

RESEARCH PAPER 07/62
18 JULY 2007

Unemployment by Constituency, June 2007

This paper shows the number of people claiming Jobseeker's Allowance recorded as resident in each constituency in the United Kingdom in June 2007, together with comparisons with the levels in June 2006 and June 1997. This paper also presents residence-based unemployment rates for all 646 constituencies in the United Kingdom.

Includes unemployment rates by constituency maps.

Library Research Papers are compiled for the benefit of Members of Parliament and their personal staff. Authors are available to discuss the contents of these papers with Members and their staff but cannot advise members of the general public. Any comments on Research papers should be sent to the Research Publications Officer, Room 407, 1 Derby Gate, London, SW1A 2DG or e-mailed to PAPERS@parliament.uk.

Summary of main points

This Research Paper summarises data for UK parliamentary constituencies from the monthly count of Jobseeker's Allowance (JSA) claimants. It includes rates showing the number of JSA claimants as a proportion of the estimated economically active population of working age in each constituency in 2001 (Please see Research Paper 05/08, *Unemployment by constituency: Revised rates*, for details). It also includes changes in the number of JSA claimants compared with one year earlier and with 1997.

Data for the current constituencies are not available before January 1996.

The political parties shown against each seat are as they stand currently.

I Introduction

This Research Paper provides the latest data on the monthly count of Jobseeker's Allowance (JSA) claimants in each parliamentary constituency in the United Kingdom. It includes rates showing the number of claimants as a proportion of the estimated economically active population of working age resident in each constituency in 2001.¹ For the purposes of this paper, unemployment means the number of JSA claimants resident in each constituency.

The Office for National Statistics also publishes unemployment data for parliamentary constituencies. These data may be found on the NOMIS website.² For an explanation of the different measures of unemployment, and for an exposition of the methodology used to calculate the unemployment rates displayed in this paper please see Library Research Paper 05/08.³

This paper displays the latest levels and rates for the resident male, female and total population of each constituency. Section II A displays these data alphabetically by constituency. The 25 constituencies with the highest and lowest rates respectively are shown in section II B. Ranked listings of constituencies by country are then provided in section III. In section IV, the latest total claimant levels are compared with levels from 1997. Additionally, the change in level on the past year for each constituency is displayed in section IV. Data for current constituencies exists back to January 1996⁴, and are available upon request from the Economic Policy & Statistics Section [extension 2464]. This paper also provides a map that shows the latest residence-based claimant count rates for each constituency in the United Kingdom expressed as quintile groups.

The rates presented in this paper should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live.

Notes to tables:

1. A comparison of current levels with those in 1997 is not available for the new Westminster Parliamentary Constituencies in Scotland, which have stood since the May 2005 General Election. Figures are only available for these constituencies since February 2004. Unavailable figures are denoted in Tables IV and V by a '..'.
2. The Boundary Commission reviews in 1995 defined 659 constituencies in the United Kingdom. These were defined in terms of electoral wards as they stood at the time of the review. For the purposes of the unemployment statistics however, constituencies represent a best-fit of frozen 1991 wards to the new constituencies.

Boundary alterations between 1991 and 1995 mean that there are inevitably approximations to 1995 boundaries in many constituencies. In some cases, however, the changes to ward boundaries were substantial and some wards are now split between constituencies. These constituencies are indicated with an '(a)' in the following tables.

Four wards with populations below the 1991 Census confidentiality threshold have had their data 'exported' to a ward which is in another constituency. In these cases, the data for the

¹ Library papers published before January 2005 calculated rates using 1997-based economically active population denominators. Therefore, these rates are not comparable with those published from January 2005 onwards. See Library Research Paper 05/08 for further details.

² <http://www.nomisweb.co.uk/reports/lmp/pca/contents.aspx>

³ <http://www.parliament.uk/commons/lib/research/rp2005/rp05-008.pdf>

⁴ Data for new Westminster Parliamentary Constituencies in Scotland are only available from February 2004 onwards.

