

Parliamentary Trends: Statistics about Parliament

RESEARCH PAPER 09/69 12 August 2009

This paper provides a summary of statistics about Parliament. It brings together figures about both the House of Commons and Lords; their membership and activities.

The aim is to provide comparisons over time, though periods may vary according to relevance and the availability of consistent data. Some are for parliamentary sessions (a parliamentary session begins each year with the Queen's Speech) some by calendar year and some by financial year. This should be borne in mind when comparing different sets of information.

Key facts

- There are 646 Members of Parliament (MPs) currently elected to the House of Commons. This will increase to 650 at the next general election.
- Women account for one in five of all MPs, roughly four times higher than in the 1970s. The UK is 59th overall in the world in terms of female representation in Parliament.
- The state of the parties in the House of Commons in terms of seats won after the 2005 General Election was as follows: Labour 355, Conservatives 198, and Liberal Democrats 62. Plaid Cymru and the Scottish National Party had nine seats between them, and 22 seats were held by other parties.
- The current salary of an MP is £64,766 per annum. Additional salaries are available to Members who have extra roles, such as government minister and the Speaker.
- At the end of the 2007-08 Session, the House of Lords had 744 members. Of these, 144 were women. Despite the abolition of most hereditary peers from the Lords, the UK Parliament's upper chamber is still the largest in Europe. It is more than twice the size of its nearest rival in terms of number, the Senate in France.
- The state of the parties in the House of Lords at the end of the 2007-08 Session was as follows; 199 Conservatives, 214 Labour, 74 Liberal Democrat, 206 Cross-benchers and 40 were of another description.

Introduction

Statistics and data about the workings of Parliament, its Members and its staff have existed for a long time. These are usually found in the form of sessional reports (such as the *House of Commons Sessional Returns*), or for financial matters, in documents such as the *Resource Accounts*. Outside Parliament, scholarly work has also been conducted, mainly focusing on electoral matters but also in some cases providing statistics on other topics such as revolts, committees and ministries.

Parliamentary Trends is designed to bring together existing statistical information about different aspects of Parliament into a single document. The data used to produce this paper comes from existing parliamentary publications and external sources.

This paper is divided into a number of sections, which look at the statistical trends for different aspects of Parliament. The main sections are the work of Parliament, Members of Parliament (including Lords), committees, the cost of Parliament, communication with the public and some international comparisons.

As a first edition of a new paper, the authors welcome comments and suggestions about future issues. Contact details are on the inside front cover.

1 The work of Parliament

1.1 Legislation

Number of Acts and Statutory Instruments

A primary role of any legislature is to scrutinise and pass legislation. In the United Kingdom there are two main forms of legislation: primary and delegated (secondary) legislation. Primary legislation (called Acts of Parliament, or statutes) is generally debated by both Houses of Parliament and is often (though not necessarily) long and complex. Sometimes, however, it is necessary to change the law quickly or regularly, for example to change the amount of the state pension to take account of inflation,¹ or to make detailed regulations. An Act may give a government minister the power to pass delegated legislation to make changes like these without passing another piece of primary legislation. The most common form of delegated legislation (sometimes also called 'subordinate legislation' or 'secondary legislation') is the Statutory Instrument. The parliamentary procedure for Statutory Instruments varies, but is usually much quicker than the procedure for passing an Act.

While the number of Acts passed per calendar year has if anything been declining over the last 30 to 40 years, the number of Statutory Instruments (many of which are not considered by or laid before Parliament) has been increasing and the number of pages of legislation for both categories has been higher in recent years compared with 30 or 40 years ago. There may be several reasons for the growth in the number of Statutory Instruments. Certainly, since Britain joined the then Common Market, the amount of legislation originating in Europe has increased as European Union law is often introduced as secondary legislation.² For more information on delegated legislation, see the Parliament website's information page.³

The following charts show the number of Public Acts which have received Royal Assent and Statutory Instruments which have been made by UK Government departments, the National Assembly for Wales (since 1999) and registered by the Statutory Instruments Registrar. For consistency it also includes Scottish Statutory Instruments made by the Scottish Administration since 1999 and registered by the Scottish Statutory Instruments Registrar.

¹ A recent example of this particular type of Statutory Instrument is [The Social Security Benefits Up-rating Order 2008](#)

² For information about the relationship between EU and national legislation, see the Library Standard Note [EU legislation](#)

³ <http://www.parliament.uk/about/how/laws/delegated.cfm>

Acts Passed 1950 to 2008

The number of Acts passed has declined somewhat over the last 30-40 years, while the number of Statutory Instruments has seen a sharp increase, from around 2,000 a year in the first half of the 1980s to around double that now.

Statutory Instruments Registered 1950-2008

Data underpinning these charts are in the table overleaf.

Pages of legislation

An alternative measure of the volume of legislation passed by Parliament is the number of pages of legislation. The following chart shows the number of pages of Acts and Statutory Instruments in the published Stationery Office volumes for selected calendar years.

Pages of Acts and Statutory Instruments 1950 - 2006 (selected years)

While the number of Acts has been declining over the last four decades, the length of each Act has tended to increase to the extent that the overall number of pages of Acts passed remains relatively high. Statutory Instruments have grown in number and in terms of the total number of pages.

The data underpinning the chart are in the following table.

Table 2: Pages of Acts and Statutory Instruments, 1911 to 2006

Session	Public and General Acts	Statutory Instruments	Total
1911	430	330	760
1921	220	1,080	1,300
1931	280	1,050	1,330
1940	370	1,970	2,340
1950	720	2,970	3,690
1955	540	2,340	2,880
1960	850	3,020	3,870
1965	1,340	4,730	6,070
1970	1,110	4,880	5,990
1975	2,060	6,210	8,270
1980	2,110	5,440	7,550
1985	2,380	4,760	7,140
1990	2,390	6,550	8,940
1991	2,250	7,630	9,880
1992	2,700	8,960	11,660
1993	2,640	7,940	10,580
1994	2,340	10,140	12,480
1995	3,000	9,690	12,690
1996	3,150	10,230	13,380
1997	2,060	8,660	10,720
1998	2,490	7,480	9,970
1999	2,096	10,760	12,856
2000	3,865	8,770	12,635
2001	1,605	10,830	12,435
2002	2,868	9,070	11,938
2003	4,073	9,334	13,407
2004	3,470	9,552	13,022
2005	2,712	12,874	15,586
2006	4,609	11,422	16,031

Notes: The figures for Statutory Instruments relate to the Number of pages in the Office of Public Sector Information (OPSI) bound set, excluding some local and unpublished Instruments and, more recently, those of the National Assembly for Wales. The figures do not include Northern Ireland (Stormont) Acts or Statutory Rules. Pre-1987 instruments are adjusted to equate to current page sizes.

Sessional Data 1997-98 to 2007-08

Bills & Acts

Bills fall into two main types: Government Bills and Private Members' (back-bench) Bills. Almost all Government Bills are debated and subsequently become law (having passed through both the House of Commons and Lords); generally these receive Royal Assent in the same Session in which they are introduced, but in some cases Bills are carried over to the next Session. Bills not receiving Royal Assent or carried over, including Government Bills, may be "lost" at the end of a Session. Many Private Members' Bills are simply introduced, and are not discussed at all. Of those that are allocated time for debate, relatively few are passed. In the 2006-07 Session, for example, there were 34 Government Bills; 30 of these became law, one⁴ was unsuccessful and three were carried over to the next Session. Of the

⁴ *Fraud (Trials without a Jury) Bill*, Bill 6 of 2006-07

94 Private Members' Bills that either started in the House of Commons or were brought to the Commons from the House of Lords, three became law.

