

Unemployment by Constituency, September 2010

RESEARCH PAPER 10/58 15 September 2010

This paper presents labour market data for Parliamentary Constituencies. A summary of the latest national and regional labour market data is given, along with a selection of relevant constituency-level indicators including the latest Jobseeker's Allowance (JSA) claimant count data.

The latest data show:

- Claimant count unemployment rose by 2,300 to 1.47 million in August 2010 (seasonally adjusted). Compared with August 2009, JSA claimant levels are now lower in 564 constituencies (87%) and higher in 86 constituencies (13%).
- ILO unemployment fell by 8,000 over the last three months to 2.47 million (May-July 2010). The unemployment rate is 7.8%, compared with 7.9% in the same period a year ago.
- Employment rose by 286,000 over the last three months to 29.16 million (May-July 2010). The employment rate is 70.7%, up by 0.4 percentage points on the quarter. In this period private sector employment rose by 308,000, while public sector employment fell by 22,000.
- Economic inactivity among 16- to 64-year-olds fell by 158,000 over the last three months to 9.26 million (23.2% of the age group).

1 Monthly labour market statistics

Statistics on Jobseeker's Allowance (JSA) claimants are one part of a large selection of labour market data released on a monthly basis.¹ This section highlights some of the key figures in the latest labour market release and also looks in more detail at changes in JSA claimants at a constituency level.

Unemployment

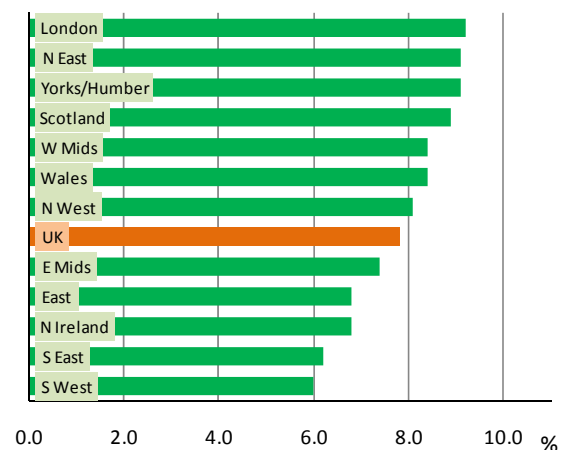

- JSA claimant count unemployment rose by 2,300 in August 2010 to 1.47 million.² It is 135,500 lower than in August 2009.
- The wider ILO-based measure of unemployment was 2.47 million in the period May-July 2010, a fall of 8,000 from the last quarter, and a decline of 5,000 compared with the same period a year ago. The unemployment rate is 7.8%, 0.1 percentage points lower compared with the last quarter and the same period a year ago.

- The number of people who have been unemployed (ILO measure) for longer than six months decreased by 23,000 over the last quarter to 1.28 million (May-July 2010). This was 208,000 higher than in the same quarter a year ago.

- On a regional basis the highest rates of unemployment (ILO measure) were in London (9.2%), Yorkshire and the Humber and the North East (both at 9.1%) (May-July 2010, see chart). Over the last year the ILO unemployment rate fell by 0.1 percentage points across the UK. The greatest rise was in Scotland (1.8 percentage points) followed by Wales and the East of England (both up by 0.3 percentage points), while the West Midlands saw, by far, the largest year-on-year fall (-2.2 percentage points).

ILO Unemployment rate by region, May-Jul 2010

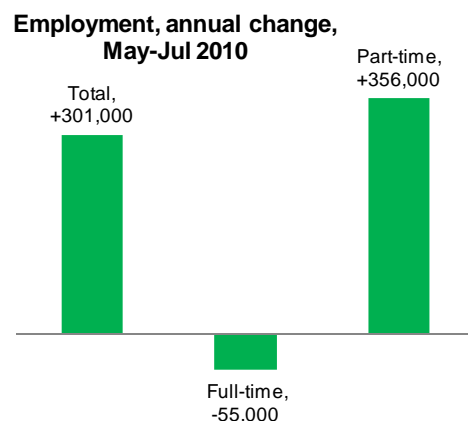

- In May-July 2010 728,000 people aged 18-24 were unemployed (ILO measure), a rise of 16,000 on the previous quarter and an increase of 2,000 on the same quarter a year ago. The unemployment rate for those aged 18-24 is 17.4%.
- 915,000 people aged 24 and under were (ILO) unemployed in May-July 2010, a rate of 19.2%.

