

Unemployment by Constituency, March 2011

RESEARCH PAPER 11/26 16 March 2011

This paper presents labour market data for Parliamentary Constituencies. A summary of the latest national and regional labour market data is given, along with a selection of relevant constituency-level indicators including the latest Jobseeker's Allowance (JSA) claimant count data.

The latest data show:

- JSA claimant count unemployment decreased by 10,200 in February 2011 to 1.45 million
- The wider ILO measure of unemployment rose to 2.53 million in the period November-January 2011, the highest level since 1994.
- Employment in the public sector fell by 45,000 over the last quarter to 6.2 million (December 2010), while employment in the private sector rose by 77,000 to 23.0 million. Over the last year public sector employment has fallen by 132,000 while private sector employment has increased by 428,000.
- The number of people in employment aged 16 and over rose by 32,000 over the last quarter to 29.16 million (November-January 2011). This was made up of a 56,000 increase in the number of people aged 65 and over in employment, while for all other age groups (ages 16-64) employment fell by 24,000.
- This edition of Unemployment by Constituency contains a special section on job vacancy statistics.

1 Monthly labour market statistics

Statistics on Jobseekers Allowance (JSA) claimants are one part of a large selection of labour market data released on a monthly basis.¹ This section highlights some of the key figures in the latest labour market release and also looks in more detail at changes in JSA claimants at a constituency level.

Unemployment

- JSA claimant count unemployment decreased by 10,200 in February 2011 to 1.45 million people aged 18 or over.² It is 128,100 lower than in February 2010, a decrease of 8.1%.
- The wider ILO-based measure of unemployment was 2.53 million in the period November-January 2011, a rise of 27,000 from the last quarter, and an increase of 87,000 compared with the same period a year ago. Unemployment is at its highest level since September-November 1994
- The unemployment rate was 8.0%, 0.1 percentage points higher than the last quarter and 0.2 percentage points higher than a year ago.

Measuring unemployment

Two sets of statistics are used to measure unemployment:

- **The claimant count** – the number of people claiming Jobseekers Allowance. This is the most up to date information and is available for local areas.
- **ILO unemployment** – the standard international measure, which includes everyone looking for and available for work, whether or not they are claiming Jobseekers Allowance. This is measured using surveys; data for constituencies and local authorities have a time lag and are subject to more sampling variation.

- The number of people who have been unemployed (ILO measure) for longer than twelve months increased by 9,000 over the last quarter to 848,000 (November-January 2011). This was 166,000 higher than in the same quarter a year ago.
- On a regional basis the highest rates of unemployment (ILO measure) were in the North East (10.2%) and West Midlands (9.9%) (November-January 2011, see chart). Over the last year the greatest rise in the ILO unemployment rates was in Northern Ireland (up 1.7 percentage points) followed by the North East (up 1.0 percentage points). The North West saw the largest year-on-year fall (down 0.9 percentage points), followed by Wales (down 0.5 percentage points).

¹ The latest release is available at: <http://www.statistics.gov.uk/pdfdir/lmsuk0311.pdf>. This page is based on data from this release as well as http://www.statistics.gov.uk/OnlineProducts/LMS_FR_HS.asp (historical statistics) and NOMIS: <https://www.nomisweb.co.uk>. The figures used on this page are seasonally adjusted.

² Seasonally adjusted, and for claimants aged 18+. The JSA data used in the remainder of this paper are not seasonally adjusted.

ILO unemployment rate by region and country, Nov-Jan 2011

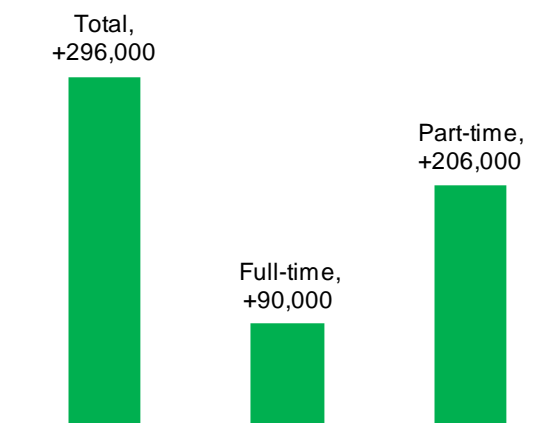

- In November-January 2011, 974,000 people aged 16-24 were unemployed (ILO measure), an increase of 30,000 on the previous quarter and a rise of 58,000 compared with the same quarter a year ago. The unemployment rate for those aged 16-24 is 20.6%, an increase of 0.8 percentage points on the previous quarter and of 1.0 percentage points on the previous year. Both the number of unemployed people aged 16-24 and the unemployment rate for this age group are now at their highest levels since ONS's current series began in 1992.

