

Unemployment by Constituency: June 2010

RESEARCH PAPER 10/43 16 June 2010

This paper presents labour market data for Parliamentary Constituencies. A summary of the latest national and regional labour market data is given, along with a selection of relevant constituency-level indicators including the latest Jobseeker's Allowance (JSA) claimant count data.

The latest data show:

- Claimant count unemployment fell by 30,900 to 1.48 million in May 2010 (seasonally adjusted). The claimant count rose between April and May 2010 in 25 constituencies and fell in 625 constituencies. Compared to May 2009, JSA claimant levels are now higher in 177 constituencies and lower in 473 constituencies.
- ILO unemployment rose by 23,000 over the last three months to 2.47 million (February-April 2010). The unemployment rate is 7.9% compared with 7.3% in the same period a year ago.
- Employment rose by 5,000 over the last three months to 28.87 million (February-April 2010). 72.1% of the working age population are in employment.
- Economic inactivity rose by 29,000 over the last three months to 8.19 million (February-April 2010). 21.5% of the working age population is economically inactive.

1 Monthly labour market statistics

Statistics on Jobseekers Allowance (JSA) claimants are one part of a large selection of labour market data released on a monthly basis.¹ This section highlights some of the key figures in the latest labour market release and also looks in more detail at changes in JSA claimants at a constituency level.

Unemployment

- JSA claimant count unemployment fell by 30,900 in May 2010 to 1.48 million.² It is 58,200 lower than in May 2009.
- The wider ILO based measure of unemployment was 2.47 million in the period February-April 2010, a rise of 23,000 from the last quarter, an increase of 192,000 compared with the same period a year ago and 422,000 higher than in April-June 1997. The unemployment rate is 7.9%, 0.1 percentage points higher than in the last quarter, and 0.6 percentage points higher than the same period a year ago.
- The number of people who have been unemployed (ILO measure) for longer than six months increased by 61,000 over the last quarter to 1.30 million (February-April 2010). This was 371,000 higher than in the same quarter a year ago.
- On a regional basis the highest rates of unemployment (ILO measure) were in the Yorkshire and the Humber (9.6%), North East (9.3%), London and the West Midlands (both 9.0%) (February-April 2010, see chart). Over the last year the ILO unemployment rate has increased across the UK by 0.6 percentage points. The greatest rises have been in Yorkshire and the Humber (1.5 percentage points), Scotland (1.4 percentage points) and the North East (1.1 percentage points).
- In February-April 2010 713,000 people aged 18-24 were unemployed (ILO measure), a fall of 2,000 on the previous quarter and a rise of 17,000 on the same quarter a year ago. The unemployment rate for those aged 18-24 is now 17.3%.

¹ The latest release is available at: <http://www.statistics.gov.uk/pdfdir/lmsuk0610.pdf>. This page is based on data from this release as well as http://www.statistics.gov.uk/OnlineProducts/LMS_FR_HS.asp (historical statistics) and NOMIS: <https://www.nomisweb.co.uk>. The figures used on this page are seasonally adjusted.

² Seasonally adjusted. The JSA data used in the remainder of this paper are not seasonally adjusted.

- 926,000 people aged 24 and under were (ILO) unemployed in February-April 2010, a rate of 19.6%.

Employment

- The number of people in employment (16 and over) rose by 5,000 over the last quarter to 28.87 million (February-April 2010); the number of people of working age in employment fell by 13,000 to 27.43 million in the same period. The employment rate for the working age population was 72.1%, 0.1 percentage points lower than the last quarter and a fall of 1.2 percentage points compared to the same quarter a year ago.
- Over the last quarter, full-time employment fell by 56,000 while part-time employment rose by 61,000. Compared to the same quarter one year ago overall employment fell by 213,000, full-time employment fell by 468,000 while part-time employment rose by 255,000.
- Employment in the public sector fell by 7,000 over the last quarter to 6.1 million (March 2010), while employment in the private sector rose by 12,000 to 22.78 million. Over the last year public sector employment has risen by 28,000 while private sector employment has fallen by 241,000.

