

# Unemployment by Constituency: May 2010

RESEARCH PAPER 10/34 12 May 2010

This paper presents labour market data for Parliamentary Constituencies. A summary of the latest national and regional labour market data is given, along with a selection of relevant constituency-level indicators including the latest Jobseeker's Allowance (JSA) claimant count data.

The latest data show:

- Claimant count unemployment fell by 27,100 to 1.52 million in April 2010 (seasonally adjusted). The claimant count rose between March and April 2010 in 45 constituencies and fell in 605 constituencies. Compared to April 2009, JSA claimant levels are now higher in 310 constituencies and lower in 338 constituencies.
- ILO unemployment rose by 53,000 over the last three months to 2.51 million (January-March 2010). This is the highest level since late 1994. The unemployment rate is 8.0% compared to 7.1% in the same period a year ago.
- Employment fell by 76,000 over the last three months to 28.83 million (January-March 2010). 72.0% of the working age population are in employment.
- Economic inactivity rose by 88,000 over the last three months to 8.17 million (January-March 2010). This increase is partly due to a rise in the number of students who are economically inactive (up 43,000 over the same period).

## 1 Monthly labour market statistics

Statistics on Jobseeker's Allowance (JSA) claimants are one part of a large selection of labour market data released on a monthly basis.<sup>1</sup> This section highlights some of the key figures in the latest labour market release and also looks in more detail at changes in JSA claimants at a constituency level.

### Unemployment

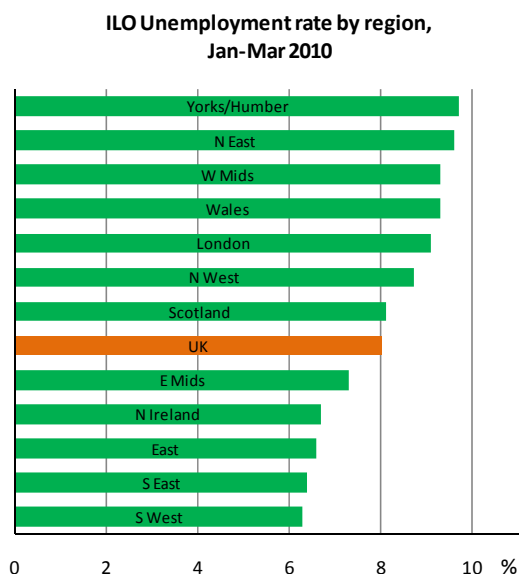

- JSA claimant count unemployment fell by 27,100 in April 2010 to 1.52 million.<sup>2</sup> However it is 11,300 higher than in April 2009.

- The wider ILO based measure of unemployment was 2.51 million in the period January-March 2010, a rise of 53,000 from the last quarter, a rise of 279,000 compared to the same period a year ago and 460,000 higher than in April-June 1997. The unemployment rate<sup>3</sup> is 8.0%, 0.2 percentage points higher than in the last quarter, and 0.9 percentage points higher than in the same period a year ago.

- The number of people who have been unemployed (ILO measure) for longer than six months increased by 105,000 over the last quarter to 1.30 million (January-March 2010). This is 408,000 higher than in the same quarter a year ago.

- On a regional basis the highest rates of unemployment (ILO measure) were in Yorkshire and the Humber (9.7%), the North East (9.6%), Wales and the West Midlands (both 9.3%) (January-March 2010, see chart). Over the last year the ILO unemployment rate has increased across the UK by 0.9 percentage points. The greatest rises have been in Scotland (2.2 percentage points), Yorkshire and the Humber (1.7 percentage points) and Wales (1.6 percentage points).

- In January-March 2010 734,000 people aged 18-24 were unemployed (ILO measure), a rise of 9,000 on the previous quarter and a rise of 56,000 on the same quarter a year ago. The unemployment rate for those aged 18-24 is now 17.9%.

- 941,000 people aged 24 and under were (ILO) unemployed in January-March 2010, a rate of 20.0%.

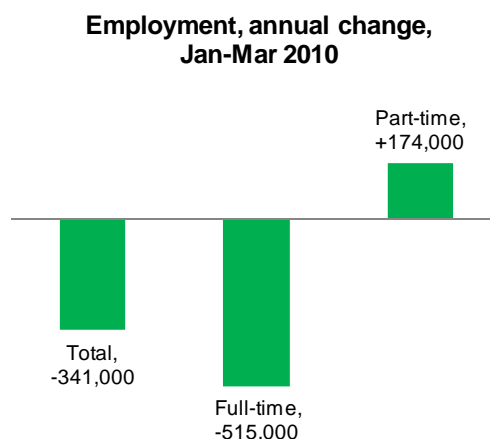

<sup>1</sup> The latest release is available at: <http://www.statistics.gov.uk/pdfdir/lmsuk0510.pdf>. This page is based on data from this release as well as [http://www.statistics.gov.uk/OnlineProducts/LMS\\_FR\\_HS.asp](http://www.statistics.gov.uk/OnlineProducts/LMS_FR_HS.asp) (historical statistics) and NOMIS: <https://www.nomisweb.co.uk>. The figures used on this page are seasonally adjusted.

<sup>2</sup> Seasonally adjusted. The JSA data used in the remainder of this paper are not seasonally adjusted.

<sup>3</sup> ILO unemployment rate is the proportion of the economically active population who are unemployed.