Private Bills are a separate category of legislation which confer upon individuals or corporate bodies powers in excess of the general law.⁵ Private Bills do not have to be passed in the same Parliamentary Session they are introduced. The number of Private Bills introduced (including suspended and revived) into the House of Commons or brought from the House of Lords, and the number becoming law, is as follows:

⁵ Current Private Bills are listed on [Parliament's website](#)

Table 4: Private Bills, 1997-98 to 2007-08

Session	Private Bills introduced ^a	Private Bills receiving Royal Assent
1997-98	17	9
1998-99	9	4

Delegated legislation – Statutory Instruments

The form of parliamentary involvement in delegated legislation, most of which is carried out using Statutory Instruments (SIs), is determined by the terms of the ‘parent’ Act of Parliament under which Ministers are exercising their powers. A substantial proportion of delegated legislation (for example, local instruments which have only to be published to become law) receives no parliamentary scrutiny. Many SIs are laid before Parliament and all of these are subject to the scrutiny of the Joint Committee on Statutory Instruments to determine whether they are within the powers given to Ministers under the parent Act and whether they are properly drafted. Most SIs are, in practice, not subsequently debated and, of those that are, the majority are discussed not on the floor of the House of Commons but in a Standing Committee⁶, after which they are reported to the House and voted on without any further debate.

⁶ Generally the Delegated Legislation Standing Committee, but can be the Scottish or NI Grand Committee

Table 5: Statutory Instruments laid by Session, 1997-98 to 2007-08

Session	Laid before House	Considered in House	Considered in Committee

1.2 Members' Parliamentary Activities

Debates

Divisions

A division is a vote by Members of the House of Commons or the House of Lords. Figures for the number of divisions in the Commons per session since 1945 show that the Commons divided relatively often during the 1945-51 Government led by Clement Attlee. The 1948 Session was extremely short, as it was a special "short session" introduced by the Government, in view of the Lords' obstruction of the Bill in the previous Session (1947-48).⁷ The number of divisions declined slightly in the 1950s and the first half of the 1960s. After Harold Wilson's second General Election victory in 1966, the number of divisions increased markedly and that level was maintained until the 1992 General Election. Since 1992 there has been a slight decrease in the number of divisions. The parliaments of 1987 (which lasted 5 years), 1975 (4 years) and 1945 (5 years) are the top three in terms of total divisions held.

Source: *Sessional Information Digest, Hansard*

An analysis of the number of divisions per sitting day in the House of Commons shows that the frequency of divisions has tended to increase since the Second World War, but that this trend may have been reversed in the last few years.

The data on which these charts are based is shown in the table overleaf:

Table 6: Number of divisions by Session, 1945-46 to 2007-08

Session	Number of divisions	Session	Number of divisions
1945-46	294	1976-77	234

Parliamentary Questions

Numbers answered by Session

MPs can ask questions to Government Ministers by “tabling” Parliamentary questions (PQs). These may be asked for oral or written reply. The number of oral PQs is stable, since the time set aside for answering of oral PQs has not significantly changed. The number of written questions has increased.

The number of written PQs per sitting day in the 2007-08 Session at 445 was the second highest of the previous ten sessions. Short sessions are indicated with an asterisk – these are sessions where Parliament was dissolved and a General Election was held. Short sessions are usually followed by long sessions, running from May or June of the General Election year through to the October or November of the following year. Statistics are derived from the Parliamentary Information Management Service (PIMS) and the Sessional Returns published by the House:

Table 7: House of Commons Parliamentary Questions, 1990-91 to 2007-08

Session	Oral	Written	Urgent	Private Notice
1990-91	2,348	32,843
1991-92*	1,156	16,050

Oral - total number of Oral questions reached for answer

Written - total for written answer on named day or for ordinary written answer

Source: House of Commons *Sessional Returns*

Departments in the public eye tend to be asked a relatively high number of PQs. The Government departments which answered the most written questions in the 2007-08 Session are listed below. The Department of Health has answered the highest number of written PQs in five out of the last seven sessions, often by a significant margin. The Home Office also regularly appears to have a high WPQ 'load'.

Table 9: Written parliamentary questions answered by department, 2007-08

Department	WPQs
Health	8,936
Home Office	6,389
Communities and Local Government	5,498
Treasury	5,059
Defence	4,663

Numbers by Financial Year

The House of Commons Commission also publishes information on the number of questions by Financial Year. The report for 2005/06 noted "the first year of this new Parliament saw an unprecedented increase in the number of questions tabled for written answer." The report shows that the average number of questions dealt with the by Table Office per day had increased from 460 in financial year 2001/02, to 596 in 2005/06. The numbers do not

correspond exactly with the number of questions tabled, as some questions dealt with do not go on to be formally 'tabled'. The proportion of questions which were e-tabled increased from 15 per cent in 2003/04 to 30 per cent in 2005/06.⁸ A further increase to 38 per cent took place in 2007/08

Table 10: Written Parliamentary questions tabled by Financial Year, 2001/02 to 2007/08

Questions, answers and motions	Financial year						
	2001/02	2002/03	2003/04	2004/05	2005/06	2006/07	2007/08

Source: House of Commons Commission, *Annual report*

In June 2007 the 2006/07 Annual Report of the House of Commons Commission noted as follows:

76. After the unprecedented rise in the numbers of parliamentary questions and EDMs [Early Day motions] reported in last year's report (see paragraphs 76 and 77), both remained at historically high levels in 2006/07. More than 74,600 written and 6,340 oral questions were tabled. This represented a marked increase, of 20 per cent, of the number of written questions tabled compared to the previous financial year, which was partially offset by a reduction in the number of questions tabled for oral answer...⁹

The 2006/07 level of PQs was maintained in the 2007/08 Financial Year.

Early Day Motions and petitions

Early Day Motions, or EDMs, are motions put before Parliament for debate at an 'early day'. In practice, the early day rarely comes, so EDMs are not usually debated.

While many EDMs are not debated, they are seen as a way of publicly registering an opinion by Members. As the chart below shows, the number of EDMs has grown over the years.¹⁰

⁸ Annex 1 Data Table Providing Advice and Services to the House and its Committees Commission Annual Report 2005-6

1.3 Sittings

Hours/days

House of Commons Chamber

The chart below shows the average length of sitting in the House of Commons Chamber per parliamentary session from 1979-80 to 2007-08. In 1992 the *Jopling Report* recommended changes to sitting hours to reduce the number of late sittings, among other things,¹¹ and the House began experimenting with new arrangements from the 1994-95 Session onwards.

As the chart shows, the effect that the reforms had on sitting hours was to increase the average length of sittings. It was not until the recommendations of the Modernisation Committee were put into practice from 1998 onwards that the hours that the Commons sat each day began to decline.¹²

The following table shows the data used to create the chart, together with the number of sitting days per parliamentary session since 1944-45:

¹¹ The Select Committee on Sittings of the House (Jopling Committee), *Report*, 18 February 1992, HC 20 1991/92

¹² Modernisation Committee, *The Parliamentary Calendar: Initial Proposals*, 7 December 1998, HC 60 1998-99. For further information on sitting hours, see House of Commons Research Paper 02/41, *Modernisation of the House of Commons: Sitting hours* and Standard Note SNPC 2854, *Modernisation: Sitting Hours*

Table 12: Number of sitting days per Session, 1944-45 to 2007-08

Session	Number of Sitting Days	Session	Number of Sitting Days	Average length of sitting (hrs:mins)
1944-45	95

Notes: Swearing-in days at the beginning of each Parliament are included in the figures for the Session concerned

¹Session lasted 10 days in September 1948

²Session lasted from March to October 1950

³Session lasted from March to July 1974

Source: *Sessional Returns and House of Commons Factsheet M7 Parliamentary Elections, Factsheet P4 Sittings of the House*

Shorter sessions in the table are due in the main to the calling of a general election in that session (for instance in 1992, 1997 and 2001). The extremely short session in 1948 is due to it being created especially to deal with the second passage of the Parliament Bill through both Houses.¹³ In general, a short session is usually followed by a relatively long session.

