

RESEARCH PAPER 04/63
11 AUGUST 2004

Unemployment by Constituency, July 2004

This paper shows the number of people claiming Jobseeker's Allowance recorded as resident in each constituency in the United Kingdom in July 2004, together with comparisons with the levels in July 2003 and July 1997. This paper also presents residence-based unemployment rates for all 659 constituencies in the United Kingdom.

Includes unemployment rates by constituency map.

Library Research Papers are compiled for the benefit of Members of Parliament and their personal staff. Authors are available to discuss the contents of these papers with Members and their staff but cannot advise members of the general public. Any comments on Research papers should be sent to the Research Publications Officer, Room 407, 1 Derby Gate, London, SW1A 2DG or e-mailed to PAPERS@parliament.uk.

Summary of main points

This Research Paper summarises data for UK parliamentary constituencies from the monthly count of Jobseeker's Allowance (JSA) claimants. It includes rates showing the number of JSA claimants as a proportion of the estimated economically active population in each constituency in 1997. It also includes changes in the number of JSA claimants compared with one and seven years earlier. Please see Research Paper 00/29, *Unemployment by constituency: Revised rates*, for details.

Data for the current constituencies are not available before January 1996.

The political parties shown against each seat are as they stand currently.

I Introduction

The Office for National Statistics (ONS) have announced a re-labelling of unemployment statistics. The official measure of unemployment is the International Labour Organisation (ILO) definition. Figures for all constituencies are not, however, available on this basis. For the purposes of this paper, unemployment refers to the number of Jobseeker's Allowance claimants resident in the constituency and the unemployment rate expresses this number as a percentage of the estimated economically active population resident in the constituency in 1997. This re-labelling of unemployment statistics does not affect the methodology used to calculate the figures in this paper.

The rates presented here should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live. For a full exposition of the methodology used to calculate these rates see Research Paper 96/63, *New Unemployment Rates for Parliamentary Constituencies*.

Until June 1999, ONS did not publish unemployment rates for parliamentary constituencies since most do not approximate to self-contained labour markets.¹ Following local government reorganisation, ONS decided to publish unemployment rates for all unitary authorities, even though some of these do not meet the normal self-containment criteria. From 16 June 1999, they published official unemployment rates for all constituencies. These were workforce-based rates. They expressed the number of claimants as a percentage of the workforce (the number of jobs in the constituency, regardless of whether the jobholders were resident or not, plus the resident unemployed claimants). Following a review of labour market statistics, ONS decided to withdraw these unemployment rates from January 2003.

On 17 September 2003, ONS published new residence-based rates for parliamentary constituencies. These rates express the number of claimants as a percentage of the resident working age population. They are based on population data from the 2001 Census, adjusted to be consistent with the revised official mid-year population estimates.

The rates published in this Research Paper use a different denominator. They express the number of claimants as a percentage of the estimated economically active population resident in the constituency in 1997. There are a number of differences between the denominators used by ONS and those used by the House of Commons Library. For example, the ONS denominator includes working age people who are economically inactive. These people are excluded from the denominator used by the House of Commons Library. In addition, the two sets of denominators are for different years.

Notes to tables:

1. The Boundary Commission reviews in 1995 defined 659 constituencies in the United Kingdom. These were defined in terms of electoral wards as they stood at the time of the review. For the purposes of the unemployment statistics however, constituencies represent a best-fit of frozen 1991 wards to the new constituencies.

¹ Self-contained labour markets are areas where 70 per cent of the people who live in the area also work there, and 70 per cent of those who work in the area also live there.

Boundary alterations between 1991 and 1995 mean that there are inevitably approximations to 1995 boundaries in many constituencies. In some cases, however, the changes to ward boundaries were substantial and some wards are now split between constituencies. These constituencies are indicated with an asterisk (*) in the following tables.

Four wards with populations below the 1991 Census confidentiality threshold have had their data ‘exported’ to a ward which is in another constituency. In these cases, the data for the ‘exported’ ward are included in the constituency to which the ward has been transferred. Constituencies losing data in this way are indicated by ‘>’, whereas those gaining data as a result are indicated by ‘<’.²

2. The following abbreviations for parties have been used:

LAB	Labour	UU	Ulster Unionist Party
CON	Conservative	DU	Democratic Unionist Party
LD	Liberal Democrat	SDLP	Social Democratic and Labour Party
PC	Plaid Cymru	SF	Sinn Fein
SNP	Scottish National Party	IND	Independent
SPKR	Speaker	IC	Independent Conservative
VAC	Vacant	IL	Independent Labour

² Data are transferred from Bath to Wansdyke (one ward), Hereford to Leominster (one ward) and Clywd South to Clwyd West (two wards).

V Illustrative maps

A. Notes

The Library is currently piloting a Geographic Information System (GIS) that enables it to produce maps of unemployment data by constituency. This addition of illustrative maps to this paper is intended to make the interpretation of unemployment data easier. However, the following notes should be borne in mind when drawing conclusions from these maps:

- The map³ overleaf (page 50) shows residence-based claimant count rates for July 2004 for constituencies in Great Britain⁴, with an expanded view of constituencies in London.
- The 641 constituencies in Great Britain have been divided into five equally sized bands, also known as ‘quintile groups’, each of which contain approximately 128 constituencies (20% of the total in Great Britain).
- These groups have been colour-coded, from red – the 20% of constituencies with the highest unemployment rates – through to yellow/light green – the 20% with the lowest unemployment rates.
- It is important to note that the range of unemployment rates covered by each band is different. For example, in July 2004 the top quintile (coloured red) is made up of constituencies with unemployment rates ranging from 4.3% to 13.0%, while the bottom quintile (coloured yellow/light green) is made up of constituencies with unemployment rates ranging from 0.6% to 1.5% (all rounded).
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.

Further maps may be introduced to this paper in the future, depending on feedback and interest. Please contact the authors of this paper with any comments or suggestions.

B. Map of unemployment by constituency, July 2004

Please see overleaf (page 50).

NOTE: All mapping is © Ordnance Survey and must not be reproduced without permission.

³ Maps expressing statistical or other data in terms of a range of colours are known as ‘thematic maps’.

⁴ The Library does not currently have map coverage for Northern Ireland constituencies. Northern Ireland is covered by a separate organisation from Ordnance Survey of Great Britain (the Ordnance Survey of Northern Ireland).

Unemployment by constituency, July 2004