### Employment

- The number of people in employment (16 and over) fell by 76,000 over the last quarter to 28.83 million (January-March 2010); the number of people of working age in employment fell by 94,000 to 27.40 million in the same period. The employment rate for the working age population was 72.0%, 0.3 percentage points lower than the last quarter and a fall of 1.5 percentage points compared to the same quarter a year ago.
- Over the last quarter, full-time employment fell by 103,000 while part-time employment rose by 27,000. Compared to the same quarter one year ago overall employment fell by 341,000, full-time employment fell by 515,000 while part-time employment rose by 174,000.
- Employment in the public sector rose by 7,000 over the last quarter to 6.1 million (December 2009), while employment in the private sector fell by 61,000 to 22.76 million. Over the last year public sector employment has risen by 46,000 while private sector employment has fallen by 527,000.
- Employment of those born in the UK fell by 244,000 to 25.04 million in the year to January-March 2010; employment of those born outside the UK fell by 103,000 to 3.70 million over the same period.

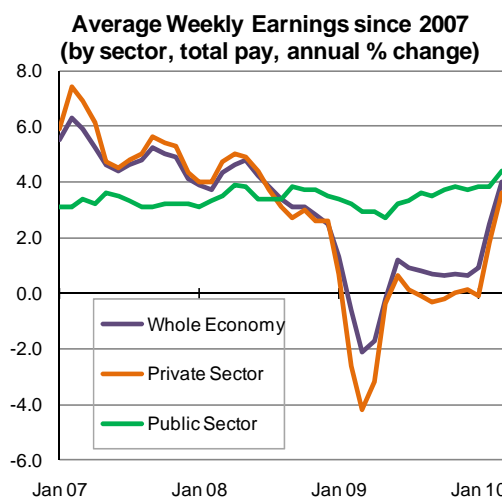

### Inactivity

- In January-March 2010 21.5% of the working age population were economically inactive (8.17 million), a rise of 88,000 on the previous quarter and up 331,000 compared to the same quarter a year ago. The number of people inactive due to being a student has risen by 43,000 over the last quarter and by 214,000 over the last year (a rise of 10.2% over the last year).

### Vacancies and Earnings

- It is estimated that there were 475,000 vacancies in the UK in the three months to April 2010, a fall of 6,000 on the previous quarter and 21,000 higher than in the same period a year ago.<sup>4</sup>
- Average weekly total pay rose by 4.0% in the latest quarter to March 2010 compared to the same period a year ago; bonus pay was up 14.1% and regular pay increased by 1.9% over the same period.

<sup>4</sup> This is based on a UK-wide vacancy survey; data on vacancies advertised through Jobcentre Plus is also available, and is the only vacancy indicator available at a local level. The total count of vacancies available at Jobcentre Plus in Great Britain in April 2010 was 244,241. See Section 2 for constituency level data.

### **Data for new constituencies**

The majority of constituencies used in the General Election had seen boundary changes. The availability of labour market data for these new constituencies is outlined below:

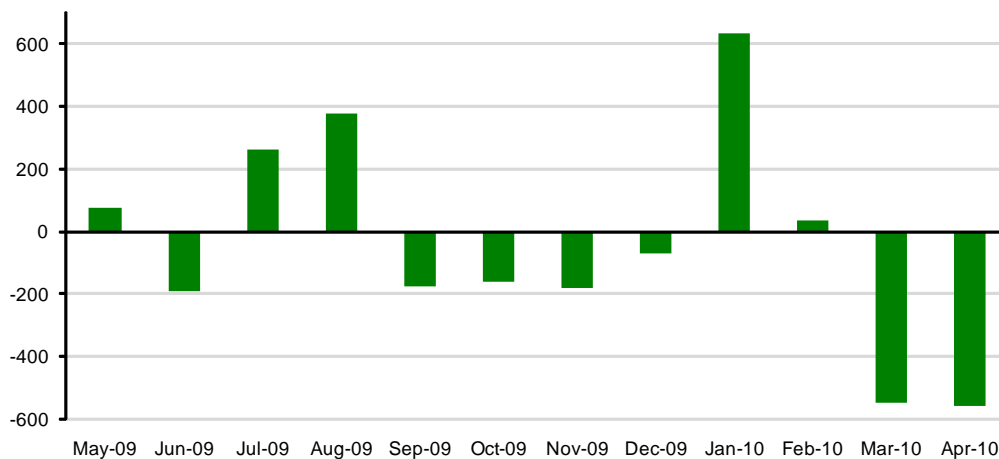

- JSA claimant count data and rates are available back to 2004.
- ILO unemployment, employment and inactivity based on the Annual Population Survey are available for the latest year only. Model-based estimates of ILO unemployment are being developed.
- Earnings data based on the Annual Survey of Hours and Earnings (ASHE) will not be available until the next release in November 2010.
- Annual Business Inquiry (ABI) data is available (Employee jobs).

### **Change in claimant count in constituencies**

Between April 2009 and April 2010 there has been a nearly equal balance between constituencies which have seen a rise in the claimant count level (310 constituencies), and those that have seen a fall (338 constituencies, 2 stayed the same). However, when monthly changes over the last year are considered, as in the chart below, some significant movements in certain months are visible. For example, in January 2010 the seasonal effect following Christmas appears to have led to a rise in almost all constituencies. The last two months have seen falls in the claimant count in the vast majority of constituencies (597 in March 2010 and 605 in April 2010, net falls of 546 and 560 respectively).

#### **For the last two months the JSA claimant count has fallen in most constituencies**

*Balance of constituencies with an increase in JSA claimants (non-seasonally adjusted data)*

### **Greatest constituency changes**

The effect of the recession on individual constituencies has varied; all constituencies have seen a rise in JSA claimants compared to three years ago (April 2010 compared to April 2007), while, as outlined above, only 310 have seen a rise over the last year (April 2009 compared to April 2010).<sup>5</sup>

<sup>5</sup> Claimant count data is available to download from: [www.nomisweb.co.uk](http://www.nomisweb.co.uk); data used here is not seasonally adjusted.