Inactivity

- In February-April 2010 21.5% of the working age population were economically inactive (8.19 million), a rise of 29,000 on the previous quarter and up 298,000 compared to the same quarter a year ago. The number of people inactive due to being a student has fallen by 11,000 over the last quarter but has increased by 174,000 over the last year (a rise of 8.2% over the last year).

Vacancies and Earnings

- It is estimated that there were 492,000 vacancies in the UK in the three months to May 2010, a rise of 7,000 on the previous quarter and 47,000 higher than in the same period a year ago.³
- Average weekly total pay rose by 4.2% in the latest quarter to April 2010 compared to the same period a year ago; bonus pay was up 18.4% over the same period and regular pay increased by 1.9% over the same period.

³ This is based on a UK-wide vacancy survey; data on vacancies advertised through Jobcentre Plus is also available, and is the only vacancy indicator available at a local level. The total count of vacancies available at Jobcentre Plus in Great Britain in May 2010 was 280,398. See Section 2 for constituency level data.

Data for new constituencies

The majority of constituencies used in the General Election had seen boundary changes. The availability of labour market data for these new constituencies is outlined below:

- JSA claimant count data and rates are available back to 2004.
- ILO unemployment, Employment and Inactivity based on the Annual Population Survey are available. Model-based estimates of ILO unemployment are being developed.
- Earnings data based on the Annual Survey of Hours and Earnings (ASHE) will not be available until the next release in November 2010.
- Annual Business Inquiry (ABI) data is available (Employee jobs).

Change in claimant count in constituencies

Between May 2009 and May 2010 73% of constituencies saw a fall in the claimant count level (473 constituencies), while 27% recorded a rise (177 constituencies). Looking at changes in the past month an even greater proportion of constituencies have seen a fall in the claimant count: 96% (625 constituencies) have recorded a fall; only 4% (25 constituencies) have seen a rise.

The chart below shows the balance of constituencies that have experienced a monthly increase or decrease in the claimant count for the past year. This shows that a vast majority of constituencies have seen falls in the claimant count over the past three months. Note that these data are not seasonally adjusted and therefore do not take account of seasonal affects which can sometimes cause significant movements in the claimant count. For example, the seasonal effect associated with Christmas contributed to rises in the claimant count in almost all constituencies in January 2010.

For the last three months the JSA claimant count has fallen in most constituencies

Balance of constituencies with a monthly increase in JSA claimants (non-seasonally adjusted data)

Long-term unemployment

Data are available on a constituency basis relating to the duration of Jobseeker’s Allowance (JSA) claims and the age profile of claimants.⁴ The chart below shows a count of Parliamentary Constituencies based on whether the number of JSA claims of six months or more has increased, stayed the same or decreased over the last month and last three months for three age groups: those aged 24 and under, those aged between 25 and 49 and those aged 50 and over. Please note that these data are not seasonally adjusted.

May 2010, compared with April 2010, saw most constituencies experience a falling number of people claiming JSA for six months or more. This is true for all three age groups used in this analysis. However, the picture is more mixed when comparing May with three months previously (February), with the majority of constituencies recording an increase in the number of long-term JSA claimants in the 25-49 and over-50 age groups. By contrast, slightly more constituencies saw a decrease in long-term JSA claimants among those aged 24 and under than saw an increase.

People claiming JSA for six months or more, by age group, count of Parliamentary Constituencies

based on data rounded to the nearest 5, not seasonally adjusted

2 Constituency data

The remainder of this paper is made up of two tables and a series of maps presenting labour market data for the current Parliamentary Constituencies. The latest available data is shown, as well as comparisons with previous years and calculations of change and rankings. Section 4 of this paper provides a detailed overview of the sources used, methodology and copyrights; notes on using the data are also included here. Users should refer to these notes when using the tables; all data and maps are covered by Crown Copyright or Ordnance Survey Copyright.

Definitions of Unemployment

Two sources of data are used to describe 'unemployment' in the UK: the claimant count and ILO unemployment. The claimant count is an administrative count of those claiming Jobseeker's Allowance (JSA). It has the benefit of being timely, accurate, available since 2004 and for low-level geographies. The main problem with the count is that some of those looking for work and 'unemployed' do not, or cannot, claim JSA. The JSA claimant count is therefore an indicator of unemployment rather than a perfect measure of unemployment. The standard international measure of unemployment is ILO unemployment, a survey-based measure which captures the number of people looking for and available for work within a standard definition.⁵ The main problem with this measure is that at a local authority and constituency level it has a time lag and is subject to sampling variability.

