

Unemployment by Constituency, June 2009

RESEARCH PAPER 09/66 15 July 2009

This paper shows the number of people claiming Jobseeker's Allowance recorded as resident in each constituency in the United Kingdom in June 2009, together with comparisons with the levels in June 2008 and June 1997. This paper also presents residence-based unemployment rates for all 646 constituencies in the United Kingdom.

The paper includes unemployment rates by constituency maps and an annual percentage change map.

This information is provided to Members of Parliament in support of their parliamentary duties and is not intended to address the specific circumstances of any particular individual. It should not be relied upon as being up to date; the law or policies may have changed since it was last updated; and it should not be relied upon as legal or professional advice or as a substitute for it. A suitably qualified professional should be consulted if specific advice or information is required.

This information is provided subject to [our general terms and conditions](#) which are available online or may be provided on request in hard copy. Authors are available to discuss the content of this briefing with Members and their staff, but not with the general public.

We welcome comments on our papers; these should be e-mailed to papers@parliament.uk.

Summary of main points

This Research Paper summarises data for UK parliamentary constituencies from the monthly count of Jobseeker's Allowance (JSA) claimants. It includes rates showing the number of JSA claimants as a proportion of the estimated economically active population of working age in each constituency in 2001 (Please see Research Paper 05/08, *Unemployment by constituency: Revised rates*, for details). It also includes changes in the number of JSA claimants compared with one year earlier and with 1997.

Data for the current constituencies are not available before January 1996.

The political parties shown against each seat are as they stand currently.

I Introduction

This Research Paper provides the latest data on the monthly count of Jobseeker's Allowance (JSA) claimants in each parliamentary constituency in the United Kingdom. It includes rates showing the number of claimants as a proportion of the estimated economically active population of working age resident in each constituency in 2001.¹ For the purposes of this paper, unemployment means the number of JSA claimants resident in each constituency.

The Office for National Statistics also publishes unemployment data for parliamentary constituencies. These data may be found on the NOMIS website.² For an explanation of the different measures of unemployment, and for an exposition of the methodology used to calculate the unemployment rates displayed in this paper please see Library Research Paper 05/08.³

This paper displays the latest levels and rates for the resident male, female and total population of each constituency. Section II provides an overview of the latest Labour Market Statistics release. Section III A displays these data alphabetically by constituency. The 25 constituencies with the highest and lowest rates respectively are shown in section III B. Ranked listings of constituencies by country are then provided in section IV. In section V, the latest total claimant levels are compared with levels in the corresponding month of the previous year and of 1997. Data for current constituencies exists back to January 1996⁴, and are available upon request from the Economic Policy & Statistics Section [extension 2883]. This paper also provides maps that show the latest residence-based claimant count rates for each constituency in the United Kingdom, and the annual percentage change in the claimant count for each UK constituency, expressed as quintile groups.

The rates presented in this paper should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live.

Notes to tables:

1. A comparison of current levels with those in 1997 is not available for the new Westminster Parliamentary Constituencies in Scotland, which have stood since the May 2005 General Election. Figures are only available for these constituencies since February 2004. Unavailable figures are denoted in Tables IV and V by a '..'.
2. The Boundary Commission reviews in 1995 defined 659 constituencies in the United Kingdom. These were defined in terms of electoral wards as they stood at the time of the review. For the purposes of the unemployment statistics however, constituencies represent a best-fit of frozen 1991 wards to the new constituencies.

Boundary alterations between 1991 and 1995 mean that there are inevitably approximations to 1995 boundaries in many constituencies. In some cases, however, the changes to ward boundaries were substantial and some wards are now split between constituencies. These constituencies are indicated with an '(a)' in the following tables.

¹ Library papers published before January 2005 calculated rates using 1997-based economically active population denominators. Therefore, these rates are not comparable with those published from January 2005 onwards. See Library Research Paper 05/08 for further details.