¹³ [House of Commons Library Standard note SN/PC/675, *The Parliament Acts*](#)

In non-election years and excluding the extremely short Session of 1948, Parliament has sat on average for 209 days per session since 1944-45. Since the 1997-98 sitting day figure of 241, there hasn't been a session which has exceeded the average figure. The highest number of sitting days in a session since 1944-45 is the 246 days for which Parliament sat in 1966-67

Westminster Hall

There has always been more demand for time for debates in the Chamber of the House of Commons than could be satisfied. Members want time to debate issues of importance to their constituents, and they want time to propose their own pieces of legislation (Private Members' Bills) as well as contributing to debates on the Government's legislation. To fulfil some of this demand, the Modernisation Committee proposed in September 1998 that a room in Westminster Hall could be used for extra debates.¹⁴ Four and a half hours are available for adjournment debates initiated by back benchers on Tuesday and Wednesday and three hours are available on Thursdays for debates on Select Committee reports or on a subject chosen by the Government. In November 1999 the first debates were held.

The following table shows the total sitting time in Westminster Hall in each Session since sittings there began in 1999:

Table 13: Sittings in Westminster Hall, 1999-2000 to 2007-08

Session	Total sitting time (hours and minutes)
1999-00	352.40
2000-01 (a)	185.49
2001-02 (b)	474.38
2002-03	431.06
2003-04	411.16
2004-05 (a)	154.16
2005-06 (b)	530.11

¹⁴ Modernisation of the House of Commons Committee, *Parliamentary Calendar: Initial Proposals*, HC 60 1998-99

Time devoted to different types of business

The following charts show the amount of time dedicated each Session to different stages of Government Bills:

The exceptional amount of time spent on Government Bills in the Committee of the Whole House stage in 1992-93 and 1997-98 was due to the number of important Constitutional Bills going through Parliament in those sessions. In 1992-93 the European Communities (Amendment) Bill spent 23 days in Committee of the Whole House in the Commons. In 1997-98, The *Northern Ireland Bill* spent 4 days in Committee of the Whole House; the *Human Rights Bill*, 5; the *Scotland Bill*, 8 and the *Government of Wales Bill*, 7.

There has been a slight tendency for the amount of time spent on the Report stage to decline.

The amount of time spent debating Lords amendments in the House of Commons has increased since 1997, particularly in the last Session of each Parliament. It may be interesting to compare this chart with the chart on the number of Government defeats in the House of Lords, below, which also shows an increase since 1997.

The data for these charts are in the following table:

Table 14: Distribution of time spent on Government bills (hours)

Session	Second Reading	Committee of the Whole House	Report Stage	Third Reading	Lords Amendments
1974-75	213.00	121.00	248.00	26.00	74.00

1.4 Petitions

The right to petition the Monarch for redress of personal grievances has probably been exercised since Saxon times. It was recognised in the *Magna Carta*, and the *Bill of Rights* of 1688 restated the right clearly, "... it is the right of the subjects to petition the King, and all commitments and prosecutions for such petitioning are illegal". Petitions are not as popular as they were in the 19th Century, and in the short session of 2000-01 only 36 were presented to Parliament. Nevertheless, they have seen something of a revival in the last few years, as the following table shows:

Table 15: Petitions presented to Parliament at various dates since 1785

Gender

In 1987 there were 41 women MPs, 6% of all MPs. The number of women MPs rose over the next two parliaments to 120 in 1997 (122 following the election of two women at by-elections). That number fell to 118 after the 2001 Election but rose to 128 after the 2005 General Election. Women were now 1 in 5 of all MPs, the highest ever number and proportion.

The increase in women Members is shown by the following chart:

Women MPs, 1918-2005

Between the 2005 Election and September 2008, three women MPs were replaced by men at by-elections. That left the parties' female representation as follows:

	Lab	Con	LibDem	Other	Lab	Con	LibDem	Other
September 2008	96	17	9	3	27%	9%	14%	8%

Occupation and education

Around one-third of MPs went to fee-paying schools. This proportion varies by party – from 18% of Labour MPs to 60% of Conservative and 39% of Liberal Democrat. By comparison, 8% of pupils aged 11 and over in UK schools are in non-maintained (fee-paying) schools.¹⁶ Around three-quarters of MPs elected in 2005 were graduates. One-quarter were from Oxford or Cambridge universities.

Source: Butler et al, *The British General Election of 2005* and earlier editions

The proportion with professional backgrounds has remained fairly constant at around 40%. However, within this category the proportion of former barristers has fallen while the proportion of former solicitors and teachers from universities/colleges has risen. 2005 also saw a rise in the proportion of MPs with a business background (largely as result of an increase in the number in this category from the Conservative side); and growth in the "Miscellaneous" group (largely due to an increase in the number of in the "politician/political organiser" category).

A breakdown of MPs' occupations by party for those elected in 2005 is given in Table 22:

Table 22: Occupation of MPs elected at the 2005 General Election

Age

The average age of MPs at election decreased at the 1997 General Election, largely as result of the election of 10 MPs aged under 30 and a reduction in the number of MPs aged 60 or more. Since 1997, the average age of MPs elected has risen, from 49 years in 1997 to 51 years in 2005. In 2005 56% (363) of those elected were aged over 50, compared with 47% (309) in 1992, and 46% (303) in 1997. The 14 MPs aged over 70 elected in 2005 was higher than at any previous election since 1979, when it had also been 14.

The following table shows the ages of Members at the start of the current and previous Parliaments.

Table 23: Age of MPs elected at General Elections since 1979

Election year	Average Age at election	Age at election (years)						Total
		18-29	30-39	40-49	50-59	60-69	70+	
1979	49.6	6	120	205	203	87	14	635

Ethnicity

The history of non-white MPs goes a long way back, probably beginning with David Ochterlony Dyce Sombre, who was of mixed European and Indian descent. He was elected to represent the seat of Sudbury in Suffolk in 1841. A number of minority ethnic MPs were elected at the end of the 19th and beginning of the 20th Centuries, but the second half of the 20th Century saw a reduction in representation of ethnic minorities, all the more notable since this was when significant numbers of minority ethnic immigrants arrived in the UK. The first minority ethnic MPs since 1945 were elected in 1987: Diane Abbott (Hackney North & Stoke Newington), Paul Boateng (Brent South), Bernie Grant (Tottenham) and Keith Vaz (Leicester East). Diane Abbott was the first black woman MP.¹⁷

Analysis of ethnic minority representation is difficult, because ethnicity is both sensitive and difficult to define. Work such as this generally relies on self-definition. At present there are 15 non-white MPs elected to the House of Commons,¹⁸ which is 2.3% of the 646 MPs from all

¹⁷ For more information on ethnic minorities in politics, see Standard Note SN/SG/1156, [Ethnic Minorities in Politics, Government and Public Life](#), November 2008

¹⁸ Based on the list provided by [Operation Black Vote](#)

parties. If the non-white population were represented proportionally in the House of Commons, there would be 51 MPs.¹⁹

Women from ethnic minorities are particularly under-represented. At present there are only two black women Members, and no Asian woman has ever been elected.

Honours

The following chart clearly shows how the change in Government in 1997 was associated with a decline in the number of knighthoods (includes women MPs being made Dames) conferred on Members of Parliament:

¹⁹ Based on the current estimated UK population of 60.6 million of whom 7.9% are non-white, according to the 2001 census: <http://www.ons.gov.uk/census/index.html> . More recent estimates of the non-white population can be higher, and estimates for a representative number of minority ethnic MPs may vary: the report for the Government Equalities Office *How to achieve better BME political representation*, published in May 2008, put the figure at 58.