Unemployment Rates

Two 'unemployment rates' are shown in this paper:

- The 'Library' rate is calculated by the Library and shows the number of JSA claimants as a proportion of the estimated economically active population of working age resident in each constituency in 2008. This calculation attempts to capture the effect of differences in economic activity in constituencies and is not an official unemployment rate. It is not currently available for Northern Ireland.
- The 'ONS' rate shows the number of JSA claimants as a proportion of the resident working age population in 2008. It is not currently available for Northern Ireland. Rates included in PQ answers will be based on this rate.

Also shown in this paper are:

- Employment rates (based on the working age population)
- JSA claimants by age
- Jobcentre Plus vacancies.

The parties shown in the tables relate to incumbents after the General Election.

National, regional and constituency level labour market data is available from NOMIS: <https://www.nomisweb.co.uk/>.

This paper is intended to provide answers to requests for frequently requested data; for further analysis or to comment on the content, Members of Parliament and their staff can contact the authors.

⁵ For further information see: ONS, [How exactly is unemployment measured?](#), April 2009

3 - Unemployment by constituency in May 2010

Constituencies in Great Britain (rates for Northern Ireland unavailable)

Library residence-based claimant rate, expressed as quintile groups (20% bands)

3 - Unemployment by constituency in May 2010

Selected major conurbations and surrounding areas - not to scale

Library residence-based claimant count rate, expressed as quintile groups (20% bands)

Greater London

Edinburgh and Glasgow

Unemployment rate

residence based claimant count

- Top quintile (7.2% to 19.6%)
- Fourth quintile (5.4% to 7.2%)
- Third quintile (4.2% to 5.4%)
- Second quintile (3.0% to 4.2%)
- Bottom quintile (1.2% to 3.0%)

Greater Manchester

West Midlands

3 - Unemployment by constituency in May 2010

Selected major conurbations and surrounding areas - not to scale

Library residence-based claimant count rate, expressed as quintile groups (20% bands)

Tyne and Wear

South Yorkshire

Unemployment rate

residence based claimant count

- Top quintile (7.2% to 19.6%)
- Fourth quintile (5.4% to 7.2%)
- Third quintile (4.2% to 5.4%)
- Second quintile (3.0% to 4.2%)
- Bottom quintile (1.2% to 3.0%)