¹ The latest release is available at: <http://www.statistics.gov.uk/pdfdir/lmsuk0910.pdf>. This page is based on data from this release as well as http://www.statistics.gov.uk/OnlineProducts/LMS_FR_HS.asp (historical statistics) and NOMIS: <https://www.nomisweb.co.uk>. The figures used on this page are seasonally adjusted.

² Seasonally adjusted. The JSA data used in the remainder of this paper are not seasonally adjusted.

Employment

- The number of people in employment (16 and over) rose by 286,000 over the last quarter to 29.16 million (May-July 2010); the number of people aged 16-64 in employment rose by 214,000 to 28.29 million in the same period. The employment rate for those aged 16-64 was 70.7%, 0.4 percentage points higher than the last quarter – the largest quarterly increase since 1989 – and 0.1 percentage points higher compared with the same quarter a year ago.
- Over the last quarter, full-time employment rose by 121,000 while part-time employment rose by 166,000 to stand at 7.93 million. Part-time workers now account for 27.2% of all in employment, the highest proportion since comparable records began in 1992. Compared to the same quarter one year ago overall employment rose by 301,000, full-time employment fell by 55,000 while part-time employment rose by 356,000.
- Over the last quarter public sector employment fell by 22,000 to 6.05 million (20.8% of all employment, down from 21.0%), while private sector employment rose by 308,000 to 23.11 million.

Inactivity

- In May-July 2010 23.2% of those aged 16-64 were economically inactive (9.26 million), a fall of 158,000 on the previous quarter but up 31,000 compared with the same quarter a year ago. The number of people inactive due to being a student has fallen by 107,000 over the last quarter but has increased by 53,000 over the last year (a rise of 2.5%).

Vacancies and Earnings

- It is estimated that there were 467,000 vacancies in the UK in the three months to August 2010, a fall of 14,000 on the previous quarter but 31,000 higher than in the same period a year ago.³
- Average weekly total pay rose by 1.5% in the period May-July 2010 compared with the same period a year ago; bonus pay was down by 3.4%, while regular pay (excluding bonuses) increased by 1.8%.

Data for new constituencies

The majority of constituencies used in the General Election had undergone boundary changes. The availability of labour market data for these new constituencies is outlined below:

³ This is based on a UK-wide vacancy survey; data on vacancies advertised through Jobcentre Plus is also available, and is the only vacancy indicator available at a local level. The total count of vacancies available at Jobcentre Plus in Great Britain in August 2010 was 280,216. See Section 2 for constituency level data.

- JSA claimant count data and rates are available back to 2004.
- ILO unemployment, Employment and Inactivity based on the Annual Population Survey are available. Model-based estimates of ILO unemployment are being developed.
- Earnings data based on the Annual Survey of Hours and Earnings (ASHE) will not be available until the next release in November 2010.
- Annual Business Inquiry (ABI) data is available (Employee jobs).

Change in claimant count in constituencies

Between August 2009 and August 2010 87% of constituencies saw a fall in the claimant count level (564 constituencies), while 13% recorded a rise (86 constituencies). Between July 2010 and August 2010 fewer constituencies saw a fall in the claimant count: 33% (214 constituencies) recorded a fall; 67% (436 constituencies) saw a rise.

The chart below shows the balance of constituencies that have experienced a monthly increase or decrease in the claimant count for the past year. This shows that in the last month a majority of constituencies saw a rise in the JSA claimant count; this followed five months of net falls in constituency claimant counts. Note that these data are not seasonally adjusted and therefore do not take account of seasonal affects which can sometimes cause significant movements in the claimant count. For example, the seasonal effect associated with Christmas contributed to rises in the claimant count in almost all constituencies in January 2010.