The table below shows the constituencies with the greatest increases in JSA claimants over the last one year and three years, based on three measures of change: absolute level, percentage change in level and percentage point change in Library unemployment rate.

It is notable that a number of constituencies in Northern Ireland have seen significant increases over the last year and three years, particularly when considering the change in absolute levels. Over a three-year period, the measure of percentage change in levels highlights constituencies such as Surrey Heath and Devizes which started from relatively low levels. As regards percentage point changes, constituencies in Glasgow are highlighted as seeing notable increases over the last year, while Blaenau Gwent has seen the greatest rise over the last three years. (Percentage point changes in rate exclude Northern Ireland.)

### Top ten constituency changes in JSA claimant count data, April 2010

*not-seasonally adjusted*

#### **Change in levels**

	<u>1 year change</u>		<u>3 year change</u>
Newry & Armagh	927	Leeds Central	2,699
Brent Central	730	Newry & Armagh	2,443
Foyle	722	South Down	2,362
Belfast North	718	Upper Bann	2,311

Midlothian	24.2	Mole Valley	175.6

#### **Percentage point change in Library rate (excludes Northern Ireland)**

	<u>1 year change</u>		<u>3 year change</u>
Glasgow South West	1.8	Blaenau Gwent	5.1
Glasgow North East	1.7	Rotherham	5.1
Great Grimsby	1.6	Merthyr Tydfil and Rhymney	4.9
Glasgow North West	1.5	Kingston upon Hull West and Hessle	4.8
Glasgow East	1.5	Kingston upon Hull North	4.8
Glasgow South	1.3	Barnsley East	4.7
Middlesbrough	1.3	Airdrie and Shotts	4.6
Brent Central	1.3	Glasgow North East	4.5
Glasgow Central	1.3	Glasgow South West	4.5
Edmonton	1.2	Motherwell and Wishaw	4.5

## 2 Constituency data

The remainder of this paper is made up of two tables and a series of maps presenting labour market data for the current Parliamentary Constituencies. The latest available data is shown, as well as comparisons with previous years and calculations of change and rankings. Section 4 of this paper provides a detailed overview of the sources used, methodology and copyrights; notes on using the data are also included here. Users should refer to these notes when using the tables; all data and maps are covered by Crown Copyright or Ordnance Survey Copyright.

### ***Definitions of Unemployment***

Two sources of data are used to describe ‘unemployment’ in the UK: the claimant count and ILO unemployment. The claimant count is an administrative count of those claiming Jobseeker’s Allowance (JSA). It has the benefit of being timely, accurate, available since 2004 and for low level geographies. The main problem with the count is that some of those looking for work and ‘unemployed’ do not, or cannot, claim JSA. The JSA claimant count is therefore an indicator of unemployment rather than a perfect measure of unemployment. The standard international measure of unemployment is ILO unemployment, a survey-based measure which captures the number of people looking for and available for work within a standard definition.<sup>6</sup> The main problem with this measure is that at a local authority and constituency level it has a time lag and is subject to sampling variability.

### ***Unemployment Rates***

Two ‘unemployment rates’ are shown in this paper:

- The ‘Library’ rate is calculated by the Library and shows the number of JSA claimants as a proportion of the estimated economically active population of working age resident in each constituency in 2008. This calculation attempts to capture the effect of differences in economic activity in constituencies and is not an official unemployment rate. It is not currently available for Northern Ireland.
- The ‘ONS’ rate shows the number of JSA claimants as a proportion of the resident working age population in 2008. It is not currently available for Northern Ireland. Rates included in PQ answers will be based on this rate.

Also shown in this paper are:

- Employment rates (based on the working age population)
- JSA claimants by age
- Jobcentre Plus vacancies.

The parties shown in the tables relate to incumbents after the General Election.

National, regional and constituency level labour market data is available from NOMIS: <https://www.nomisweb.co.uk/>.

This paper is intended to provide answers to requests for frequently requested data; for further analysis or to comment on the content, Members of Parliament and their staff can contact the authors.

# 3 - Unemployment by constituency in April 2010

*Constituencies in Great Britain (rates for Northern Ireland unavailable)*

Library residence-based claimant rate, expressed as quintile groups (20% bands)