West Yorkshire

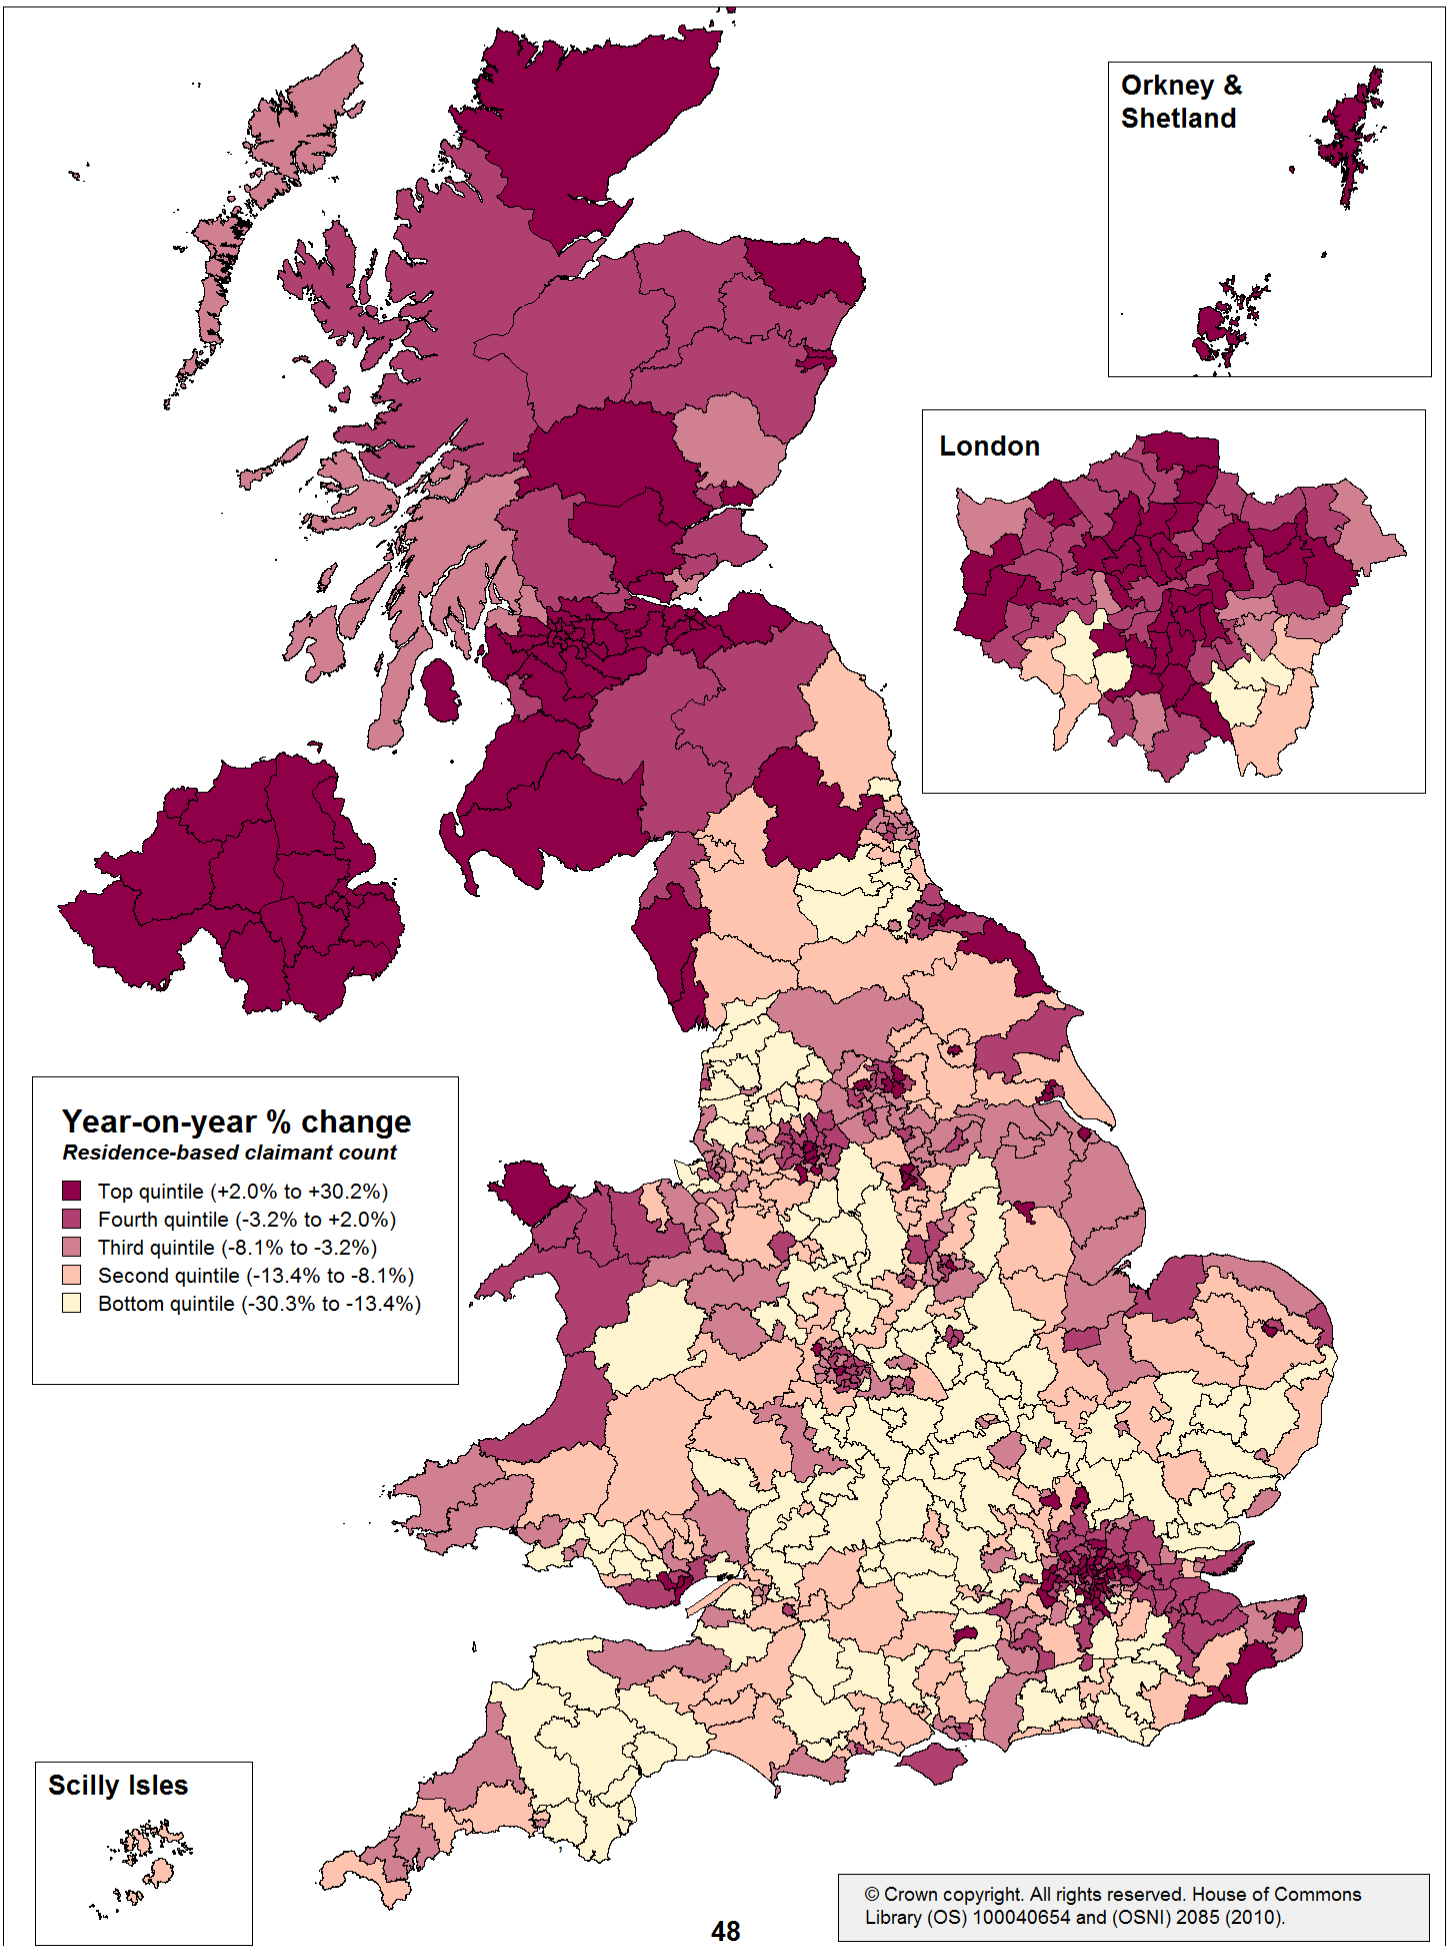

Merseyside

3 - Percentage change in claimant count

Constituencies in United Kingdom, May 2009 to May 2010

Percentage change in residence-based claimant count, expressed as quintile groups (20% bands)

4 Sources, copyright and methodology

4.1 Sources and copyright

The original source for all data in this paper is the Office for National Statistics (ONS). Changes over time, rankings, the ratio of JSA claimants to vacancies and the 'Library rate' have been calculated by the Library. The specific source for data is shown below:

- JSA claimant count: non-seasonally adjusted data, downloaded from NOMIS: <https://www.nomisweb.co.uk/>. As unemployment has a seasonal pattern, comparisons should be made using the same month in each year. Data for constituencies is available from 2004 onwards.
- Library rate is based on the Library's estimate of the resident economically active working age population, as outlined in section 4.2. These rates are higher than the ONS rates because they are percentages of the economically active working age population rather than the whole working-age population (as used by ONS).
- *ONS Rate* is based on the resident working age population and published alongside JSA claimant count data on NOMIS.
- *Age and duration breakdowns for JSA claimants* are also available from NOMIS.
- *Employment Rate* is based on the Annual Population Survey (APS) by ONS and is available from their website.⁶ This is a survey-based estimate and subject to sampling variability.
- *Jobcentre Plus vacancies* are available from the NOMIS website. They relate to 'live unfilled vacancies', which are vacancies notified to Jobcentre Plus and currently thought to be unfilled. A large number of vacancies are not notified to Jobcentre Plus, and the rate of notification can depend on location, occupation and industry. Data for Lincoln is affected by armed forces recruitment.

Unavailable figures are denoted in the tables by a '..'.

Claimant rates and figures on JSA claimants per vacancy are rounded to one decimal place.

The denominators used in this paper are partly derived from the 2001 Census. Census data for England and Wales are published by the Office for National Statistics. Census data for Scotland are published by the General Register Office for Scotland. Census data for Northern Ireland are published by the Northern Ireland Statistics and Research Agency. Census data are © Crown copyright.

The source of the data on claimant count and population levels contained in this publication is National Statistics (NOMIS database) © Crown copyright.

All mapping is © Ordnance Survey and Ordnance Survey Northern Ireland and **must not** be reproduced without permission

4.2 Unemployment rate methodology

Two 'unemployment rates' are shown in this paper. The 'ONS' rate is that published by ONS with the data and is calculated using the resident working age population in 2008 for England, Wales and Scotland. Rates included in PQ answers will be based on this rate. The

⁶ <http://www.statistics.gov.uk/STATBASE/Product.asp?vlnk=14160>

'Library' rate is calculated by the Library and shows the number of claimants as a proportion of the estimated economically active population of working age resident in each constituency in 2008.⁷ For an exposition of the methodology used to calculate the unemployment rates displayed in this paper see Library Standard Note *Unemployment by Constituency: change in methodology*.⁸ Rates are not currently available for Northern Ireland.

This methodology will be updated when ONS changes the definition of working age in August 2010 to take account of the change in the state pension age for women. The population estimates used will also be updated when new data is used in ONS labour market releases.

The rates presented in this paper should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live.

While the Library rates are based on the latest population estimates at a constituency level, they are constrained by the use of the proportion of the population economically active in 2001. Where constituencies have seen major demographic shifts or socio-economic change since 2001 the methodology used to calculate the rates may be less accurate in fully reflecting current unemployment rates.

4.3 Map notes

The following notes should be borne in mind when drawing conclusions from these maps:

- The maps on pages 45-47 show residence-based claimant count rates for May 2010 for constituencies in the United Kingdom, with an expanded view of constituencies in selected major conurbations and surrounding areas.
- The map on page 48 shows the percentage change in residence-based claimant count levels between May 2009 and May 2010 for constituencies in the United Kingdom.
- In both maps the constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 130 constituencies (20% of the total in the United Kingdom). The range in each group is shown on the map, but these ranges are not equal.
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.
- Considering the percentage change does not take account of the absolute level of claimants by constituency. Constituencies with relatively low absolute numbers of claimants could see high percentage changes and vice versa.

⁷ The denominator for the rate is calculated using the proportion of the economically active working age population in the 2001 census and the estimated resident working age population in 2008. This means the rates take account of recent population change but not any changes in the economically active population. Between the first quarter of 2001 and the same period in 2008 the Labour Force Survey estimates that economic activity rose by around 0.5 percentage points for the UK overall.

⁸ <http://www.parliament.uk/commons/lib/research/briefings/snep-05217.pdf>. The methodology explained in this note is the same as that used in this paper, except this paper uses the 2008 working age population rather than the 2006 working age population.

4.4 Party abbreviations

The following abbreviations for parties have been used:

LAB	Labour	DU	Democratic Unionist Party
CON	Conservative	SDLP	Social Democratic and Labour Party
LD	Liberal Democrat	SF	Sinn Fein
PC	Plaid Cymru	ALL	Alliance Party
SNP	Scottish National Party	GRN	Green Party
IND	Independent	SPKR	Speaker
VAC	Vacant