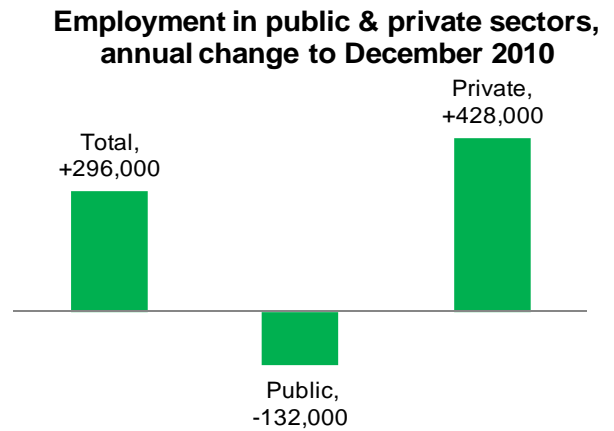

Employment

- The number of people in employment (16 and over) rose by 32,000 over the last quarter to 29.16 million (November-January 2011). The employment rate for those aged 16-64 was 70.5%, 0.1 percentage points lower than the last quarter but 0.1 percentage points higher than a year ago.
- In November-January 2011, the number of people aged 65 and over in employment rose by 56,000 to 900,000 compared with the previous quarter. Employment among people aged 16-64 fell by 24,000.
- Over the last quarter, full-time employment increased by 75,000 to 21.24 million while part-time employment fell by 43,000 to stand at 7.91 million. Part-time workers account for 27.1% of all in employment. Compared to the same quarter one year ago overall employment rose by 296,000, full-time employment rose by 90,000 while part-time employment increased by 206,000.
- The number of people who are working in part-time jobs because they could not find a full-time job rose to 1.17 million in November-January 2011, equal to 15.1% of all part-time workers.

Employment, annual change, to November-January 2011

- The number of people working as temporary employees was 1.55 million in November-January 2011, down 32,000 on the previous quarter but up 111,000 on the previous year. 37.6% of people working as temporary employees are doing so because they could not find a permanent job.
- Employment in the public sector fell by 45,000 over the last quarter to 6.2 million (December 2010), while employment in the private sector rose by 77,000 to 23.0 million. Over the last year public sector employment has fallen by 132,000 while private sector employment has increased by 428,000.
- Public sector employment at a regional level fell most in Yorkshire & the Humber (-22,000) and in the North West (-19,000) in the year to December 2010.

Inactivity

- In the period November-January 2011, 9.33 million (or 23.3%) people aged 16-64 were economically inactive, a rise of 43,000 on the previous quarter but 67,000 lower compared with the same quarter a year ago.
- About a quarter (23.3% or 2.36 million) of economically inactive people say they want a job.

Earnings

- Average weekly total pay rose by 2.3% in the period November-January 2011 in Great Britain compared with the same period a year ago; bonus pay was up by 0.3%, while regular pay (which excludes bonuses) increased by 2.2%.
- Average weekly total pay in the private sector rose by 2.3% in the period November-January 2011, while average weekly total pay in the public sector also rose by 2.3%.

Change in claimant count in constituencies

Between February 2010 and February 2011, 560 constituencies (86%) saw a fall in the claimant count level, while 90 (14%) recorded a rise. Between January 2011 and February 2011 many more constituencies saw a rise in the claimant count: 565 constituencies (87%) recorded a rise; whereas 82 constituencies (13%) saw a fall (3 were unchanged).

The chart below shows the balance of constituencies that have experienced an increase or decrease in the claimant count over each month in the past year.

Note that these data are not seasonally adjusted and therefore do not take account of seasonal effects which can sometimes cause significant movements in the claimant count. For example, the seasonal effect associated with Christmas will have contributed to the rises in the claimant count in almost all constituencies in January 2011, as was the case in January 2010. Please also be aware that the national claimant count figures are seasonally adjusted and showed the claimant count falling by 10,200 in February, as opposed to the non-seasonally adjusted figures which showed a rise of 33,100.

Unemployment rose in more constituencies than it fell for third successive month

Balance of constituencies with an increase in JSA claimants (non-seasonally adjusted data)

Job vacancies

Based on the Office for National Statistics' UK-wide vacancy survey, it is estimated that there were 496,000 vacancies in the UK in the three months to February 2011, a rise of 24,000 on the previous quarter and 15,000 higher than in the same period a year ago.