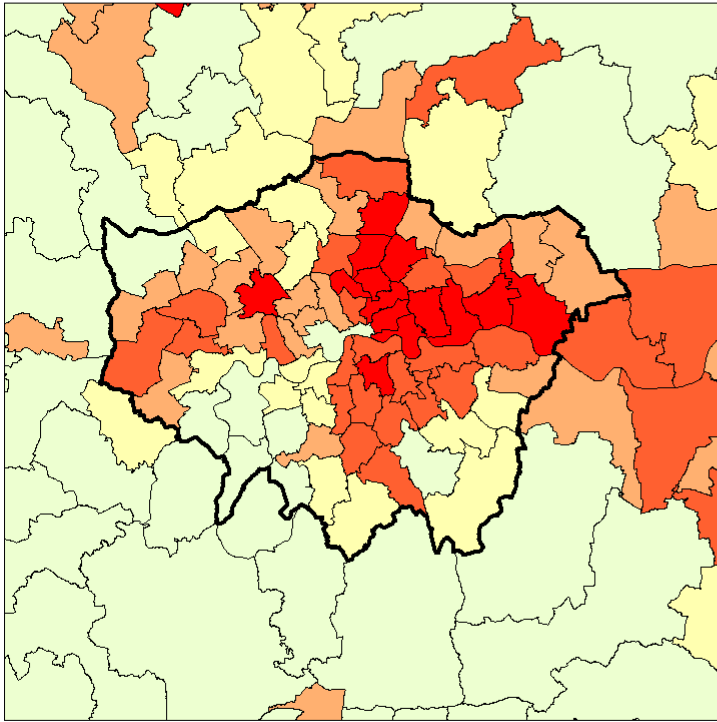

# 3 - Unemployment by constituency in April 2010

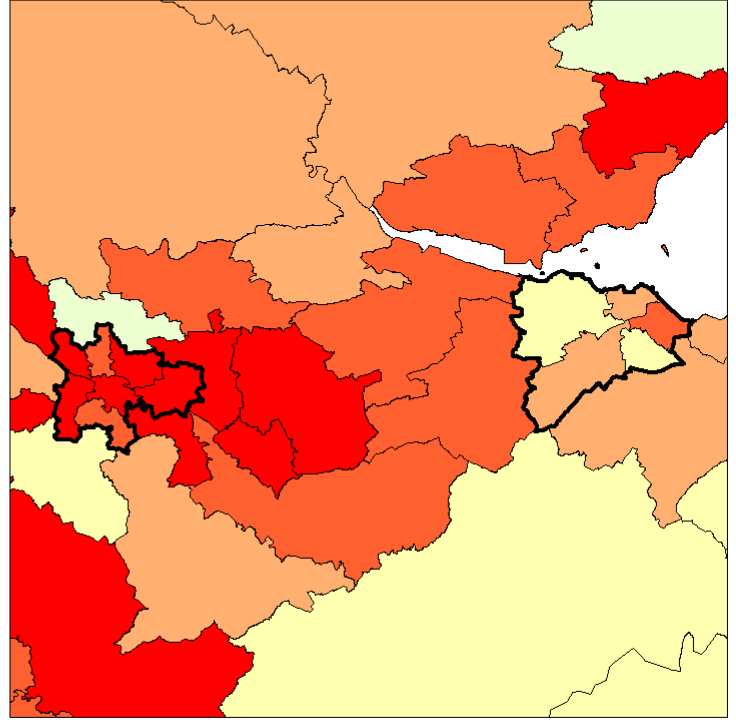

*Selected major conurbations and surrounding areas - not to scale*

Library residence-based claimant count rate, expressed as quintile groups (20% bands)

### Greater London

### Edinburgh and Glasgow

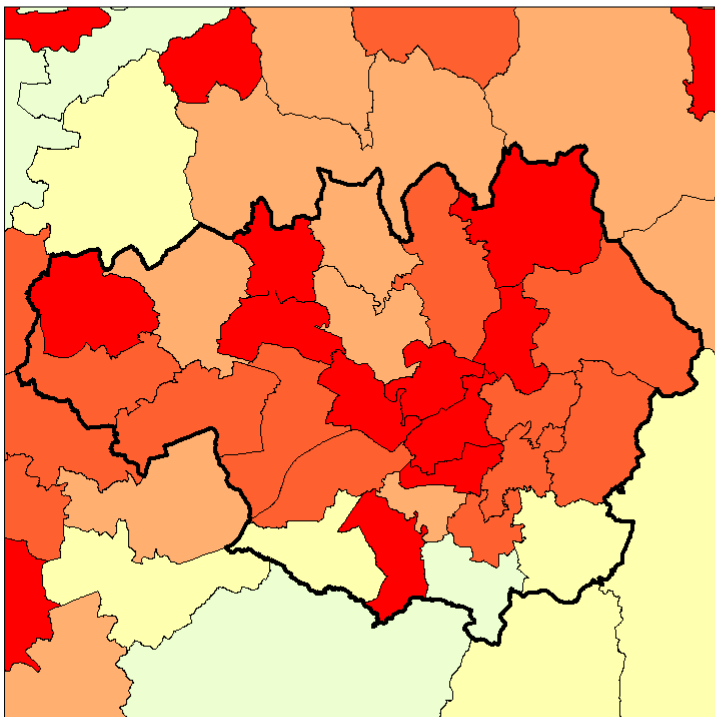

#### Unemployment rate

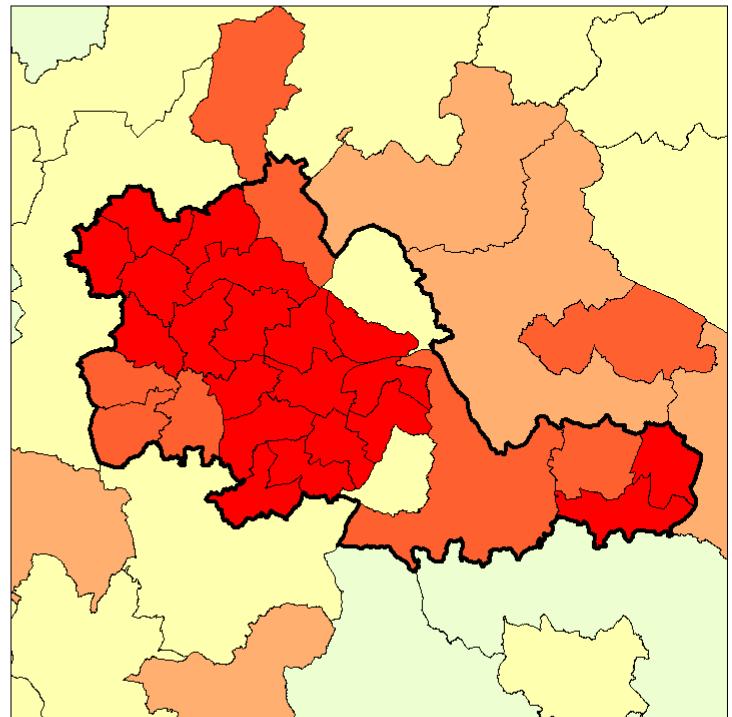

*residence based claimant count*

- Top quintile (7.5% to 19.9%)
- Fourth quintile (5.7% to 7.5%)
- Third quintile (4.4% to 5.7%)
- Second quintile (3.1% to 4.4%)
- Bottom quintile (1.3% to 3.1%)