Discipline

Until the 1980s suspension from the House of Commons was a rare event. The year with the most suspensions, 1987-88, brought calls for stiffer penalties for those Members who were 'named' or suspended. Conservative Members thought that their Labour colleagues were becoming frustrated by their long period in opposition. Commentators said that the upsurge in suspensions was a result not only of increased disorder, but also of Members' reluctance to resume their seat or subsequently to leave the Chamber voluntarily when asked by the Speaker. If the Member does not take advantage of these opportunities to comply voluntarily, formal suspension follows. The length of suspension was normally 5 days for a first offence, 20 days for a second offence and a period to be determined by Parliament for further offences. The Member is not paid during the period of suspension.²⁰

Data on suspensions are in the following table:

²⁰ For further information, see the Fact Sheet G06, *Disciplinary and Penal Powers of the House*, 2003

Table 26: Number of suspensions by Session, 1949-50 to 2008-09

Turnover of MPs

The turnover of Members in the House of Commons is the movement of MPs in and out of Parliament. Below is a table showing the number of new Members who have entered Parliament. Note that 'new' Members include those former Members who were re-entering the House after a period of not being an MP, sometimes referred to as 'retreads'.

Table 27: Entrants and leavers at General Elections 1979 to 2005

Year	New Members	Defeated Members	Retiring members	Total Members	Turnover(%)
1979	128	65	61	635	20.2
1983	156	64	71	650	24.0
1987	130	40	86	650	20.0
1992	138	59	79	651	21.2
1997	259	132	116	659	39.3
2001	99	22	78	659	15.0
2005	123	50	86	646	19.0

Source: House of Commons Library, Members since 1979 database; *Times Guide to the House of Commons 1979*, Times Newspapers, 1979

Despite the Conservative victory in 1979, the turnover of MPs at this election was relatively modest. The turnover at the 1997 General Election was far higher, with 259 new MPs elected, almost 40% of total MPs, and 183 new Labour Members taking their seats. The following election in 2001 was relatively quiet in terms of turnover, while the 2005 election seems to have returned to the former trend.

Change in number of MPs by party

The following table outlines seat changes by party at General Elections from 1886 to 2005. Boundary changes for the 1918 General Election mean that the calculation of gains and losses is not applicable. Data for the 1945, 1950, 1955, February 1974, 1983 and 1997 elections are also affected by periodic boundary reviews.

Table 28: Change in number of MPs by party at General Elections, 1886 to 2005

Election	Conservative net change	Labour net change	Lib net change	Others net change
1886	44		-44	0
1892	-49		51	-2
1895	90		-89	-1
1900	3	2	-4	-1
1906	-211	25	185	1
1910 (J)	103	-4	-98	-1
1910 (D)	0	2	-4	2
1918	-	-	-	-
1922	-18	67	-39	-10
1923	-88	47	42	-1
1924	155	-42	-114	1
1929	-140	126	14	0
1931	217	-215	6	-8
1935	-84	94	-12	-2
1945	-187	199	-8	-4
1950	11	-8	2	-5
1951	22	-19	-3	0
1955	11	-10	0	-1
1959	23	-23	0	0
1964	-56	56	2	-2
1966	-51	48	2	1
1970	67	-60	-7	0
1974 (F)	-14	3	2	9
1974 (O)	-20	19	-2	3
1979	55	-40	-3	-12
1983	7	-5	-2	-2
1987	-17	21	-5	1
1992	-41	42	-2	1
1997	-178	146	28	4
2001	1	-6	6	-1
2005	33	-47	11	3

House of Commons Library Research Papers: *General Election Results 7 June 2001, General Election 2005*

Notes: 'Conservative net change' includes Liberal Unionists 1886-1910 (D); National, National Liberal and National Labour, 1931-45.

'Lib net change' includes both Liberal and National Liberals in 1922; Independent Liberals in 1931; SDP/Liberal Alliance 1983/87.

Figures adjusted for 1885, 1918, 1945, 1950, 1955, 1974(F), 1983, 1997 and 2005 due to boundary changes

The biggest single net increase and decrease came in 1931, when the Conservatives gained 217 seats while Labour lost 215. Despite the landslide victory for the Conservatives, a National Government was formed under the leadership of National Labour leader Ramsay MacDonald.

The 1997 General Election saw the biggest changeover of seats since 1945, with Labour gaining 146 seats and the Conservatives losing 178.

2.2 House of Lords

Numbers

The following table and chart show how the total number of Members of the House of Lords has changed since 1968-69.

Table 29: Total membership of the House of Lords by Session, 1968-69 to 2007-08

Session	Total Members
1968-69	1,064
1969-70	1,062
1970-71	1,078
1971-72	1,073
1972-73	1,080
1973-74	1,079
1974	1,108

2006-07	751
2007-08	744

Source: House of Lords Sessional Statistics

From 1968-69 to 1998-99, the membership of the House of Lords increased by nearly 300. In the first two parliamentary sessions of Tony Blair’s premiership (1997-98 and 1998-99), membership of the House of Lords increased by 121, the sharpest increases in membership in the series.

The passage of the *House of Lords Act in 1999* removed the right of most hereditary peers to sit in the House, stating that “No-one shall be a member of the House of Lords by virtue of a hereditary peerage.”²¹ This piece of legislation saw the membership of the House of Lords almost halve, taking the total number of members from 1,325 to 693.

Since 2000-01, the first Session after the 1999 Act, the membership of the Lords has increased by 679 to 744 in 2007-08.

²¹ [House of Lords Act, 1999](#)

Party

Below are a table and chart which show the composition of the House of Lords by party.

Table 30: Peers by party and Session, 1991-92 to 2007-08

Session	Conservative	Labour	Lib Dem	Cross Bench	Other	Total
1991-92	451	115	56	256	105	983
1992-93	481	116	58	278	107	1,040
1993-94	479	114	54	287	109	1,043
1994-95	476	109	52	289	111	1,037
1995-96	459	111	56	319	116	1,061
1996-97	477	116	57	322	95	1,067
1997-98	478	176	69	322	121	1,166
1998-99	484	193	72	355	106	1,210
1999-00	232	201	62	163	32	690

2007-08	199	214	74	206	40	733

Source: House of Lords Sessional Business Statistics

Note: These totals exclude peers without Writs of Summons or on leave of absence

Historically, Conservatives were the largest party in the House of Lords, having more than 450 peers up to 1998-99, over a hundred more than the number of Cross-bench peers.

The House of Lords Act 1999 left the number of Conservative, Cross-Bench and Labour peers much more equal. In 1999-00, the number of Conservative peers fell from 484 the previous session to 232, while similarly the number of cross-benchers fell from 355 to 163. By contrast, the number of Labour peers rose from 193 (1998-99) to 201 (1999-00).

Peerage type

Before the Labour Government reforms in 1999 there were over 1,000 members of the House of Lords (although in practice only a portion were “active”). The number of peers increased as the number of Life Peers grew. The 92 peerages created under the 1999 *House of Lords Act* are life peerages conferred on hereditary peers. Originally, the Bill was designed to abolish hereditary peers altogether, but an amendment moved by Lord Weatherill allowed 92 to remain Members of the House.²² When vacancies arise due to the death of a hereditary peer, by-elections determine who takes the seat.

Since 2000-01, there has been a marked increase in peerages created under the 1958 Life Peerages Act, from 533 to 603 in 2007-08. The abolition of most hereditary peers means that the majority of members of the Lords were given peerages under the 1958 Act. In 2007-08, the proportion of peers in the House made under the Act stood at 81%. The number of Law Lords created under the *Appellate Jurisdiction Act 1876* was increasing significantly, but has been falling since its peak number of 29 during 2003-04. Figures are in the table overleaf.

²² House of Lords Library Note, *The Weatherill Amendment*

Table 31: Peers by peerage type and Session, 1968-69 to 2007-08

Source: House of Lords Sessional Business Statistics
 Figures exclude minors, except for 1981-82 where figures were unavailable

Male dominance in the House of Lords has receded over time. In the 1981-82 session, 94.7 per cent of peers were male, the highest percentage recorded in the data. By contrast in

2007-08, 80.1 per cent of peers were male. The 2007-08 Session included 148 women peers, the highest number ever recorded.