² <http://www.nomisweb.co.uk/reports/lmp/pca/contents.aspx>

³ <http://www.parliament.uk/commons/lib/research/rp2005/rp05-008.pdf>

⁴ Data for new Westminster Parliamentary Constituencies in Scotland are only available from February 2004 onwards.

Four wards with populations below the 1991 Census confidentiality threshold have had their data 'exported' to a ward which is in another constituency. In these cases, the data for the 'exported' ward are included in the constituency to which the ward has been transferred. Constituencies losing data in this way are indicated by '(b)', whereas those gaining data as a result are indicated by '(c)'.⁵

3. The following abbreviations for parties have been used:

LAB	Labour	DU	Democratic Unionist Party
CON	Conservative	SDLP	Social Democratic and Labour Party
LD	Liberal Democrat	SF	Sinn Fein
PC	Plaid Cymru	IND	Independent
SNP	Scottish National Party	RES	Respect
SPKR	Speaker	VAC	Vacant
UU	Ulster Unionist Party	INC	Independent Conservative
UKI	UK Independence Party		

The denominators used in this paper are derived from the 2001 Census. Census data for England and Wales are published by the Office for National Statistics. Census data for Scotland are published by the General Register Office for Scotland. Census data for Northern Ireland are published by the Northern Ireland Statistics and Research Agency. Census data are © Crown copyright.

The source of the data on claimant count levels contained in this publication is National Statistics (NOMIS database) © Crown copyright.

Map data in this publication is reproduced from Ordnance Survey material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office © Crown copyright. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. House of Commons Library (Ordnance Survey) 100040654 (2008) and (Ordnance Survey Northern Ireland) 2085 (2008).

⁵ Data are transferred from Bath to Wansdyke (one ward), Hereford to Leominster (one ward) and Clywd South to Clwyd West (two wards).

II Monthly Labour Market Statistics

Statistics on JSA claimants are one part of a large selection of labour market data released on a monthly basis.⁶ This page highlights some of the key figures in the latest labour market release, as well as data of relevance to constituencies.

- Claimant count unemployment rose by 23,800 in June 2009 to 1.56 million.⁷ This was the lowest monthly rise since June 2008 but the highest level since June 1997.
- The wider ILO based measure of unemployment was 2.38 million in the period March-May 2009, a rise of 753,000 compared to the same period a year ago and 334,000 higher than in the same period in 1997. It is the highest ILO unemployment level since 1995.
- Unemployment in the 50-59/64 and 25-34 age groups has seen the highest rises in percentage terms over the last year, increasing by 60% from 205,000 to 327,000 and by 58% from 322,000 to 508,000 respectively (March-May 2009).
- On a regional basis the highest rates of unemployment (ILO measure) are in the West Midlands (10.3%), North East (9.2%) and Yorkshire and the Humber (8.8%) (March-May 2009). Over the last year the ILO unemployment rate has increased across the UK by 2.4 percentage points. The greatest rises have been in the West Midlands (4.1 percentage points), Yorkshire and the Humber (3.2 percentage points) and Scotland (2.7 percentage points).
- The number of people in employment has fallen by 269,000 over the last quarter to 29.00 million (March-May 2009); full-time employment fell by 273,000 while part-time employment rose by 3,000. Compared to same quarter one year ago overall employment fell by 543,000, full-time employment fell by 595,000 over the year while part-time employment rose by 51,000.
- In March-May 2009 20.9% of the working age population were economically inactive (7.92 million), unchanged from the same quarter one year ago.
- It is estimated that there were 429,000 vacancies in the three months to June 2009, 35,000 lower than the previous quarter and 222,000 lower than in the same period a year ago.
- Average earnings including bonuses rose by 2.3% in the latest quarter to June 2009 compared to the same period one year ago; average earnings excluding bonuses rose by 2.6% over the same period.
- The claimant count was higher in every constituency in June 2009 compared with June 2008. Compared to June 1997 the claimant count is higher in 362 constituencies but lower in 225 constituencies. 1997 data is not available for Scottish constituencies.