### Greater Manchester

### West Midlands

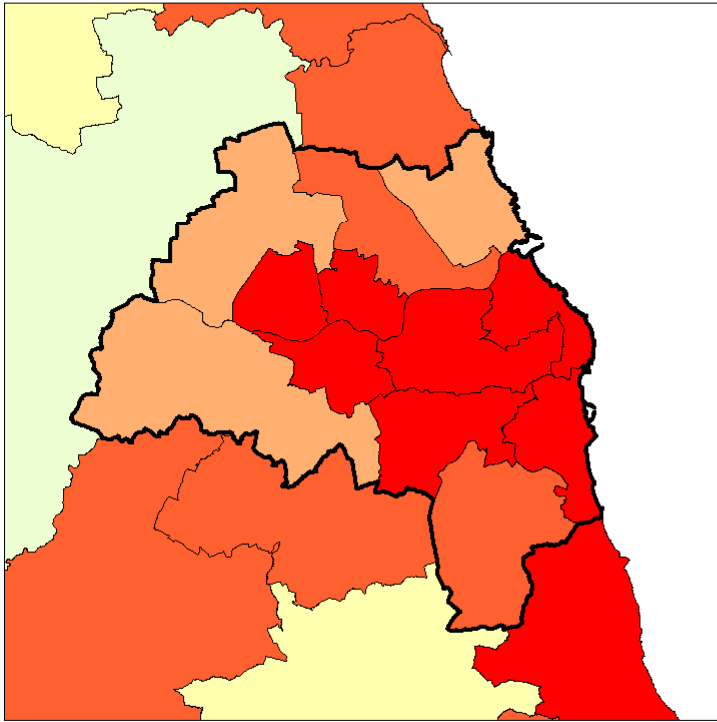

# 3 - Unemployment by constituency in April 2010

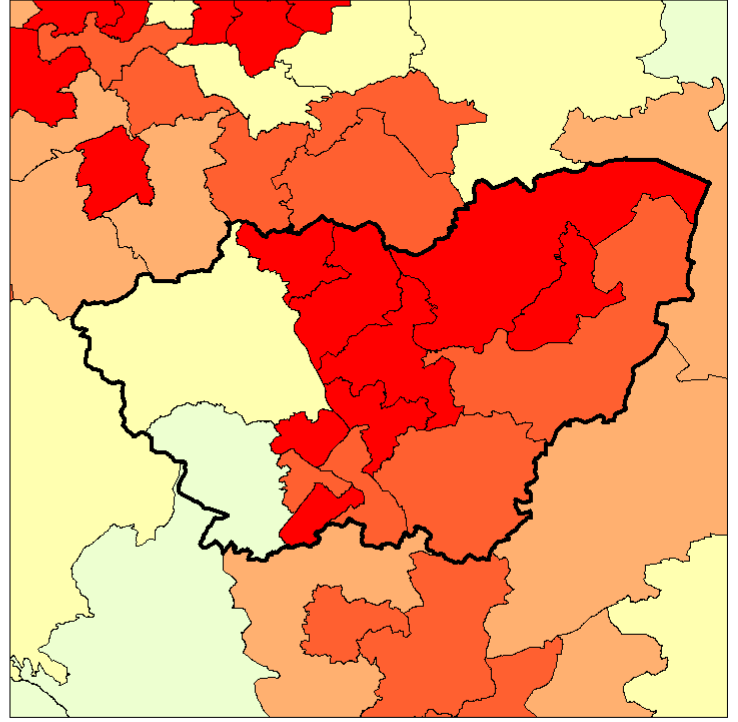

*Selected major conurbations and surrounding areas - not to scale*

Library residence-based claimant count rate, expressed as quintile groups (20% bands)