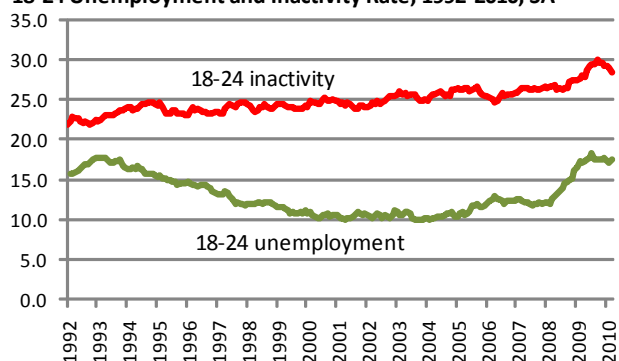

By constituency, unemployment rose in August 2010 after five months of net falls

Balance of constituencies with an increase in JSA claimants (non-seasonally adjusted data)

Youth Unemployment

The rise in youth unemployment has been of particular interest over the last year. After peaking in mid-2009, levels and rates of youth unemployment have shown small declines. The latest data show that in May-July 2010 there were 915,000 16-24 year olds unemployed, a fall of 30,000 compared to the same period a year ago. There were 728,000 18-24 year olds unemployed in May-July 2010, a rise of 2,000 compared to the previous year. The unemployment rate for those aged 18-24 is currently 17.4%, unchanged compared to a year ago and 0.8 percentage points lower than the peak in August-October 2009. Economic inactivity rates also show a similar trend for those aged 18-24 over recent months with a 1.6 percentage-point fall from the peak at the turn of this year; in May-July 2010 28.3% of those aged 18-24 were inactive. The chart below shows the 18-24 unemployment and economic inactivity rates since 1992, while the table shows unemployment levels and rates between 1992 and 2010.

18-24 Unemployment and Inactivity Rate, 1992-2010, SA**16-24 and 18-24 ILO Unemployment, SA**

	16-24 year olds		18-24 year olds

May-Jul 1997	687	505		13.6
May-Jul 2005	598	423		10.6
May-Jul 2008	725	540		12.9
May-Jul 2009	945	727		17.4
May-Jul 2010	915	728		17.4

Source: Labour Force Survey

At a constituency level, while survey based estimates are available, a more timely indicator of levels of youth unemployment is given by JSA claimants aged 24 and under. On average the number of JSA claimants 24 and under in a constituency fell by 109 or 15%. Over the last year 46 constituencies have seen a rise in young people claiming JSA whilst 599 have seen a fall. The table below shows the ten constituencies with the greatest increases and decreases in claimants aged 24 and under over the last year, ordered firstly by the change in the level over the last year and secondly by the percentage change over the last year. A breakdown of JSA claimants by age is shown for all constituencies in table 2 of this paper.

Change in JSA claimants 24 and under, ten constituencies with the highest annual increase and decrease, August 2010*not seasonally adjusted, data rounded to the nearest 5*

Ordered by change in level				Ordered by percentage change

2 Constituency data

The remainder of this paper is made up of two tables and a series of maps presenting labour market data for the current Parliamentary Constituencies. The latest available data is shown, as well as comparisons with previous years and calculations of change and rankings. Section 4 of this paper provides a detailed overview of the sources used, methodology and copyrights; notes on using the data are also included there. Users should refer to these notes when using the tables; all data and maps are covered by Crown Copyright or Ordnance Survey Copyright.

Definitions of Unemployment

Two sources of data are used to describe 'unemployment' in the UK: the claimant count and ILO unemployment. The claimant count is an administrative count of those claiming Jobseeker's Allowance (JSA). It has the benefit of being timely, accurate, available since 2004 and for low level geographies. The main problem with the claimant count is that some of those looking for work and 'unemployed' do not, or cannot, claim JSA. The JSA claimant count is therefore an indicator of unemployment rather than a perfect measure of unemployment. The standard international measure of unemployment is ILO unemployment, a survey-based measure which captures the number of people looking for and available for work within a standard definition.⁴ The main problem with this measure is that at a local authority and constituency level it has a time lag and is subject to sampling variability.