'exported' ward are included in the constituency to which the ward has been transferred. Constituencies losing data in this way are indicated by '(b)', whereas those gaining data as a result are indicated by '(c)'.⁵

3. The following abbreviations for parties have been used:

LAB	Labour	DU	Democratic Unionist Party
CON	Conservative	SDLP	Social Democratic and Labour Party
LD	Liberal Democrat	SF	Sinn Fein
PC	Plaid Cymru	IND	Independent
SNP	Scottish National Party	RES	Respect
SPKR	Speaker	VAC	Vacant
UU	Ulster Unionist Party		

The denominators used in this paper are derived from the 2001 Census. Census data for England and Wales are published by the Office for National Statistics. Census data for Scotland are published by the General Register Office for Scotland. Census data for Northern Ireland are published by the Northern Ireland Statistics and Research Agency. Census data are © Crown copyright.

The source of the data on claimant count levels contained in this publication is National Statistics (NOMIS database) © Crown copyright.

Map data in this publication is reproduced from Ordnance Survey material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office © Crown copyright. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. House of Commons Library (Ordnance Survey) 100040654 (2007) and (Ordnance Survey Northern Ireland) 2085 (2007).

⁵ Data are transferred from Bath to Wansdyke (one ward), Hereford to Leominster (one ward) and Clywd South to Clwyd West (two wards).

V Illustrative maps

A. Notes

The Library is currently piloting a Geographic Information System (GIS) that enables it to produce maps of unemployment data by constituency. This addition of illustrative maps to this paper is intended to make the interpretation of unemployment data easier. However, the following notes should be borne in mind when drawing conclusions from these maps:

- The maps overleaf shows residence-based claimant count rates for June 2007 for constituencies in the United Kingdom, with an expanded view of constituencies in selected major conurbations and surrounding areas.
- The 646 constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 126 constituencies (20% of the total in the United Kingdom).
- These groups have been colour-coded, from red – the 20% of constituencies with the highest unemployment rates – through to yellow/light green – the 20% with the lowest unemployment rates.
- It is important to note that the range of unemployment rates covered by each band is different. For example, in June 2007 the top quintile (coloured red) is made up of constituencies with unemployment rates ranging from 4.5% to 19.3%, while the bottom quintile (coloured yellow/light green) is made up of constituencies with unemployment rates ranging from 0.6% to 1.6% (all rounded).
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.

Further maps may be introduced to this paper in the future, depending on feedback and interest. Please contact the authors of this paper with any comments or suggestions.