### Tyne and Wear

### South Yorkshire

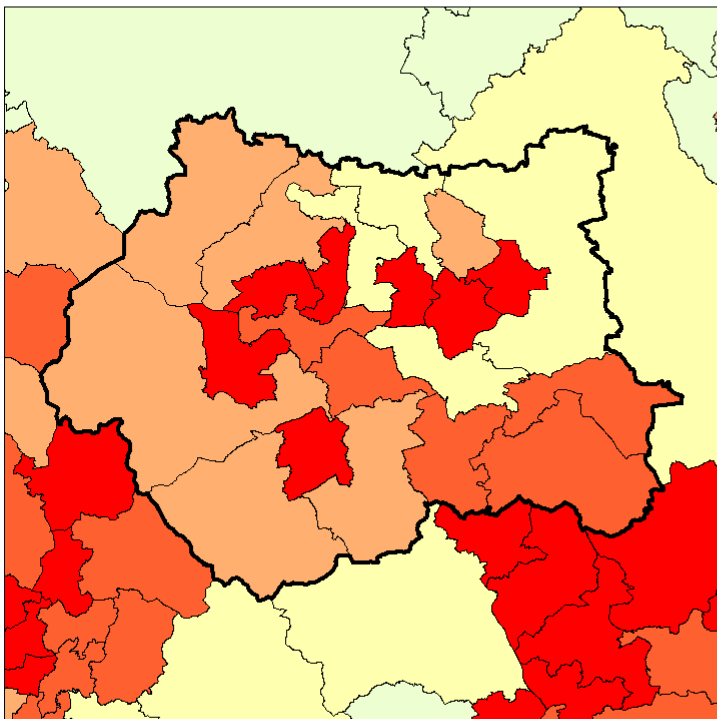

#### Unemployment rate

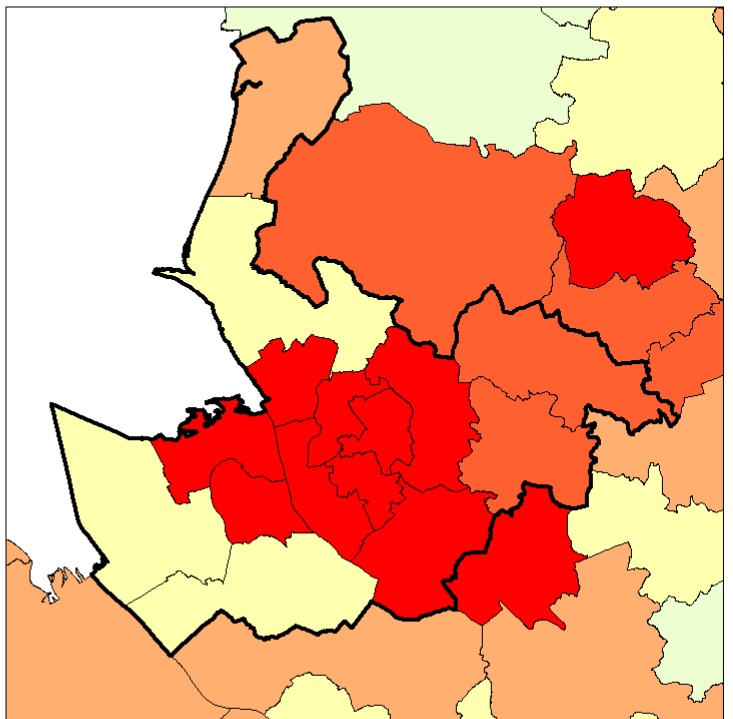

*residence based claimant count*

- Top quintile (7.5% to 19.9%)
- Fourth quintile (5.7% to 7.5%)
- Third quintile (4.4% to 5.7%)
- Second quintile (3.1% to 4.4%)
- Bottom quintile (1.3% to 3.1%)