There was a slight downward trend of male dominance in the Lords up to 1998. The biggest factor in the fall of men in the House came with the *House of Lords Act in 1999*. This excluded most hereditary peers and consequently reduced the number of male peers from 1204 to 583. Only 8 women peers left the House as a result of the legislation and the proportion of women peers rose from 9 per cent to 16 per cent.

Ethnicity

Information on ethnicity for the House of Lords is difficult to collate, and no definitive list of ethnic origins exists. In July 2000, The Earl of Listowel asked Her Majesty's Government for a breakdown of Lords membership by ethnicity. Baroness Jay replied as follows:

This information is not collected at present. In order to collect personal information such as this, the Information Office of the House of Lords would need the authority of a domestic sub-committee or the Offices Committee itself. It is for these committees whether they wish to consider the matter.²³

Nevertheless, the history of minority ethnic peers, like that of minority ethnic MPs, goes further back than might be expected. The first Indian peer, and probably the first non-white peer, was Sir Satyendra Sinha, created Baron Sinha of Raipur, a hereditary peerage, in 1919.²⁴ The first peer of African descent is widely reported to have been the Trinidadian cricketer and lawyer Learie Constantine, created Baron Constantine of Maraval and Nelson in 1969. At present there are some 32 non-white members of the current House of Lords.²⁵ This is around 4% of the total of 746 peers.

Peerage creations

In 1876 the *Appellate Jurisdiction Act* provided for the most senior judges to sit in the House of Lords, with the creation of a life peerage. In 1958, the *Life Peerages Act* made it possible for the Government to nominate people to sit in the House of Lords for regular business in that chamber. Since the passing of the *Life Peerages Act*, the number of hereditary peers as a proportion of the total created has declined, as shown in the chart below. Nevertheless, a few hereditary peerages have been created in recent years. The latest, during Tony Blair's tenure as Prime Minister, was the Earldom of Wessex, created for Prince Edward in June 1999. Every Prime Minister since 1958 has ennobled more members of his or her own party than members of opposition parties.²⁶

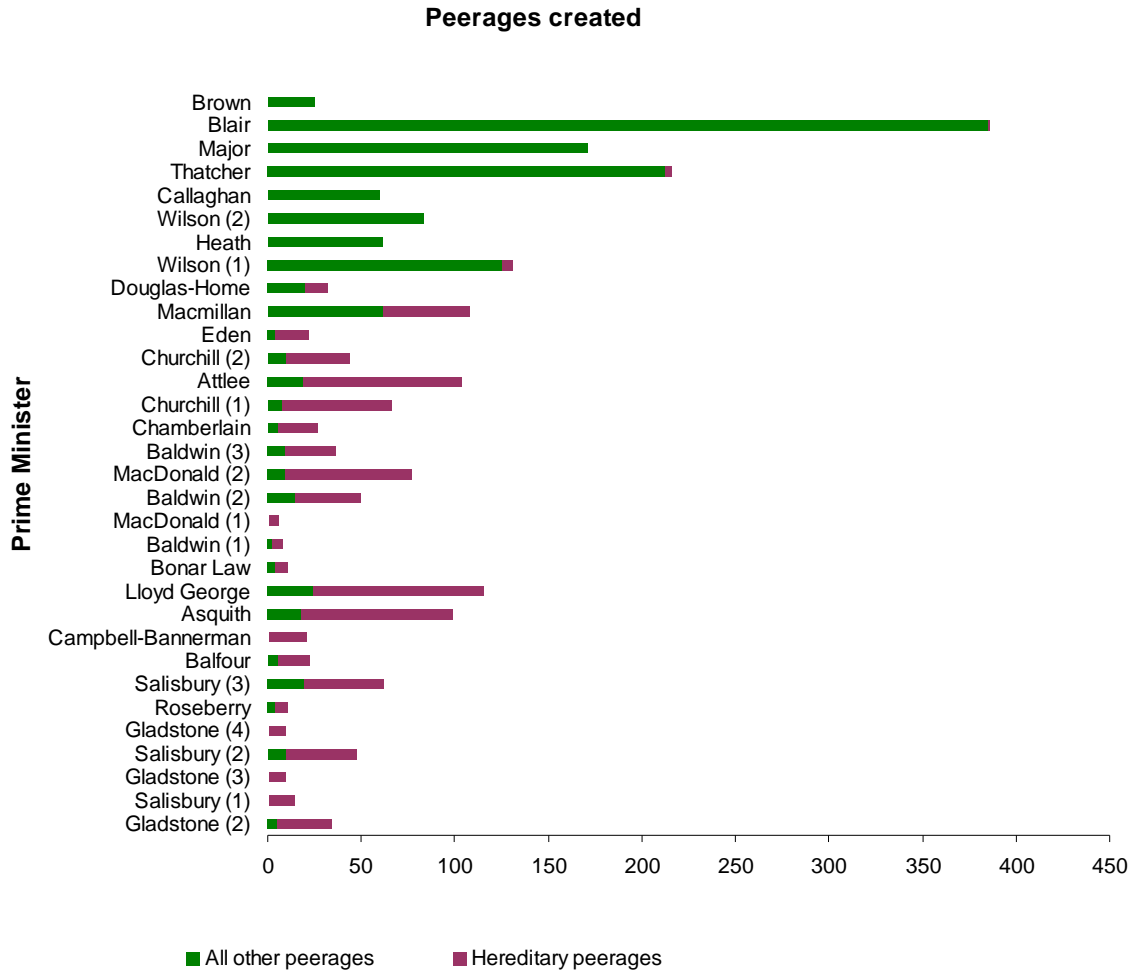

The chart below shows the number of hereditary peerages and the number of other peerages, including law lords under the *Appellate Jurisdiction Act 1876*, created during the duration of each Prime Minister's Government since Gladstone's second period in office, in 1880. Overall, the number of peerages created has increased, with the increase in the number of life peerages created under the 1958 Act exceeding the decline in hereditary peerages created. The chart also shows that Tony Blair created the most life peerages, having created 357 standard life peers, compared with Margaret Thatcher who created only 201 during a longer period in office.

Government defeats in the House of Lords

To become law, Bills must be approved by both the House of Commons and the House of Lords. No party has an absolute majority in the Lords and the atmosphere is less partisan. As a result the Government is more likely to be defeated in the House of Lords than in the House of Commons. The House of Lords has shown a marked increase in rebelliousness against the House of Commons and the Government of the day since 1997, although this has not reached the number of defeats seen in 1975-76.

Government defeats in the House of Lords, 1975-76 to 2007-08

The data on which the tables above are based are in the following table:

*A Government defeat is defined as a Division in which the tellers on the losing side were Government Whips.

Source: House of Commons Library Parliamentary Information List 3252

After the initial defeat, the House of Commons can reverse an amendment made by the Lords and return the Bill to the Lords. The House of Lords is not obliged to accept that its amendment has been reversed; it sometimes insists on its amendments. There then ensues what is referred to as parliamentary 'ping pong', as the Bill shuttles between the Commons and the Lords. The chart below shows the number of times the House of Lords has insisted on its original amendment, that is, how many times the Bill has returned to the Lords and been defeated again, after the initial defeat, since the 1974-79 Parliament.

Commentators have suggested that since the 1999 reforms, when most hereditary peers lost their right to sit in the House of Lords, the remaining peers feel that the Upper House has gained legitimacy and as a result have become increasingly assertive. Research by the

University of London Constitution Unit has shown that the Liberal Democrats have been the key party in bringing about the increase in Government defeats and more insistence on amendments. According to this research, almost one in four Lords amendments end up being accepted by the Government.²⁷

The data on the number of times the Lords have insisted on their amendments are in the following table:

Table 35: Number of instances per Parliament where the House of Lords has insisted on its amendments to a bill, 1974-2008

Parliament	Number of instances(a)			
	1	2	3	4
1974-79	2	1	1	0

Attendance

On the whole, daily attendance figures for the House of Lords have been rising since 1968-69. This is in spite of reduction in Members of the House following the *House of Lords Act 1999*.