Local statistics on vacancies are restricted to vacancies advertised through Jobcentre Plus.³ There were 258,800 live vacancies advertised through Jobcentre Plus in Great Britain in February 2011.^{4,5} Over the whole of Great Britain, there were an average of 5.7 people claiming Jobseekers Allowance in February for every vacancy advertised through Jobcentre Plus.

The map page 5 shows the average number of Jobseekers Allowance claimants per Jobcentre Plus vacancy in each constituency in Great Britain. Table 2, starting on Page 29, contains the figures for every constituency.⁶

About two-fifths (42%) of constituencies had less than 5 claimants per vacancy in February 2011, another third (35%) had 5 to 10 claimants per vacancy and a fifth (22%) had 10 or more claimants per vacancy on average. Note that a high ratio of claimants to vacancies in a particular constituency may be of less concern if there are jobs available in nearby constituencies and people are able to travel to them.

³ The postcode of the vacancy is used to determine its location in most cases. In 1% of cases, the postcode of the Jobcentre Plus office is used. Occasionally this process throws up spurious figures – for example, Lincoln local authority includes all national vacancies notified by the Ministry of Defence since these are recorded against a single central postcode irrespective of actual location.

⁴ This data is not seasonally adjusted.

⁵ Details of vacancies for Northern Ireland as a whole are published in the monthly Northern Ireland Labour Market Report, available at: <http://www.detini.gov.uk/labour-market-report-lmr>. Detailed data for Northern Ireland Local Government Districts is included in occasional Statistical Bulletins on vacancies from the Northern Ireland Department for Employment and Learning: <http://www.delni.gov.uk/index/statsandresearch/labour-market-information-stats/vacancies.htm>

⁶ Data for individual constituencies can vary significantly from month to month, so should be treated with some caution.

Constituencies with the highest and lowest average number of Jobseekers Allowance claimants per Jobcentre Plus vacancy, Great Britain, February 2011

Parliamentary constituency	Claimants per vacancy
Kingston upon Hull North	44.3
Birmingham, Hodge Hill	41.8
Glasgow North West	40.5
Middlesbrough South and East Cleveland	35.5
Inverclyde	35.4
West Dunbartonshire	35.3

2 Constituency data

The remainder of this paper is made up of two tables and a series of maps presenting labour market data for the current Parliamentary Constituencies. The latest available data is shown, as well as comparisons with previous years and calculations of change and rankings. Section 4 of this paper provides a detailed overview of the sources used, methodology and copyrights; notes on using the data are also included there. Users should refer to these notes when using the tables; all data and maps are covered by Crown Copyright or Ordnance Survey Copyright.

Definitions of Unemployment

Two sources of data are used to describe ‘unemployment’ in the UK: the claimant count and ILO unemployment. The claimant count is an administrative count of those claiming Jobseeker’s Allowance (JSA). It has the benefit of being timely, accurate, available since 2004 and for low level geographies. The main problem with the claimant count is that some of those looking for work and ‘unemployed’ do not, or cannot, claim JSA. The JSA claimant count is therefore an indicator of unemployment rather than a perfect measure of unemployment. The standard international measure of unemployment is ILO unemployment, a survey-based measure which captures the number of people looking for and available for work within a standard definition.⁷ The main problem with this measure is that at a local authority and constituency level it has a time lag and is subject to sampling variability.

Unemployment Rates

Two ‘unemployment rates’ (JSA claimant rates) are shown in this paper:

- The ‘Library’ rate is calculated by the Library and shows the number of JSA claimants as a proportion of the estimated economically active population aged 16 to 64 resident in each constituency in 2008. This calculation attempts to capture the effect of differences in economic activity in constituencies and is not an official unemployment rate.
- The ‘ONS’ rate shows the number of JSA claimants as a proportion of the resident population aged 16 to 64 in 2008. Rates included in PQ answers will be based on this rate.

Also shown in this paper are:

- Employment rates (based on the population aged 16 to 64)
- JSA claimants by age
- Jobcentre Plus vacancies.

The parties shown in the tables relate to incumbents after the General Election.

National, regional and constituency level labour market data is available from NOMIS: <https://www.nomisweb.co.uk/>.

This paper is intended to provide answers to requests for frequently requested data; for further analysis or to comment on the content, Members of Parliament and their staff can contact the authors.