### West Yorkshire

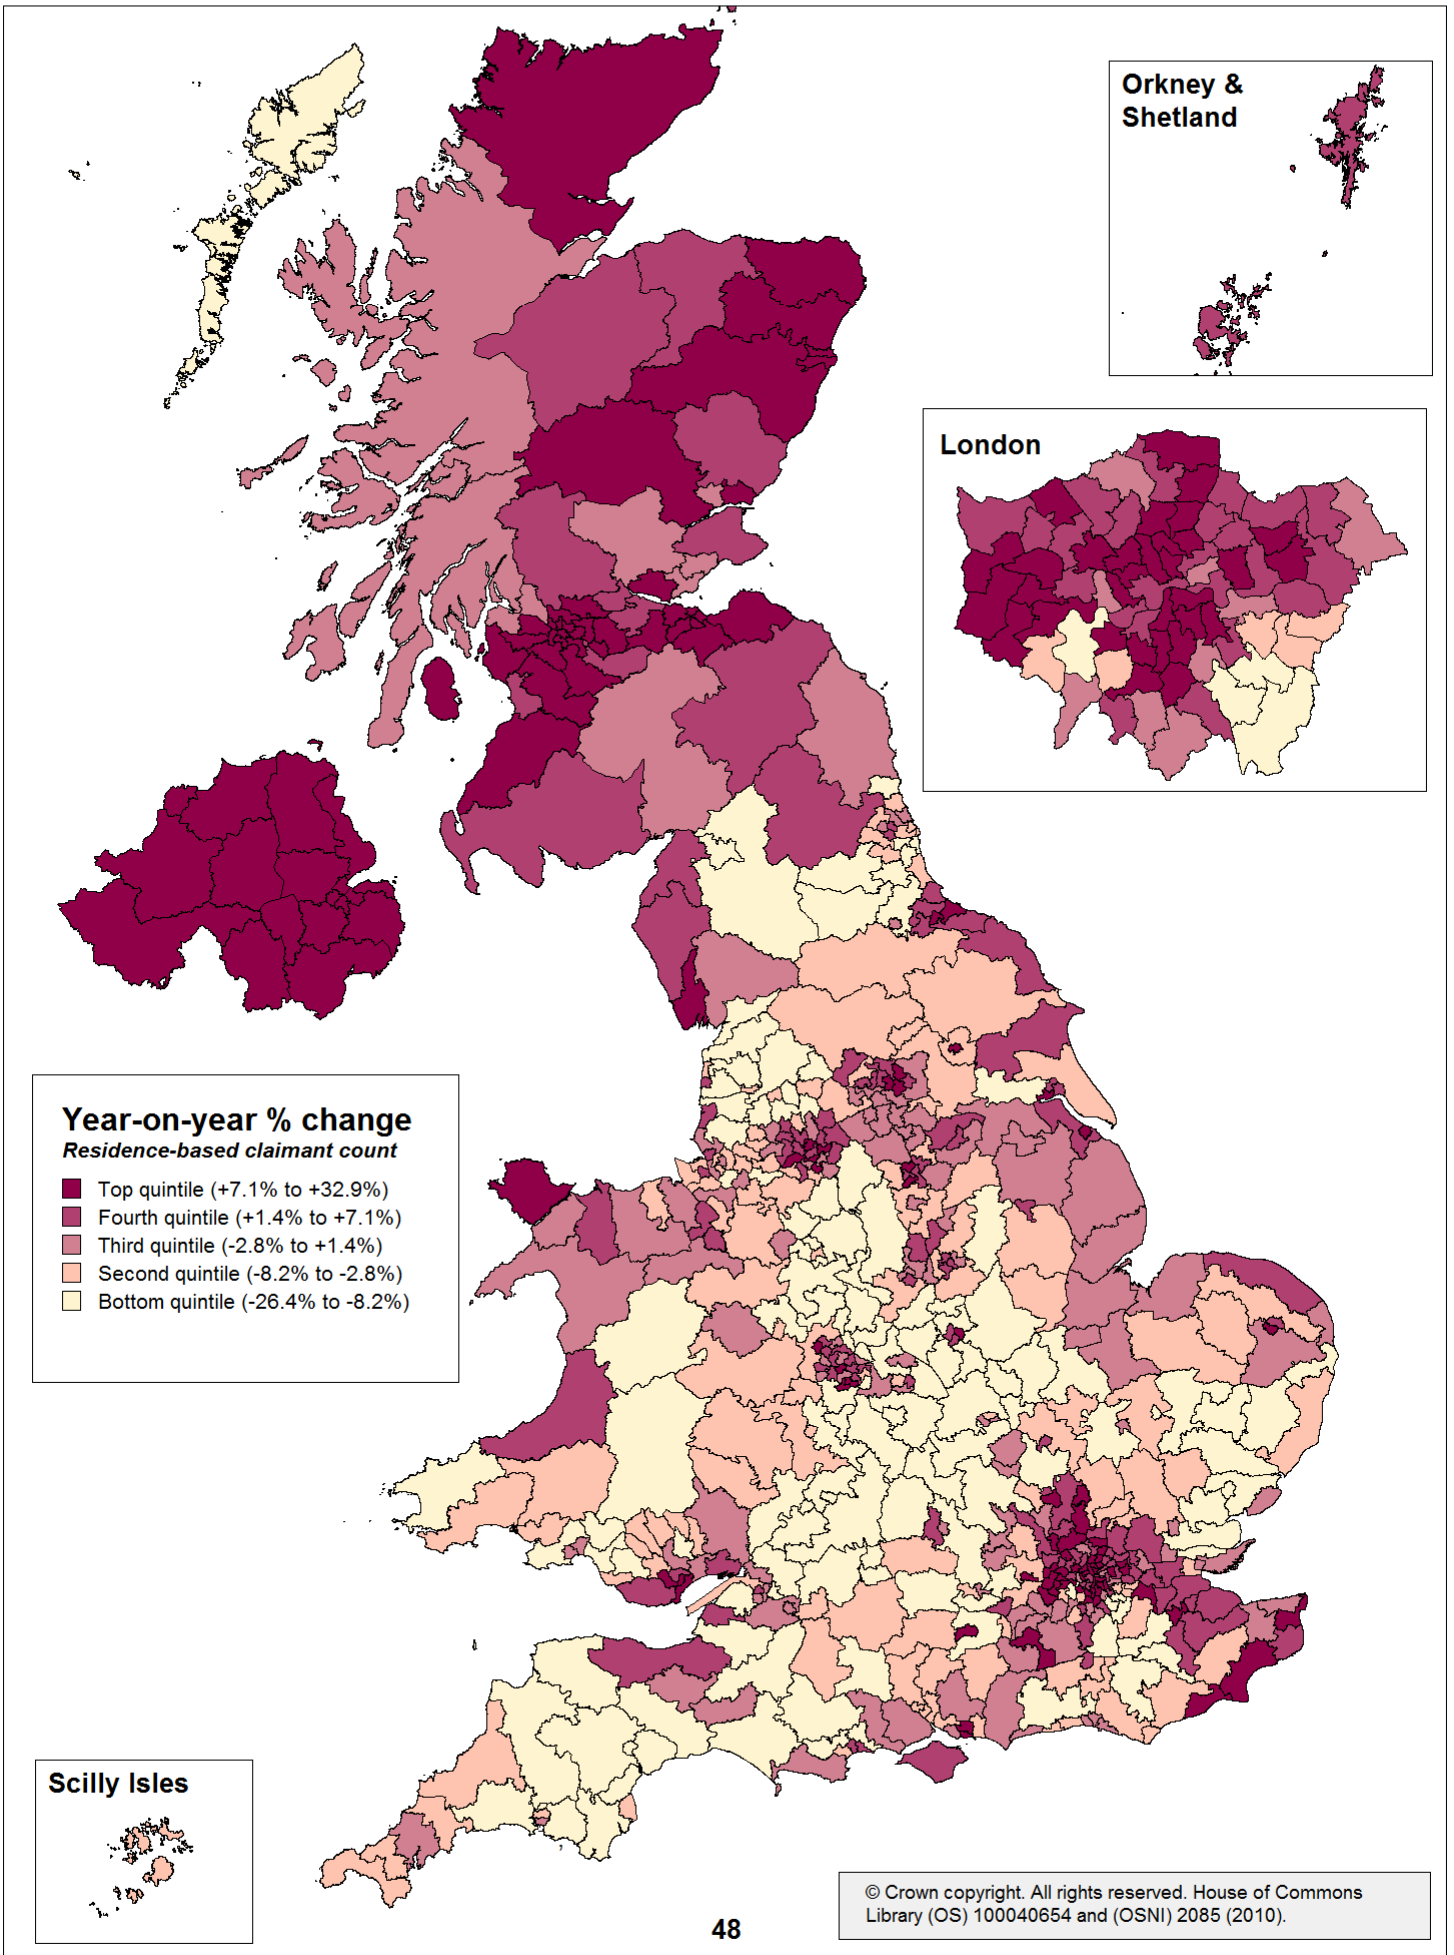

### Merseyside

# 3 - Percentage change in claimant count

*Constituencies in United Kingdom, April 2009 to April 2010*

Percentage change in residence-based claimant count, expressed as quintile groups (20% bands)

