington, Birmingham Hall Green, Ealing North, Reigate, Romford and Billericay.

Next, the table below compares awards by region. As can be seen, urban constituencies have received, on average, awards to a value of £16.1 million. Rural constituencies have received an average of £5.9 million. Greater London constituencies have received the highest value of awards and constituencies outside London, in the South East, the lowest value.

Table 13: Average Constituency Lottery Awards and Ticket Sales by Region

Region	Value of Awards (£ million)	Number of Awards	Tickets sold (£ million)	Pence in the pound to good causes^(a)
Urban ^(b)	16.1	72	43.0	37
Rural ^(b)	5.8	84	34.4	17
Greater London	27.9	76	45.9	61
Northern Ireland	13.8	132	35.0	39
Scotland	9.5	122	28.9	33

Department of Culture, Media and Sport (Awards Database)

Finally, the table below shows the ratio of local ticket sales to awards received, by the party of the current MP. Northern Irish parties and Plaid Cymru party constituencies seem to benefit most (over 35p received in awards for every ticket sold locally). Scottish Nationalist or Conservative Party constituencies benefit least.

Party with majority	Lottery Awards for every £1 spent on the lottery
SNP	17p
Conservative	18p
Labour	25p
Liberal Democrat	32p
Ulster Unionist	35p
Plaid Cymru	39p
SDLP	39p
Sinn Fein	40p

Appendix 2: National Lottery – facts and figures

Players

Around 30 million people play the National Lottery regularly, which is about 70% of the eligible adult population. The average spend, including the midweek draw is £3.15 a week. About 30% of players are members of a syndicate.²¹

Chances of winning

The chances of winning the Jackpot (i.e. matching all six balls) is approximately 1 in 14 million. The table below sets out the probability of winning all the different prizes. The odds of winning *any* prize is the sum of these probabilities: 1 in 54.

Chances of winning the National Lottery

	Odds	Typical Prize
Six numbers - the Jackpot	1 in 14 million	£2 million
Five numbers plus the Bonus number	1 in 2.3 million	£100,000
Five numbers	1 in 55,500	£1,500
Four numbers	1 in 1,030	£65
Three numbers	1 in 57	£10

Winners

There are about 1 million winners every week. Since the lottery started there have been 400 million winning tickets, of which 1,679 have been for the Jackpot. The average Jackpot size is £2 million and since most winners are in a syndicate, a typical winner receives about £600,000.

Number Frequency

Each numbered ball has the same chance as any other of being chosen by the machine. But, due to random variation, the spread of numbers drawn is unlikely to be evenly distributed. The attached chart two shows the frequency distribution of the lottery balls in numerical order.²² Number 25 has been drawn the most as a main ball, 81 times, compared to number 19 which has been drawn 44 times. Chart three shows the frequency distribution of the balls drawn. From the chart, 6 balls have been drawn 62 or 72 times, whereas no ball has been drawn 47 times.