⁷ For further information see: ONS, [How exactly is unemployment measured?](#), April 2009

4 Sources, copyright and methodology

4.1 Sources and copyright

The original source for all data in this paper is the Office for National Statistics (ONS). Changes over time, rankings, the ratio of JSA claimants to vacancies and the 'Library rate' have been calculated by the Library. The specific source for data is shown below:

- JSA claimant count: non-seasonally adjusted data, downloaded from NOMIS: <https://www.nomisweb.co.uk/>. As unemployment has a seasonal pattern, comparisons should be made using the same month in each year. Data for constituencies is available from 2004 onwards.
- Library rate is based on the Library's estimate of the resident economically active population aged 16 to 64, as outlined in section 4.2. These rates are higher than the ONS rates because they are percentages of the *economically active* population in this age range rather than the whole population in the age range (as used by ONS).
- *ONS Rate* is based on the resident population aged 16 to 64 and published alongside JSA claimant count data on NOMIS.
- *Age and duration breakdowns for JSA claimants* are also available from NOMIS.
- *Employment Rate* is based on the Annual Population Survey (APS) by ONS and is available from their website.⁸ This is a survey-based estimate and subject to sampling variability.
- *Jobcentre Plus vacancies* are available from the NOMIS website. They relate to 'live unfilled vacancies', which are vacancies notified to Jobcentre Plus and currently thought to be unfilled. A large number of vacancies are not notified to Jobcentre Plus, and the rate of notification can depend on location, occupation and industry. Data for Lincoln is affected by armed forces recruitment.

Unavailable figures are denoted in the tables by a '..'.

Claimant rates and figures on JSA claimants per vacancy are rounded to one decimal place.

The denominators used in this paper are partly derived from the 2001 Census. Census data for England and Wales are published by the Office for National Statistics. Census data for Scotland are published by the General Register Office for Scotland. Census data for Northern Ireland are published by the Northern Ireland Statistics and Research Agency. Census data are © Crown copyright.

The source of the data on claimant count and population levels contained in this publication is National Statistics (NOMIS database) © Crown copyright.

All mapping is © Ordnance Survey and Ordnance Survey Northern Ireland and **must not** be reproduced without permission

4.2 Unemployment rate methodology

Two 'unemployment rates' are shown in this paper. The 'ONS' rate is that published by ONS with the data and is calculated using the resident population aged 16 to 64 in 2008. Rates included in PQ answers will be based on this rate. The 'Library' rate is calculated by the

⁸ http://www.statistics.gov.uk/onlineproducts/lms_regional.asp

Library and shows the number of claimants as a proportion of the estimated economically active population aged 16 to 64 resident in each constituency in 2008.⁹ For an exposition of the methodology used, see Library Standard Note *Unemployment by Constituency: change in methodology*.¹⁰

This methodology was updated as of the August 2010 edition when ONS changed the definition of working age to take account of the change in the state pension age for women. For an explanation of the shift away from the working-age population to the population aged 16 to 64, see Library Standard Note *Unemployment by Constituency: changes to working-age rates*.¹¹

The rates presented in this paper should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live.

While the Library rates are based on the latest population estimates at a constituency level, they are constrained by the use of the proportion of the population economically active in 2001. Where constituencies have seen major demographic shifts or socio-economic change since 2001 the methodology used to calculate the rates may be less accurate in fully reflecting current unemployment rates.

4.3 Map notes

The following notes should be borne in mind when drawing conclusions from these maps:

- The maps on pages 48-50 show residence-based claimant count rates for February 2011 for constituencies in the United Kingdom, with an expanded view of constituencies in selected major conurbations and surrounding areas.
- The map on page 51 shows the percentage change in residence-based claimant count levels between February 2010 and February 2011 for constituencies in the United Kingdom.
- In both maps the constituencies in the United Kingdom have been divided into five equally sized bands, also known as 'quintile groups', each of which contain approximately 129 constituencies (20% of the total in the United Kingdom). The range in each group is shown on the map, but these ranges are not equal.
- Note also that constituencies with rates near the boundaries of these quintiles will be coloured differently even though their unemployment rates may only differ slightly from those in another, neighbouring quintile group.
- Considering the percentage change does not take account of the absolute level of claimants by constituency. Constituencies with relatively low absolute numbers of claimants could see high percentage changes and vice versa.

⁹ The denominator for the rate is calculated using the proportion of the economically active population aged 16 to 64 in the 2001 census and the estimated resident population aged 16 to 64 in 2008. This means the rates take account of recent population change but not any changes in the economically active population. Between the first quarter of 2001 and the same period in 2008 the Labour Force Survey estimates that economic activity rose by around 0.5 percentage points for the UK overall.

¹⁰ <http://www.parliament.uk/briefingpapers/commons/lib/research/briefings/snep-05217.pdf>. The methodology explained in this note is the same as that used in this paper, except this paper uses the 2008 population aged 16 to 64 rather than the 2006 working age population.