The highest attendance came in 1998-99, when an average of 446 peers attended each sitting. This may have been due to the fact that the 1999 House of Lords Act was passed that Session - a piece of legislation which directly affected the Lords.

In the 2007-08 Session, average daily attendance stood at 413, almost two hundred members more than the average attendance in 1968-69 (235).

3 Committees

Members on Select Committees

Select Committees were created in 1979. Since then there has been an increase in the number of committees. The number of Members per committee has remained roughly constant. The following chart shows the number of MPs serving on Select Committees, including chairmen:

In the past the number of Select Committees has tended to increase. However recently, there has been a gradual fall in their number:

The data underpinning these charts is in the following table:

Table 37: Select Committee statistics by Session, 1979-80 to 2007-08

Session	Members serving on select committees	Number of select committees (a)	Average Members per committee
1979-80	277	29	9.6

4 Cost of Parliament

4.1 Spending

Since 2001/02, each House has published its own Resource Accounts.²⁸ For the Commons these are in two parts: the *House of Commons Administration Resource Accounts* and the *House of Commons Members' Resource Accounts*. Before 2001/02, brief accounts were given in the *House of Commons Annual Report*.

For the House of Lords, the *House of Lords Resource Accounts* contain financial information relating to Peers' expenses and general administration costs.

Table 38: Expenditure by both Houses of Parliament by Financial Year, 1990/91 to 2008/09

	£000		
	House of Commons Administration Expenditure	House of Commons Members' Expenditure	House of Lords Expenditure
1990/91	70,543	52,395

2007/08	227,885	159,310	121,500
2008/09	234,596	168,955	103,918

Notes: (a) 2005/06 figure includes a one-off adjustment of £116 million to take account of the adoption of the FRS17 accounting standard.

Sources: House of Commons Commission Annual Reports (to 1999/00)

House of Commons Resource Accounts; House of Lords Annual Reports

The House of Commons Administration's expenditure was £235 million in 2008/09. This covers spending on those employed directly by the House and the services they provide.

²⁸ [House of Commons Resource Accounts](#). [Resource Accounts for the House of Lords](#)

House of Commons Members' expenditure, which covers spending on MPs' salaries, Members' staff, expenses and allowances, totalled £169 million in 2008/09. In real terms, this figure has doubled since 1990/91.

Expenditure on the House of Lords was £104 million in 2008/09. It has doubled in real terms since 1997/98 although fell by 16% in real terms in the latest year.

Expenditure in each of the Commons accounts is higher than the expenditure in the Lords. This is due to a number of factors. For instance, peers receive only allowances and expenses, whereas MPs receive these and a full-time annual salary. There are also more staff working for or in the House of Commons than there are in the House of Lords.

4.2 MPs' and Peers' pay and allowances

Members' salaries

Table 39: Annual salaries of Members since 1911 (a)

Date	Salary	Apr 2009 prices (1974 = 100)

Sources: House of Commons Information Office, *Members' Pay, Pensions and Allowances*; ONS

(a) Staged increases are not shown in this table

(b) Including sessional allowance. From May 1954 to July 1957 an allowance of £2 for each day the House sat (except Fridays) was paid to Members. The figure here is based on the average number of sitting days in that period.

(c) inflated using Retail Price Index

Pay for MPs were first introduced in 1911 by the then Liberal Government, and set at a rate of £400 per annum. This rate remained, notwithstanding temporary reductions in 1931 and 1934 due to the economic crisis, up until 1946, when MPs pay was increased to £1,000 per year.

Up until 1971, nothing but ad hoc reviews of Members' salaries took place. That year the Top Salaries Review Body was set up, with a provision to consider and advise on the pay of MPs. This later became the Senior Salaries Review Body (SSRB).

An SSRB review of Members' remuneration in 1996 concluded that it should be raised to £43,000 per annum, which The House agreed to. This saw MPs pay jump by almost £9,000 from the previous year. Since then, pay has risen steadily to where it stands at April 2009 - £64,766.

Regular reviews of MPs pay and allowances have been conducted since the 1996 review: in 2001, 2004 and 2007.²⁹

Members' allowances

Members' allowances and expenses have come under increasing scrutiny. This section seeks to define and differentiate Members' expenses and offer trend data where possible.

The **Communications Allowance** was introduced by the House on 28 March 2007, and is designed to assist Members with expenditure incurred wholly, exclusively and necessarily in communicating with the public on parliamentary business. Originally for the 2007/08 Financial Year, the maximum level was set at £10,000. For the 2008/09 and 2009/10 Financial Year it is set at £10,400 per annum.³⁰

The **Additional Costs Allowance** (ACA) was introduced in 1972 to cover additional costs to Members staying either in London or their constituency, when engaged on parliamentary duties. It has been replaced for 2009/10 by the **Personal Additional Accommodation Expenditure** (PAAE) allowance, with a threshold of £24,222 for that year.³¹

Overleaf is an illustration of the change in the maximum limit of this allowance:

Source: SN/PC/04651, *Additional Cost Allowance*

For more information, see the standard note *Additional Costs Allowance*.³²

A **Temporary Secretarial Allowance (TSA)** is made available to meet the extra cost of obtaining temporary secretarial/research assistance, while a salaried Members' staff is absent from work through paid sickness, maternity or adoption leave. The amount available is dependent on the amount of the absent employee's salary for the following periods

- *Maternity*: 26 times the gross total of the gross weekly pay and Employers' National Insurance contributions of the absent employee. TSA does not cover maternity leave in excess of the contractual 26 weeks.
- *Adoption*: As maternity. TSA does not cover leave in excess of the 26 weeks contractual paid leave.
- *Sickness*: In any four year period, twelve times the gross monthly salary of the employee concerned.

³² SN/PC/04641, *Additional Costs Allowance*

The **Winding Up Allowance** is available to meet the costs of completing constituency and parliamentary business undertaken by or on behalf of a former Member upon their death or retirement. The allowance is equal to one third of the current level of the sum of the Staffing Allowances and Incidental Expenses Provision. Its maximum level at the start of the 2008/09 tax year was £40,799.

A **Resettlement Grant** is payable to any Member who ceases to be an MP at a General Election, in order to assist with the cost of adjusting to non-parliamentary life. The amount is based on age and length of service, and varies between 50 per cent and 100 per cent of the annual salary payable to a Member of Parliament at the time of dissolution.

The **London Supplement** is available to any Member whose constituency is within inner London. It is paid in addition to the salary. The 2008/09 rate is £2,916. From 1 April 2009 the London Supplement will be replaced by a **London Costs Allowance** of £7,500.

Members representing outer London constituencies could choose to take either London Supplement or the Additional Costs Allowance.

The **General Services budget** provides relevant training for Members and their staff and appropriate insurance. It also provides exceptional expenses for Members who represent constituencies with particular problems, and reasonable adjustments to working conditions and equipment for Members with particular needs.