The Office for National Statistics expect to publish new experimental statistics estimating ILO unemployment by constituency at the end of July 2009. These model-based estimates aim to improve the reliability of the (currently published) Annual Population Survey (APS) based estimates by making use of JSA claimant count data. Further information is available in an article by ONS⁸ or by contacting the Library.

Youth Unemployment

Over the last year the number of people aged 24 and under claiming JSA has also risen in every constituency. The table below shows the 15 parliamentary constituencies with the highest and lowest changes in JSA claimants 24 and under, ranked by the change in the level over the last year.

⁶ The latest release is available at: <http://www.statistics.gov.uk/pdfdir/lmsuk0709.pdf>. This page is based on data from this release as well as http://www.statistics.gov.uk/OnlineProducts/LMS_FR_HS.asp (historical statistics) and NOMIS: <https://www.nomisweb.co.uk>. The figures used on this page are seasonally adjusted.

⁷ Seasonally adjusted. The JSA data used in the remainder of this paper are not seasonally adjusted.

⁸ ONS, "[New Experimental Statistics, Estimating Unemployment at Parliamentary Constituency Level](#)", 10 July 2009

Mid Ulster has seen the highest rise, increasing by around 695 claimants between June 2008 and June 2009 (236%). It should be noted that the position of constituencies in this table is partly dependent of the demography of constituencies. Data for all constituencies is available from the NOMIS website or by contacting Library.⁹

VI Illustrative maps

The Library is currently piloting a Geographic Information System (GIS) that enables it to produce maps of unemployment data by constituency. This addition of illustrative maps to this paper is intended to make the interpretation of unemployment data easier. Further maps may be introduced to this paper in the future, depending on feedback and interest. Please contact the authors of this paper with any comments or suggestions.

This section includes:

Claimant count rate by constituency, June 2009

United Kingdom	52
Greater London, Edinburgh and Glasgow, Greater Manchester, West Midlands	53
Tyne and Wear, South Yorkshire, West Yorkshire, Merseyside	54