Unemployment Rates

Two 'unemployment rates' (JSA claimant rates) are shown in this paper:

- The 'Library' rate is calculated by the Library and shows the number of JSA claimants as a proportion of the estimated economically active population aged 16 to 64 resident in each constituency in 2008. This calculation attempts to capture the effect of differences in economic activity in constituencies and is not an official unemployment rate.
- The 'ONS' rate shows the number of JSA claimants as a proportion of the resident population aged 16 to 64 in 2008. Rates included in PQ answers will be based on this rate.

Also shown in this paper are:

- Employment rates (based on the population aged 16 to 64)
- JSA claimants by age
- Jobcentre Plus vacancies.

The parties shown in the tables relate to incumbents after the General Election.

National, regional and constituency level labour market data is available from NOMIS: <https://www.nomisweb.co.uk/>.

This paper is intended to provide answers to requests for frequently requested data; for further analysis or to comment on the content, Members of Parliament and their staff can contact the authors.

⁴ For further information see: ONS, [How exactly is unemployment measured?](#), April 2009

3 - Unemployment by constituency in August 2010

Constituencies in United Kingdom

Library residence-based claimant rate, expressed as quintile groups (20% bands)

3 - Unemployment by constituency in August 2010

Selected major conurbations and surrounding areas - not to scale

Library residence-based claimant count rate, expressed as quintile groups (20% bands)

Greater London

Edinburgh and Glasgow

Unemployment rate

residence based claimant count

- Top quintile (7.0% to 19.9%)
- Fourth quintile (5.1% to 7.0%)
- Third quintile (4.0% to 5.1%)
- Second quintile (2.7% to 4.0%)
- Bottom quintile (1.1% to 2.7%)

Greater Manchester

West Midlands

3 - Unemployment by constituency in August 2010

Selected major conurbations and surrounding areas - not to scale

Library residence-based claimant count rate, expressed as quintile groups (20% bands)

Tyne and Wear

South Yorkshire

Unemployment rate

residence based claimant count

- Top quintile (7.0% to 19.9%)
- Fourth quintile (5.1% to 7.0%)
- Third quintile (4.0% to 5.1%)
- Second quintile (2.7% to 4.0%)
- Bottom quintile (1.1% to 2.7%)