The **Office Costs Allowance** was the main source of reimbursement for Members' expenses prior to the 2001 review on Members' pay and allowances. Up until March 2003, the Office Costs Allowance covered expenses such as secretarial assistance, general office expenses and the employment of research assistants. Below is a table and chart showing the changes in the Office Costs Allowance from 1969 to 2002:

Table 41: Maximum Office Costs Allowance 1969 to 2002

Date	Allowance
Oct 1969	£500
Jan 1972	£1,000
Aug 1974	£1,750

Apr 2002 (d)	£53,446

(a) On 20 July 1984 the House decided by resolution that the allowance be uprated from 1 April each year by the increase in the maximum point of the pay scale (excluding allowances and overtime) for a senior personal secretary in the Civil Service in receipt of Inner London weighting. However, on 16 July 1986 the House decided to reject the Government recommendation of a 6% increase in Secretarial/Research Allowances, and instead voted for an amendment which raised the base figure for allowances in 1986-87 by over 40%. On 21 July 1987 the allowance became known as the Office Costs Allowance. The allowance is revised from 1 April each year, though the actual amount cannot generally be calculated until late April. On 25 July 1991, the Leader of the House, Rt Hon John MacGregor, asked the Top Salaries Review Body to undertake a review of the whole subject of the Office Costs Allowances. The TSRB reported in July 1992, following which the Government recommended an increase in the OCA of just over £4,000, to be assessed on a quarterly basis in the future. On 14 July 1992, however, the House rejected this and voted instead in favour of an increase of 38%, also to be assessed quarterly. On 13 July 1994, the House voted for a 2.3% increase in the allowance limit effective from 1 April 1994.

(b) As first paid

(c) Increased following a resolution

(d) Office Cost Allowance was abolished in April 2003. Members who served in the previous Parliament could opt to retain their OCA entitlement until then or transfer to the Staffing Allowance as set out above.

The **Staffing Allowance** was introduced in June 2001 to replace the old Office Costs Allowance, which was abolished in a transitional period ending 31 March 2003. The Staffing Allowance funds the salaries of Members' staff, together with pension contributions. The allowance is up rated in accordance with movements in the Average Earnings Index. From 1 April 2009, it will become known as the **Staffing Expenditure**.

Below is a table outlining changes in the Staffing Allowance:

Table 42: Staffing Allowance since June 2001

Date	Maximum
Jun 2001	£70,000
Apr 2002	£72,310
Apr 2003	£74,985
Apr 2004	£77,534
Apr 2005	£84,081
Apr 2006	£87,276
Apr 2007	£90,505
Apr 2008	£90,854
Apr 2009	£103,812

Source: House of Commons Information Office Factsheet: Members' pay, pensions and allowances

The **Incidental Expenses Allowance** came about after the change to the Office Costs Allowance in 2001. It is available "to meet any other expenditure which Members may incur wholly necessarily and exclusively in discharging their duties as Members"³³ not covered by other allowances. It was replaced by the **Administrative and Office Expenditure (AOE)** allowance for 2009/10. For that year, a maximum of £22,393 can be claimed in AOE costs

The **Motor Mileage Allowance (MMA)** reimburses Members of the Commons and the Lords for the cost of travel by car between Westminster and their constituency, homes and other approved journeys on parliamentary business. The current rates are 40 pence per mile for the first 10,000 miles and 25 pence per mile thereafter. The Motorcycle Allowance was introduced on the 29 January 2004. It reimburses Members for journeys by motorcycle. The current rate is 24 pence per mile. The Bicycle Allowance was introduced in 1998 and reimburses Members for journeys by bicycle. Originally it was up rated annually by the percentage increase in the RPI, but since 2004 the rate has been set by the Inland Revenue up until 2005, and since then Her Majesty's Revenue and Customs (HMRC). The current rate is 20 pence per mile.

Ministerial salaries

Ministers who are currently in the House of Commons also receive their salary as a MP. Prior to July 1996, they received a reduced parliamentary salary on the grounds that ministerial office impinged on the individual's ability to undertake the full range of an MP's parliamentary duties. After a SSRB report recommended that Ministers should receive a full parliamentary salary,³⁴ the House agreed to accept it.³⁵ Peers with ministerial duties receive full remuneration as well as their allowances, due to not being paid a salary for sitting in the Lords.

Overall Members' cost

Below is a table showing Members' expenditure, in total and per Member, as well as a graph showing total Members' expenditure. It provides an estimate of general costs associated with supporting Members of the House of Commons, allowing them to perform their duties in constituencies and Parliament. This includes Members' salaries, pension payments, reimbursement of expenses, insurance payments and the provision of IT training and equipment for Members and their staff. It also takes into account financial assistance given to opposition parties to perform their duties, as well as providing the Exchequer contribution to the Members' fund:

Table 44: House of Commons – Members' Expenditure, 1990/91 to 2007/08

	£000			
	House of Commons Members' Expenditure	Value in 2007/08 prices	Expenditure per Member	Expenditure per Member in 2007/08 prices

HM Treasury

Expenditure for MPs has increased gradually over the previous eight parliamentary sessions, at an average rate of seven per cent a year. In real terms, the average increase has been 4.2 per cent a year.

In real terms, the total amount spent per Member peaked at over a quarter of a million pounds in 2005/06, but it has since fallen to £247,000.

Peers' allowances

Unlike MPs, peers do not receive a salary (they may draw a salary if they hold office as a minister or as an official in the Lords).³⁶ They are instead able to claim a number of allowances. More detail on the Lords Members' Reimbursement Allowance scheme can be found in their *general guide*.³⁷

Below is a table showing allowance rates for the Lords for 2005/06, 2006/07 and 2007/08:

Table 45: Main Peers' Allowances, current summary 2005-2010

Backbench Peers		1 Aug 05 - 31 Jul 06	1 Aug 06 - 31 Jul 07	1 Aug 07 - 31 Jul 08	1 Aug 08 - 31 Jul 09	1 Aug 09 - 31 Jul 10
Subsistence	Day	£77.00	£79.50	£82.50	£86.50	£86.50 Per day the House sits (usually about 150 days per year)
	Overnight	£154.50	£159.50	£165.50	£174.00	£174.00
Office Costs		£67.00	£69.00	£71.50	£75.00	£75.00 Per sitting day and for up to 40 additional days per year
<hr/>						
Travel		Spouse/civil partner/children's expenses Six return journeys for parliamentary occasions each year				
<hr/>						
Lord Ministers and paid office holders		1 Aug 05 - 31 Jul 06	1 Aug 06 - 31 Jul 07	1 Aug 07 - 31 Jul 08	1 Aug 08 - 31 Jul 09	1 Aug 09 - 31 Jul 10
Secretarial Allowance		£5,025.50	£5,192.00	£5,389.00	£5,658.00	£5,658.00 per annum
Family travel expenses		Expenses for up to 15 return journeys per calendar year for spouses and children aged under 18

5 Parliament communicating with the public

5.1 Internet

Parliament’s website offers the public access to a growing selection of information about both Houses. In 2008, the website recorded almost 50.3million hits and over 6.5million visitors.

MPs increasingly use electronic tools to communicate with their constituents and other people concerned with politics in Britain, but some forms of communication are more popular than others. Research conducted by the Hansard Society shows that, of the sample of MPs, 90% use email and more than 80% have a personal website, while less than a quarter use social networking, and only about one in ten MPs blog.⁴⁰ The graph below shows the adoption of different media by MPs.

Source: Hansard Society, *MPs Online: Connecting With Constituents*

Although nearly all MPs reported using email (see previous chart), there has only been a 37% increase in its adoption by MPs in the last three years and last year saw only a 2 per cent rise in the number of MPs using email. This would suggest that the market for MPs’ use of email is saturated: nearly all MPs in the present Parliament who are going to use email already use it.

In contrast, the number of MPs taking up blogging and social networking is relatively low. However, these technologies have seen significant increases in use, compared to just a handful of MPs a few years ago. This suggests that social networking and blogging could become important ways for Members to communicate with the public in the near future.

⁴⁰ Hansard Society: *MPs Online: Connecting with Constituents*, 2009

5.2 Television

Since 1998, BBC Parliament has shown live and recorded coverage of the House of Commons and House of Lords. It also broadcasts Select Committees, the Northern Ireland Assembly, the Scottish Parliament and the Welsh Assembly.⁴¹ The channel also broadcasts reports from the European Parliament and the yearly party conferences of the main political parties and the TUC. It broadcasts 24 hours a day.