Percentage change in claimant count levels, June 2008 to June 2009

United Kingdom	55
----------------	----

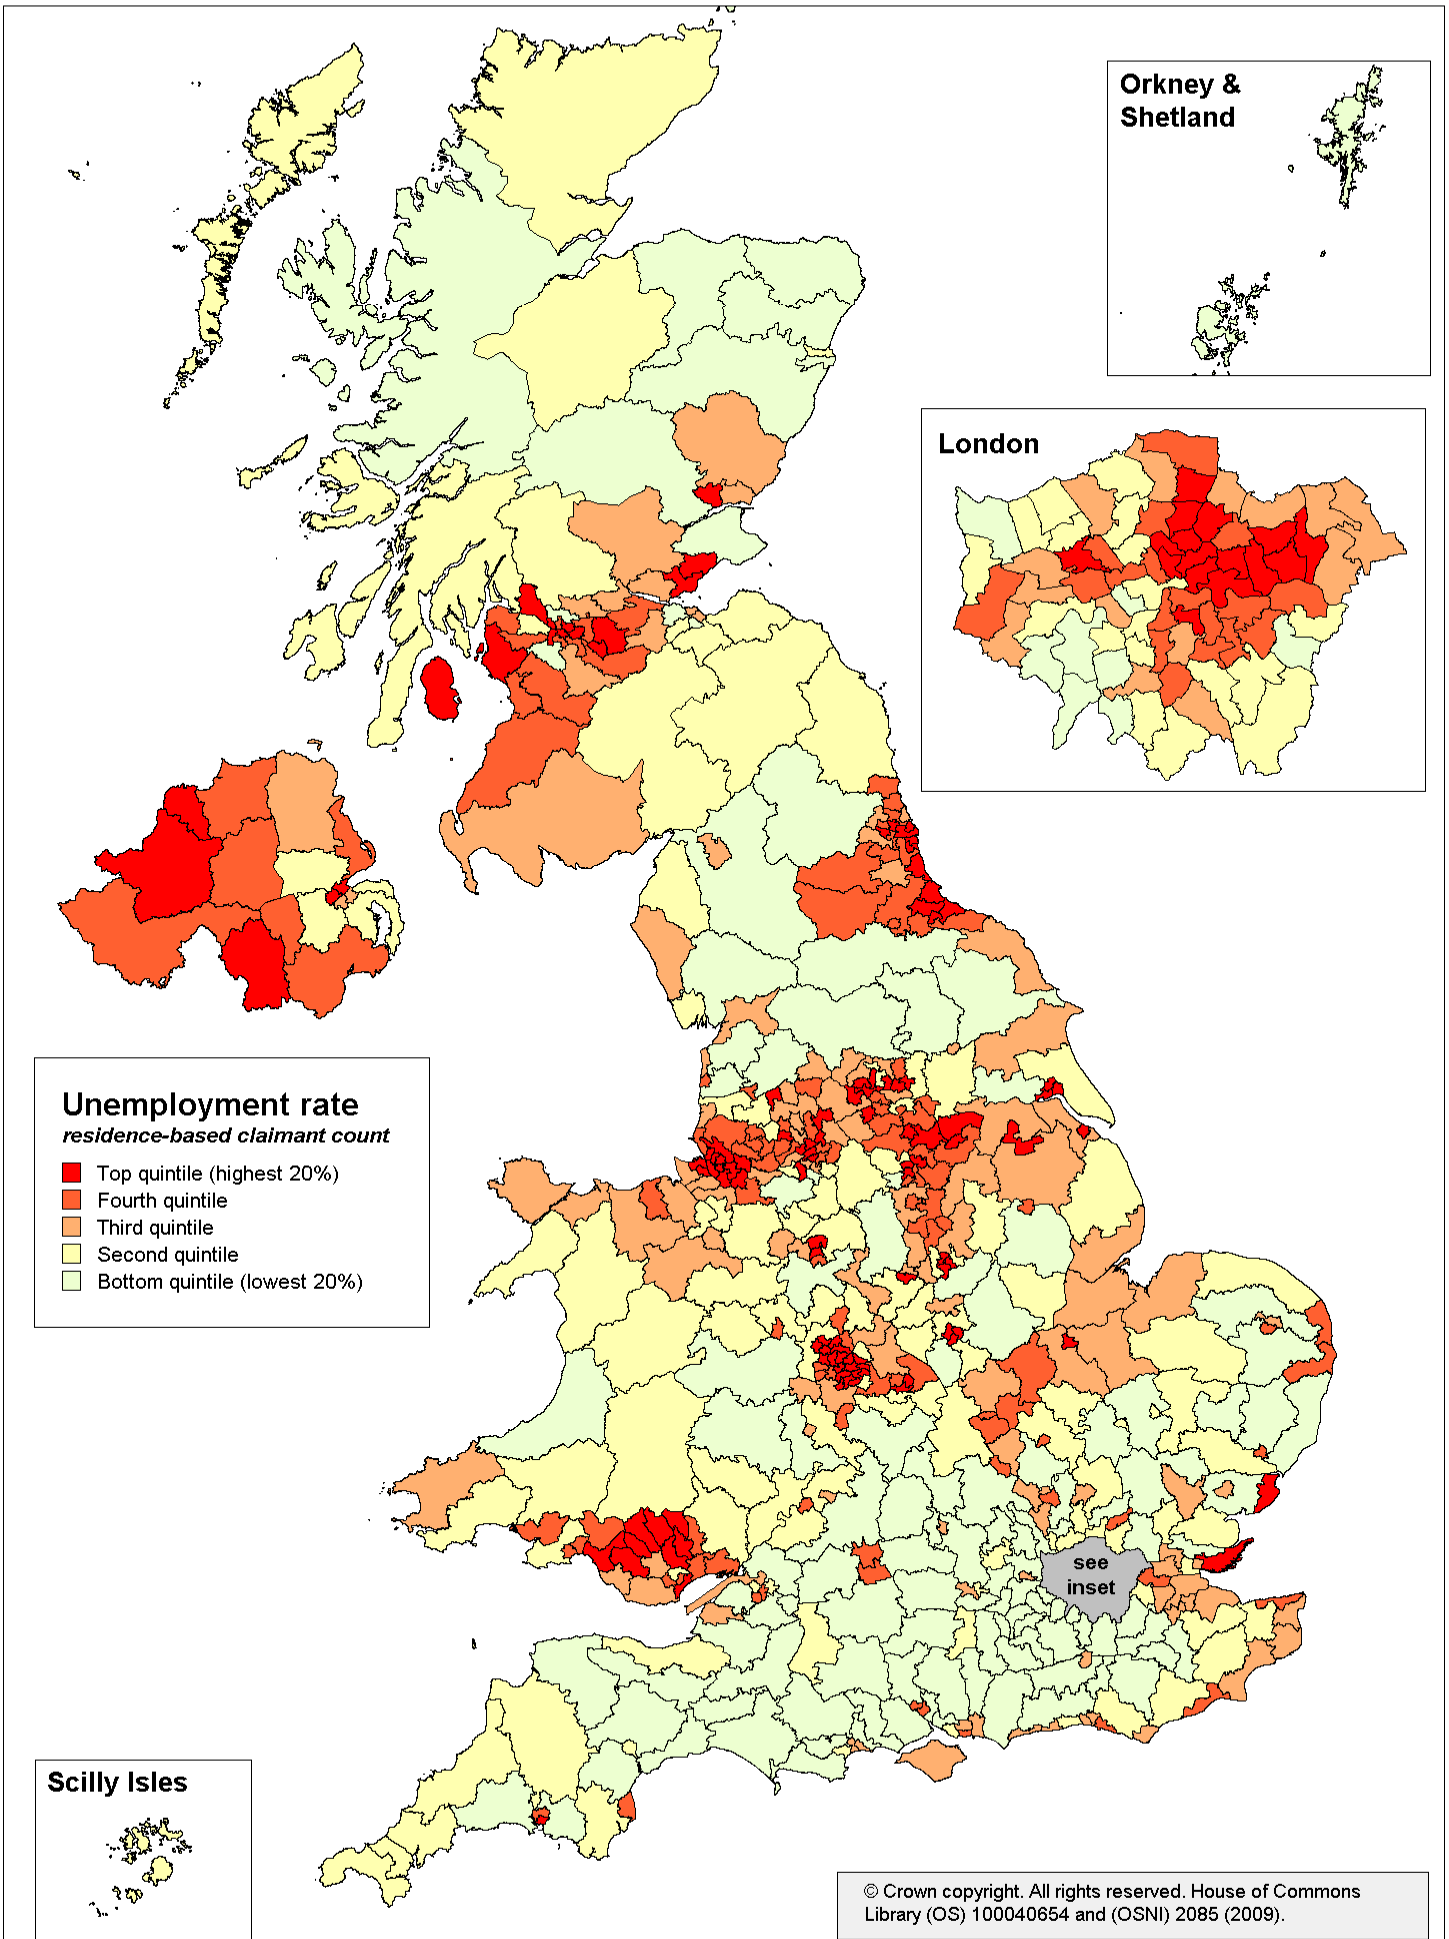

Explanatory notes	56
--------------------------	-----------

Unemployment by Constituency, June 2009

Constituencies in United Kingdom

residence-based claimant count rate, expressed as quintile groups (20% bands)

Unemployment by Constituency, June 2009

Selected major conurbations and surrounding areas- not to scale

residence-based claimant count rate, expressed as quintile groups (20% bands)

Greater London

Edinburgh and Glasgow

Unemployment rate

residence-based claimant count

- Top quintile (highest 20%)
- Fourth quintile
- Third quintile
- Second quintile
- Bottom quintile (lowest 20%)

Greater Manchester

West Midlands

Unemployment by Constituency, June 2009

Selected major conurbations and surrounding areas- not to scale

residence-based claimant count rate, expressed as quintile groups (20% bands)