## 4 Sources, copyright and methodology

### 4.1 Sources and copyright

The original source for all data in this paper is the Office for National Statistics (ONS). Changes over time, rankings, the ratio of JSA claimants to vacancies and the 'Library rate' have been calculated by the Library. The specific source for data is shown below:

- JSA claimant count: non-seasonally adjusted data, downloaded from NOMIS: <https://www.nomisweb.co.uk/>. As unemployment has a seasonal pattern, comparisons should be made using the same month in each year. Data for constituencies is available from 2004 onwards.
- *Library rate* is based on the Library's estimate of the resident economically active working age population, as outlined in section 4.2. These rates are higher than the ONS rates because they are percentages of the economically active working age population rather than the whole working-age population (as used by ONS).
- *ONS Rate* is based on the resident working age population and published alongside JSA claimant count data on NOMIS.
- *Age and duration breakdowns for JSA claimants* are also available from NOMIS.
- *Employment Rate* is based on the Annual Population Survey (APS) by ONS and is available from their website.<sup>7</sup> This is a survey-based estimate and subject to sampling variability.
- *Jobcentre Plus vacancies* are available from the NOMIS website. They relate to 'live unfilled vacancies', which are vacancies notified to Jobcentre Plus and currently thought to be unfilled. A large number of vacancies are not notified to Jobcentre Plus, and the rate of notification can depend on location, occupation and industry. Data for Lincoln is affected by armed forces recruitment.

Unavailable figures are denoted in the tables by a '..'.

Claimant rates and figures on JSA claimants per vacancy are rounded to one decimal place.

The denominators used in this paper are partly derived from the 2001 Census. Census data for England and Wales are published by the Office for National Statistics. Census data for Scotland are published by the General Register Office for Scotland. Census data for Northern Ireland are published by the Northern Ireland Statistics and Research Agency. Census data are © Crown copyright.

The source of the data on claimant count and population levels contained in this publication is National Statistics (NOMIS database) © Crown copyright.

All mapping is © Ordnance Survey and Ordnance Survey Northern Ireland and **must not** be reproduced without permission

### 4.2 Unemployment rate methodology

Two 'unemployment rates' are shown in this paper. The 'ONS' rate is that published by ONS with the data and is calculated using the resident working age population in 2008 for England, Wales and Scotland. Rates included in PQ answers will be based on this rate. The

<sup>7</sup> <http://www.statistics.gov.uk/STATBASE/Product.asp?vlnk=14160>

'Library' rate is calculated by the Library and shows the number of claimants as a proportion of the estimated economically active population of working age resident in each constituency in 2008.<sup>8</sup> For an exposition of the methodology used to calculate the unemployment rates displayed in this paper see Library Standard Note *Unemployment by Constituency: change in methodology*.<sup>9</sup> Rates are not currently available for Northern Ireland.

This methodology will be updated when ONS changes the definition of working age in August 2010 to take account of the change in the state pension age for women. The population estimates used will also be updated when new data is used in ONS labour market releases.

The rates presented in this paper should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live.

While the Library rates are based on the latest population estimates at a constituency level, they are constrained by the use of the proportion of the population economically active in 2001. Where constituencies have seen major demographic shifts or socio-economic change since 2001 the methodology used to calculate the rates may be less accurate in fully reflecting current unemployment rates.

### 4.3 Map notes

The following notes should be borne in mind when drawing conclusions from these maps:

- The maps on pages 45-47 show residence-based Library rates for April 2010 for constituencies in the United Kingdom, with an expanded view of constituencies in selected major conurbations and surrounding areas.
- The map on page 48 shows the percentage change in residence-based claimant count levels between April 2009 and April 2010 for constituencies in the United Kingdom.
- In both maps the constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 129 constituencies (20% of the total in the United Kingdom). The range in each group is shown on the map, but these ranges are not equal.
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.
- Considering the percentage change does not take account of the absolute level of claimants by constituency. Constituencies with relatively low absolute numbers of claimants could see high percentage changes and vice versa.

---

<sup>8</sup> The denominator for the rate is calculated using the proportion of the economically active working age population in the 2001 census and the estimated resident working age population in 2008. This means the rates take account of recent population change but not any changes in the economically active population. Between the first quarter of 2001 and the same period in 2008 the Labour Force Survey estimates that economic activity rose by around 0.5 percentage points for the UK overall.

<sup>9</sup> <http://www.parliament.uk/commons/lib/research/briefings/snep-05217.pdf>. The methodology explained in this note is the same as that used in this paper, except this paper uses the 2008 working age population rather than the 2006 working age population.

#### 4.4 Party abbreviations

The following abbreviations for parties have been used:

LAB	Labour	DU	Democratic Unionist Party
CON	Conservative	SDLP	Social Democratic and Labour Party
LD	Liberal Democrat	SF	Sinn Fein
PC	Plaid Cymru	ALL	Alliance Party
SNP	Scottish National Party	GRN	Green Party
IND	Independent	SPKR	Speaker
VAC	Vacant