BBC Parliament is watched by 0.45 million individuals a week and more than one million over a month. In the most recent month for which figures are available the channel reached a new high of 1.775 million (June 2009). The share of viewing, though small, has risen steeply over the past 2 years (2007-2009).⁴²

5.3 Education and Visits

Parliament's education service works with Members of both Houses and schools in order to support young people develop their understanding of the workings of Parliament. They offer a range of visiting programmes and run an outreach program, working with teachers, students and putting on workshops away from Westminster.⁴³

Below is a chart showing the number of students visiting Parliament through the education service. Please note that these figures also include a small number of teachers:

Source: Education Centre

After an initial fall and steady increase up until 2005-06, the number of students visiting Parliament through the education service has risen dramatically ever since.

⁴¹ http://news.bbc.co.uk/1/hi/programmes/bbc_parliament/default.stm

⁴² BARB Monthly Multi-Channel Viewing Summary

⁴³ Education service, UK Parliament

Every year around 1 million people visit Parliament. They come to meet MPs or Peers, watch debates, attend a committee meeting or to see the Palace of Westminster on a tour. Table 49 shows the number of visitors to Parliament per month since 2006.

Table 49: Parliamentary visitors, 2006 to 2009

Source: Tours Office - statistics for all entrances

Over the years, the months of June and July have been the busiest, being the only months with over 100,000 visitors at a time. Attendances in June have gradually increased, whereas in contrast July visitations have decreased— by 0.8% in 2007 and by 9.2% in 2008. The figures for 2009 show a fall in attendance of more than 13,000 in January and over 18,000 in February on the previous year.

6 International comparisons

6.1 Structure (bicameral/unitary)

The United Kingdom Parliament is bicameral, having two chambers: the House of Commons and the House of Lords. According to the Inter-parliamentary Union, unicameral parliaments are more popular across the world, with 114 or 60% of the total number of national parliaments. There are 77 bicameral parliaments, or 40%.⁴⁴

6.2 Size

A comparison of the number of seats in the two chambers of the UK Parliament shows that both are the biggest in Europe. The statutory number of seats (that is, including those that are temporarily vacant) in the House of Commons is the highest in Europe, although not by much.

Source: Inter-parliamentary Union

The House of Lords is bigger than comparable upper chambers in Europe, with about twice as many members as its nearest rival, the French Senate.

⁴⁴ Interparliamentary Union, [Parline database](#)

Number of seats in upper chambers in Europe

Source: Inter-parliamentary Union

Another interesting way of looking at the size of parliaments is to compare the number of constituents that each elected member represents.

Population per lower/single chamber Member

Table 50: Population per lower/single chamber Member in thousands

Country	Population per lower/single chamber Member in thousands
Ireland	24
Sweden	26
Norway	30
New Zealand	33
Italy	94
UK	94
Canada	107
France	111
Netherlands	113
Spain	129
Australia	133
Germany	134
USA	696

6.3 Gender

As discussed in the chapter on Members of Parliament, the proportion of women MPs in the House of Commons reached some 20% after the 2005 General Election. The number of women elected to other parliaments has also been increasing in recent years. The following two charts show the UK Parliament's position in relation to a selection of 12 comparable countries, firstly in 1997 and secondly in 2008.

Proportion of women members of parliament in 1997

Proportion of women members of parliament in 2008

Source: Inter-parliamentary Union

Between 1997 and 2008 the United Kingdom moved from 12th out of 13 in terms of female representation in parliament to 10th out of 13. Nevertheless, as the table below shows, the overall ranking in the Inter-parliamentary Union’s worldwide ranking fell from 50th to 59th. Sweden also lost its top spot to Rwanda.⁴⁵

⁴⁵ For the full [rankings on women in parliaments](#), and for other election and parliamentary information, see the [Inter-parliamentary Union’s website](#).

Table 51: Number of women members of parliament in 1997 and 2008

6.4 Pay/costs

The Senior Salaries Review Body, which looks at pay and pensions for top public sector workers, published in January 2008 a report which contained international comparisons of pay for members of parliaments in selected countries. The chart below shows MPs' salaries in sterling equivalent using OECD purchasing power parities (see the notes to the accompanying table for further detail). It shows that the salary for an MP in the UK is at the median point.

Members of Parliament salaries in sterling equivalent, 2007

Source: Review Body on Senior Salaries, [Review of parliamentary pay, pensions and allowances, 2007](#), Cm 7270

Table 52: Comparison of salaries and Members of Parliament in selected countries

Country and currency	Annual salary in national currency ⁱⁱ	Value of salary in sterling
UK £	60,675	60,675
Australia Aus \$	127,060	56,471
Canada Can \$	150,800	75,779
France €	83,435	57,941
Germany €	84,108	59,231
Ireland ⁱⁱⁱ	101,446	62,621
Italy €	140,444	101,039
Netherlands ^{iv} €	90,070	64,336
New Zealand NZ \$	122,500	51,471
Norway Nkr	612,000	43,621
Spain €	36,249	29,233
Sweden SKr	634,800	42,805
USA \$	165,200	101,975

ⁱThis table compares gross base salaries, before tax, social security, pension etc contributions. It takes no account of allowances, free travel and other entitlements. Most salaries for members of parliaments are taken from the respective parliament or government websites but data for Ireland and Norway were obtained from official sources in those countries. The figures were checked on 15 November 2007.

ⁱⁱPurchasing Power Parities (PPP) are used to convert salaries in national currencies to the equivalent purchasing power in sterling. This provides a better comparison of relative value than conversion using (often more volatile) exchange rates. The PPP rates have been calculated from the OECD 2006 PPP rates, the latest available when the report was written.

ⁱⁱⁱThe base salary for Irish TDs is currently €95,363, rising to €98,407 after four years and to €101,446 after eight years.

^{iv}Including 8 per cent holiday allowance. An additional but unspecified end of year allowance is also payable.

6.5 Sitting hours

In the UK, Members spend a considerable amount of the time when Parliament is not sitting getting on with work in their constituencies. Parliaments around the world have different roles and patterns of working. Nevertheless, it is interesting to compare the number of sitting days and hours of the House of Lords and the House of Commons with those of the parliaments of other countries.

The data below refer to the number of days and length of plenary sessions (i.e. data on the number and length of non-plenary sittings, such as in Committee, are excluded). Data from European parliaments and the United States have been obtained via correspondence with individual parliaments. Data for selected Commonwealth parliaments are extracted from *The Table: the Journal of the Society of Clerks-of-the-Table in Commonwealth Parliaments*.

The number and length of sittings may be affected by several factors, including whether a parliamentary election was held in any given year. Election years are identified in the table below. Some of the data obtained through correspondence have been provided in different year formats, typically in sessional years (e.g. 2003-04) rather than individual calendar years – these are indicated with an asterisk in the tables. In the small number of cases where this is so, the data shown are for the second of the two years (i.e. where data have been provided for the sessional year 2003-04 these are reported for the calendar year 2004). Where extraordinary sessions are held, these are added to the data for the relevant calendar year.

It is certainly the case that the House of Commons sat on more days and for more hours than almost all other European legislatures in years when parliamentary elections have not been held. However, there are some exceptions. The French National Assembly tends to sit for slightly more hours than the House of Commons, while in 2004 the Italian Chamber of Deputies and the Senate sat for more days than the Commons. The Greek Parliament also tends to sit on more days than most other European chambers with the exception of 2004 which was a parliamentary election year in Greece. The United States Senate has also sat for more hours than the Commons in three out of the five years covered by this study, although one of these years was 2005 when a general election was held in the UK.

Source: ECPRD via House of Commons Library correspondence with individual parliaments and, for Commonwealth parliaments, *The Table: Journal of the Society of Clerks-of-the-Table in Commonwealth Parliaments*

¹ 2003 was chosen as the most recent year where figures were available for most countries and most countries, including Britain, had no election.

The data used in the creation of the chart above, together with some comparisons of total sitting hours, are shown in the table below.

Table 54: International comparisons of sitting days and hours