Tyne and Wear

South Yorkshire

Unemployment rate

residence-based claimant count

- Top quintile (highest 20%)
- Fourth quintile
- Third quintile
- Second quintile
- Bottom quintile (lowest 20%)

West Yorkshire

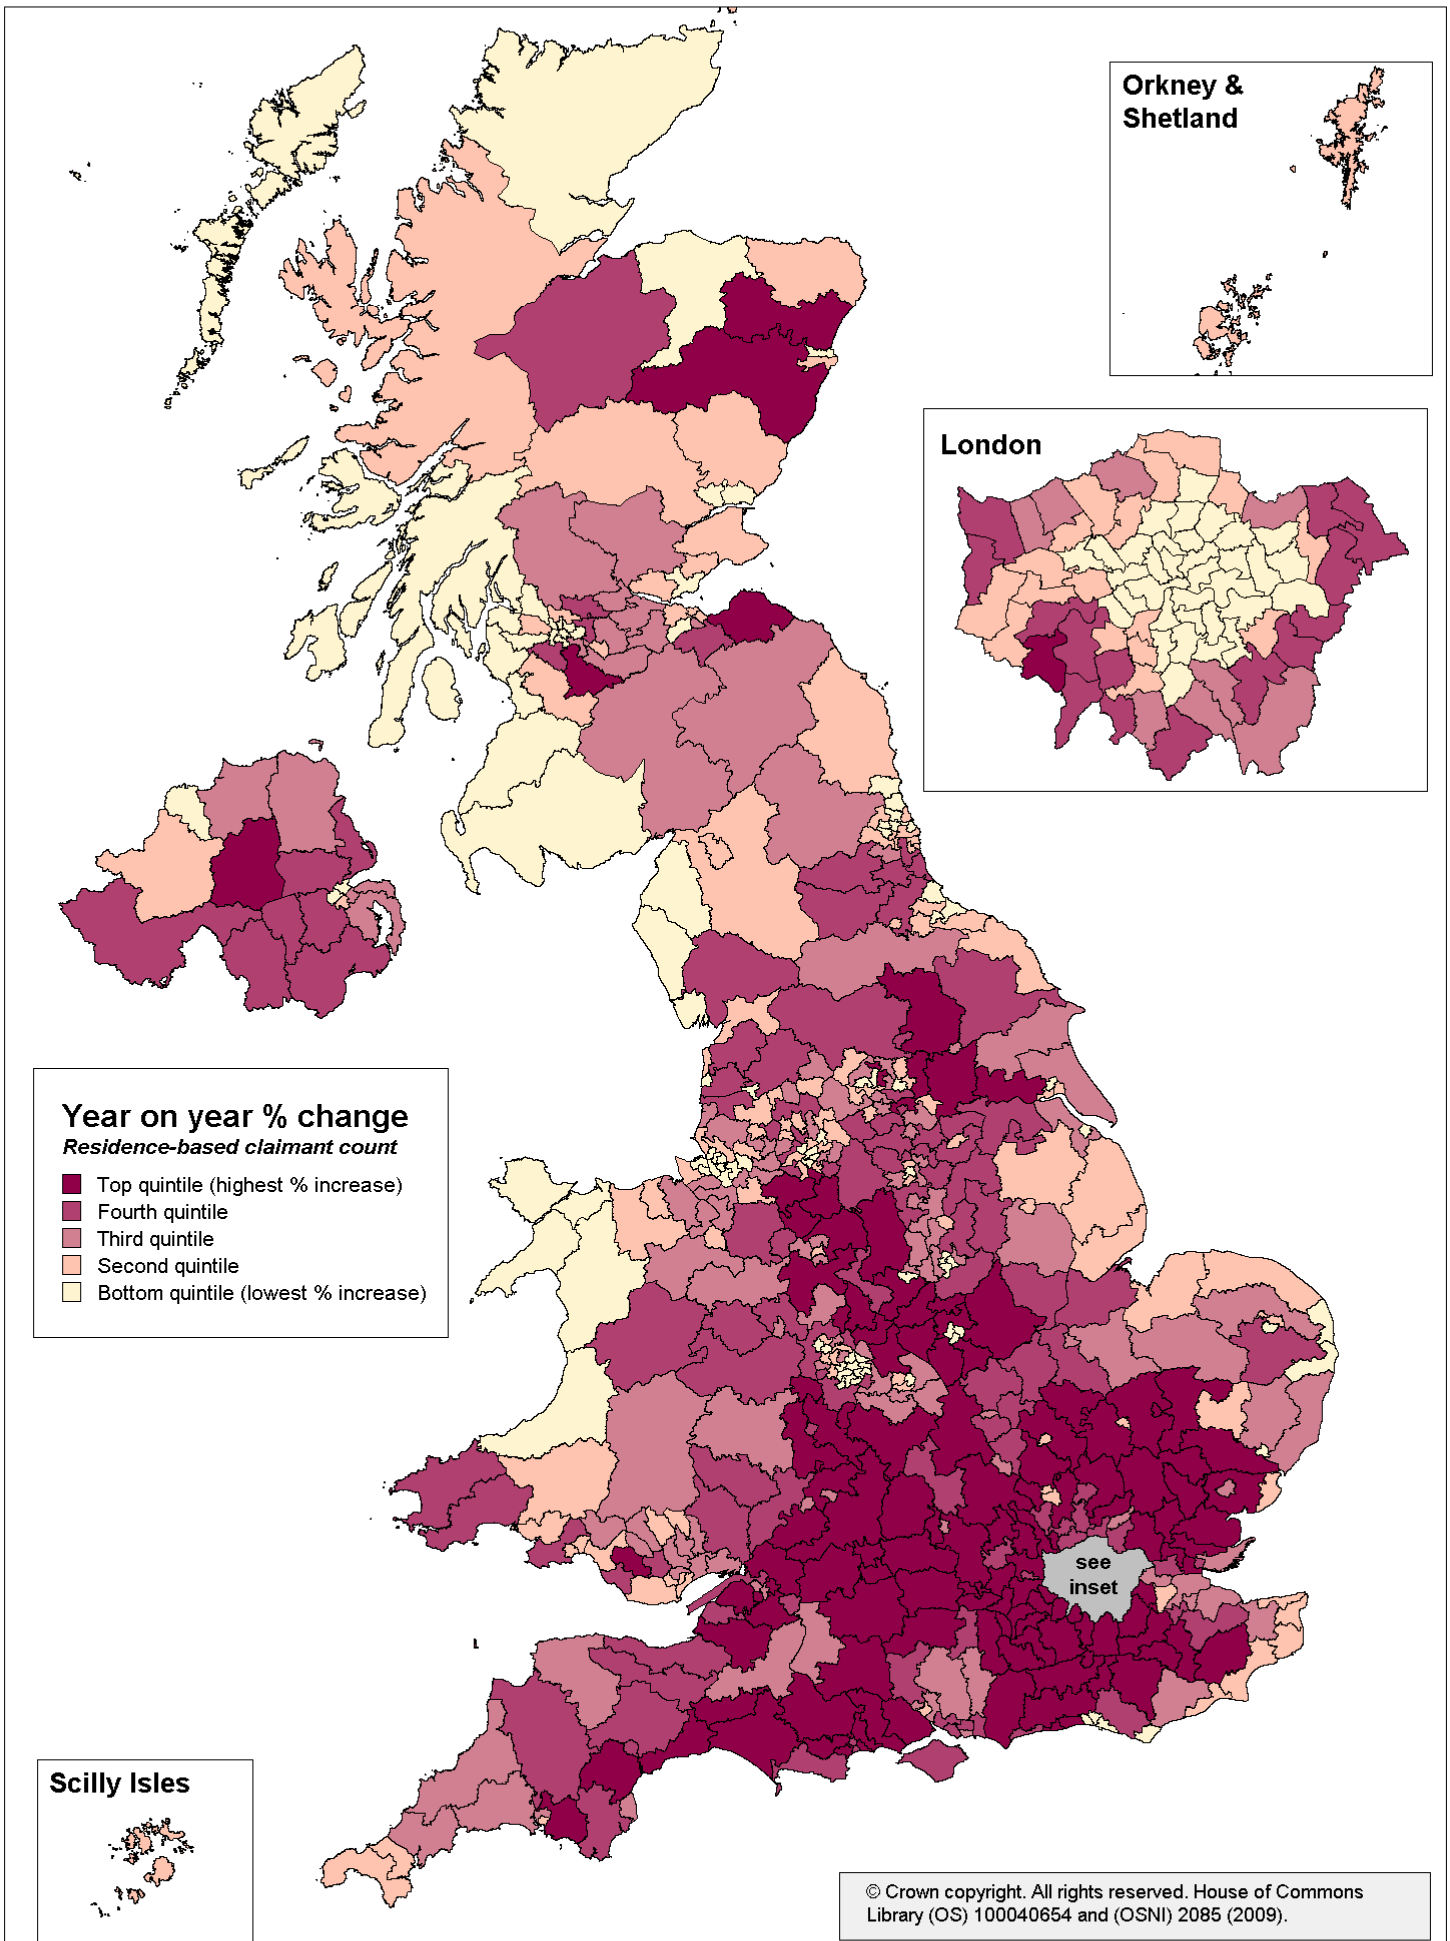

Merseyside

Percentage change in Unemployment by Constituency

Constituencies in United Kingdom, June 2008 to June 2009

Percentage increase in residence-based claimant count, expressed as quintile groups (20% bands)

Explanatory notes

The following notes should be borne in mind when drawing conclusions from these maps:

Claimant count rate by constituency, June 2009 (pages 52-54)

- The maps on pages 52-54 show residence-based claimant count rates for June 2009 for constituencies in the United Kingdom, with an expanded view of constituencies in selected major conurbations and surrounding areas.
- The 646 constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 129 constituencies (20% of the total in the United Kingdom).
- These groups have been colour-coded, from red – the 20% of constituencies with the highest unemployment rates – through to yellow/light green – the 20% with the lowest unemployment rates.