West Yorkshire

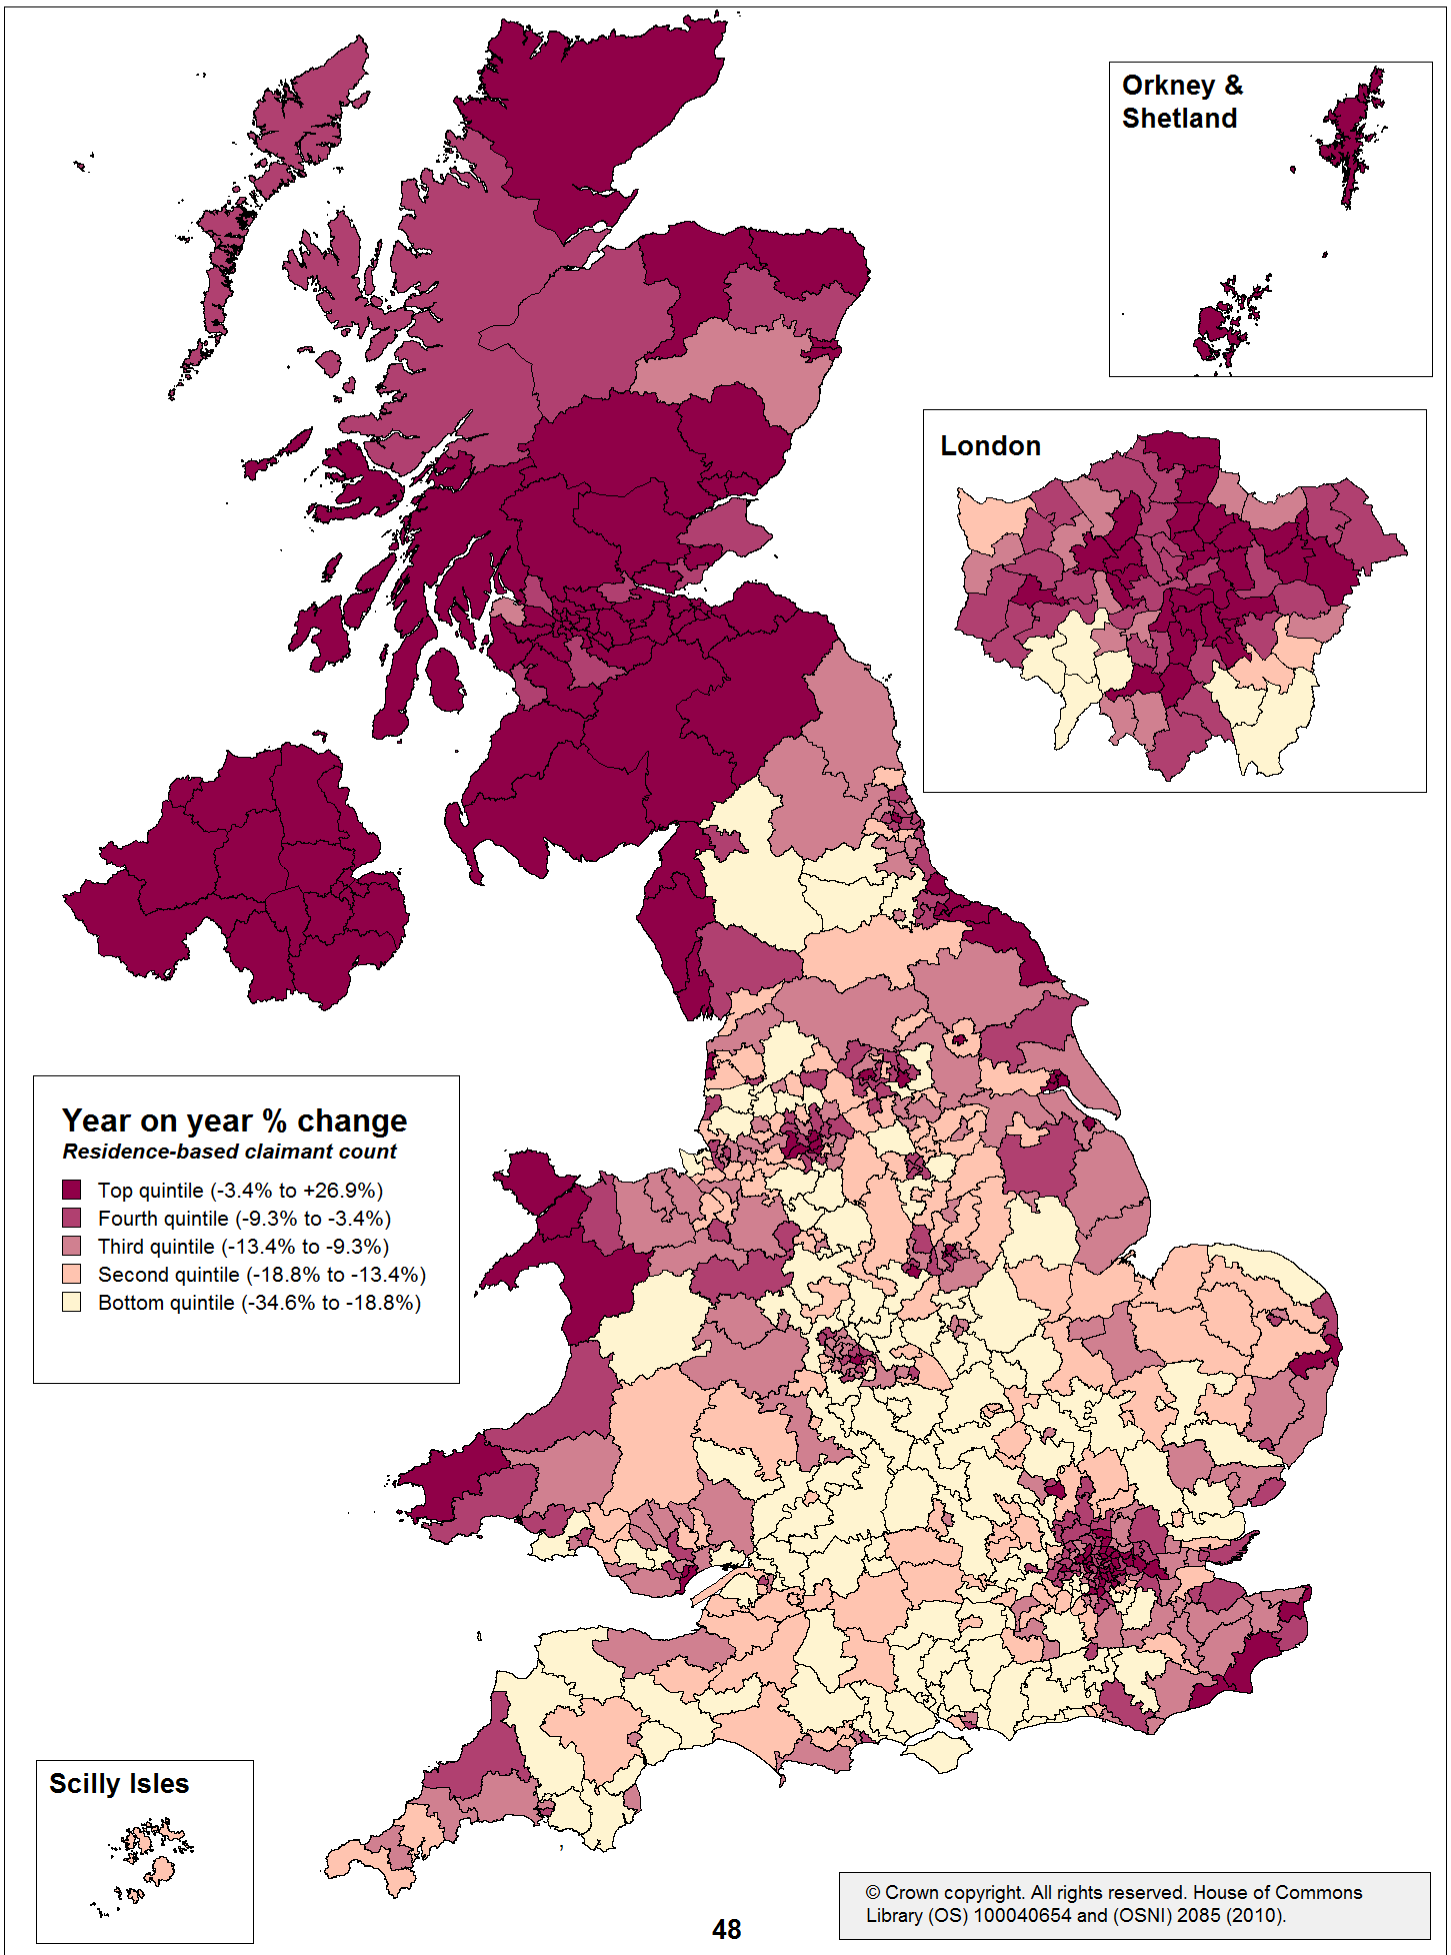

Merseyside

3 - Percentage change in claimant count

Constituencies in United Kingdom, August 2009 to August 2010

Percentage change in residence-based claimant count, expressed as quintile groups (20% bands)

4 Sources, copyright and methodology

4.1 Sources and copyright

The original source for all data in this paper is the Office for National Statistics (ONS). Changes over time, rankings, the ratio of JSA claimants to vacancies and the 'Library rate' have been calculated by the Library. The specific source for data is shown below:

- JSA claimant count: non-seasonally adjusted data, downloaded from NOMIS: <https://www.nomisweb.co.uk/>. As unemployment has a seasonal pattern, comparisons should be made using the same month in each year. Data for constituencies is available from 2004 onwards.
- Library rate is based on the Library's estimate of the resident economically active population aged 16 to 64, as outlined in section 4.2. These rates are higher than the ONS rates because they are percentages of the *economically active* population in this age range rather than the whole population in the age range (as used by ONS).
- *ONS Rate* is based on the resident population aged 16 to 64 and published alongside JSA claimant count data on NOMIS.
- *Age and duration breakdowns for JSA claimants* are also available from NOMIS.
- *Employment Rate* is based on the Annual Population Survey (APS) by ONS and is available from their website.⁵ This is a survey-based estimate and subject to sampling variability.
- *Jobcentre Plus vacancies* are available from the NOMIS website. They relate to 'live unfilled vacancies', which are vacancies notified to Jobcentre Plus and currently thought to be unfilled. A large number of vacancies are not notified to Jobcentre Plus, and the rate of notification can depend on location, occupation and industry. Data for Lincoln is affected by armed forces recruitment.

Unavailable figures are denoted in the tables by a '..'.

Claimant rates and figures on JSA claimants per vacancy are rounded to one decimal place.

The denominators used in this paper are partly derived from the 2001 Census. Census data for England and Wales are published by the Office for National Statistics. Census data for Scotland are published by the General Register Office for Scotland. Census data for Northern Ireland are published by the Northern Ireland Statistics and Research Agency. Census data are © Crown copyright.

The source of the data on claimant count and population levels contained in this publication is National Statistics (NOMIS database) © Crown copyright.

All mapping is © Ordnance Survey and Ordnance Survey Northern Ireland and **must not** be reproduced without permission

4.2 Unemployment rate methodology

Two 'unemployment rates' are shown in this paper. The 'ONS' rate is that published by ONS with the data and is calculated using the resident population aged 16 to 64 in 2008. Rates included in PQ answers will be based on this rate. The 'Library' rate is calculated by the

⁵ http://www.statistics.gov.uk/onlineproducts/lms_regional.asp

Library and shows the number of claimants as a proportion of the estimated economically active population aged 16 to 64 resident in each constituency in 2008.⁶ For an exposition of the methodology used, see Library Standard Note [Unemployment by Constituency: change in methodology](#).⁷

This methodology was updated as of the August 2010 edition when ONS changed the definition of working age to take account of the change in the state pension age for women. For an explanation of the shift away from the working-age population to the population aged 16 to 64, see Library Standard Note [Unemployment by Constituency: changes to working-age rates](#).⁸

The rates presented in this paper should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live.

While the Library rates are based on the latest population estimates at a constituency level, they are constrained by the use of the proportion of the population economically active in 2001. Where constituencies have seen major demographic shifts or socio-economic change since 2001 the methodology used to calculate the rates may be less accurate in fully reflecting current unemployment rates.

4.3 Map notes

The following notes should be borne in mind when drawing conclusions from these maps:

- The maps on pages 45-47 show residence-based claimant count rates for August 2010 for constituencies in the United Kingdom, with an expanded view of constituencies in selected major conurbations and surrounding areas.
- The map on page 48 shows the percentage change in residence-based claimant count levels between August 2009 and August 2010 for constituencies in the United Kingdom.
- In both maps the constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 129 constituencies (20% of the total in the United Kingdom). The range in each group is shown on the map, but these ranges are not equal.
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.
- Considering the percentage change does not take account of the absolute level of claimants by constituency. Constituencies with relatively low absolute numbers of claimants could see high percentage changes and vice versa.

⁶ The denominator for the rate is calculated using the proportion of the economically active population aged 16 to 64 in the 2001 census and the estimated resident population aged 16 to 64 in 2008. This means the rates take account of recent population change but not any changes in the economically active population. Between the first quarter of 2001 and the same period in 2008 the Labour Force Survey estimates that economic activity rose by around 0.5 percentage points for the UK overall.

⁷ <http://www.parliament.uk/briefingpapers/commons/lib/research/briefings/snep-05217.pdf>. The methodology explained in this note is the same as that used in this paper, except this paper uses the 2008 population aged 16 to 64 rather than the 2006 working age population.