B. Maps of unemployment by constituency, June 2007

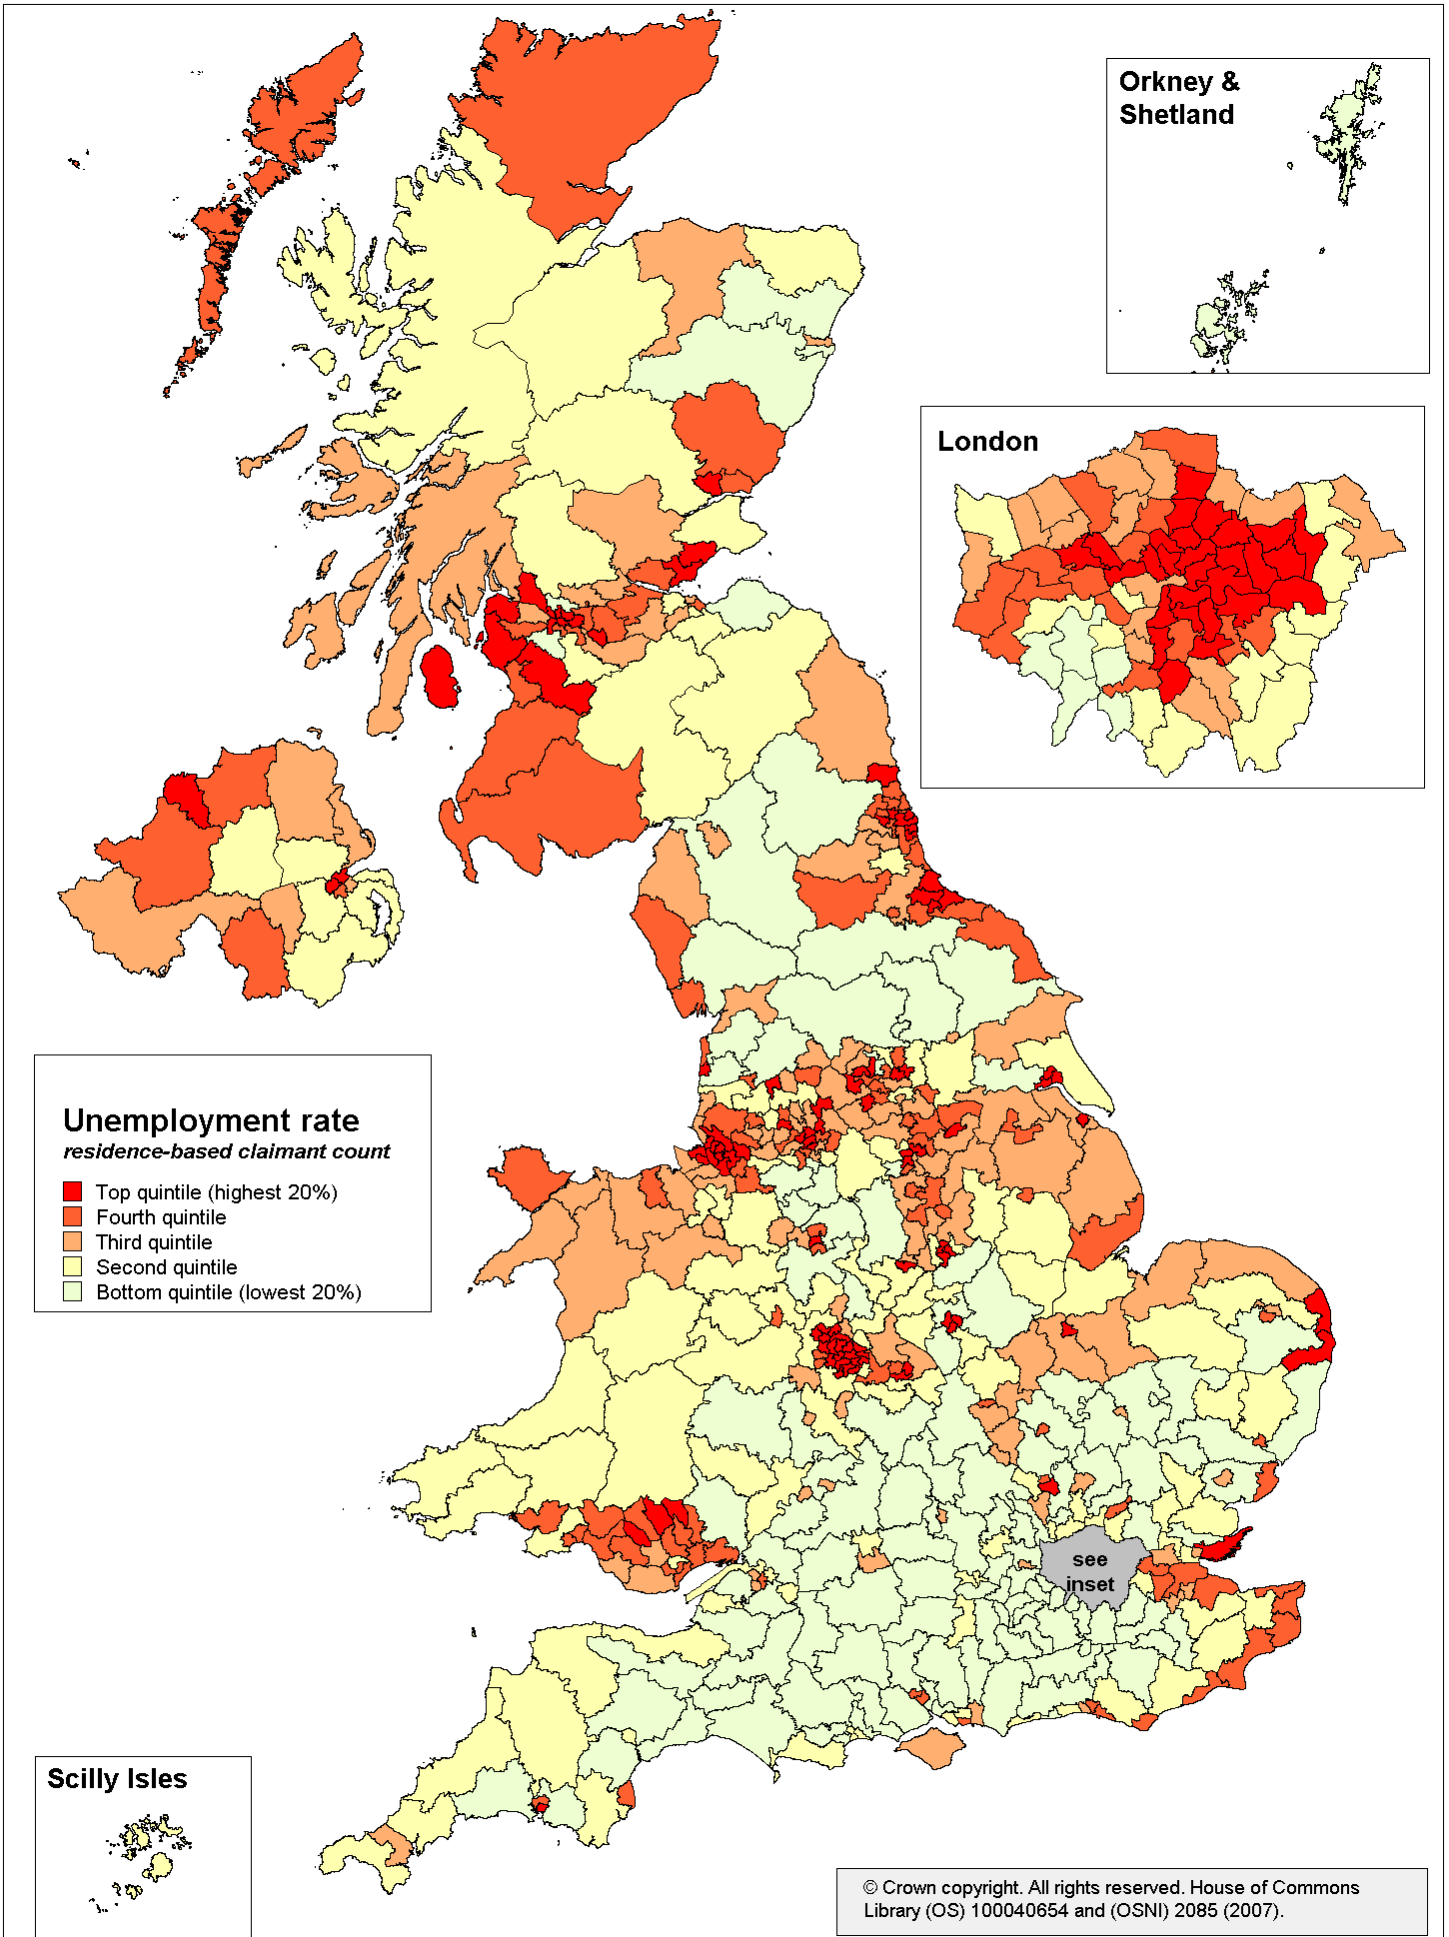

Please see overleaf.