- It is important to note that the range of unemployment rates covered by each band is different. For example, in June 2009 the top quintile (coloured red) is made up of constituencies with unemployment rates ranging from 7.7% to 22.8%, while the bottom quintile (coloured yellow/light green) is made up of constituencies with unemployment rates ranging from 1.3% to 3.5% (all rounded).
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.

Percentage change in claimant count levels, June 2008 to June 2009 (page 55)

- The map on page 55 shows the percentage change in residence-based claimant count levels between June 2008 and June 2009 for constituencies in the United Kingdom.
- The 646 constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 129 constituencies (20% of the total in the United Kingdom).
- These groups have been colour-coded, from reddish violet – the 20% of constituencies with the highest percentage increase in unemployment levels – through to pale yellow – the 20% with the lowest increase in unemployment levels.
- It is important to note that the range of percentage changes covered by each band is different. For example, in June 2009 the top quintile (coloured reddish violet) is made up of constituencies with changes in claimant count levels ranging from +133.6% to +245.5%, while the bottom quintile (coloured pale yellow) is made up of constituencies with changes in claimant count levels ranging from +22.6% to +65.6% (all rounded).
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their percentage changes in claimant count levels may only differ slightly from those in another, neighbouring quintile group.
- This map is based on the percentage change in the absolute level of claimants by constituency. Constituencies with relatively low absolute numbers of claimants may appear in this map in the higher quintiles and vice versa; for example, the constituency with the highest percentage rise in claimants (245.5%, 299 claimants to 1,033 claimants), is also one of the constituencies with the lowest unemployment rates (2.3% in June 2009); the constituency with the highest unemployment rate (22.8%) has the lowest percentage change (22.6%, 6,835 claimants to 8,380 claimants).
