

Economic Indicators, Budget update

RESEARCH PAPER 11/27

This Research Paper series summarises the main economic indicators currently available for the UK, along with comparisons with other major OECD countries.

Summary

- Recent data show unemployment rose to its highest level since 1994 in the three months to January and CPI inflation increased to 4.4% in February (compared with average earnings growth of 2.3%).
- Public finance statistics show that for the first 11 months of fiscal year 2010/11 the government borrowed nearly 10% less than in the same period of 2009/10. As a result, full-year borrowing in 2010/11 is likely to be less than the OBR's November forecast of £149 billion.
- For more information see the Library's [background briefing to the Budget](#). Following the Budget an additional Library briefing will be available.

Summary

Recent data show unemployment rose to its highest level since 1994 in the three months to January and CPI inflation increased to 4.4% in February (compared with average earnings growth of 2.3%). Meanwhile, public finance statistics show that for the first 11 months of fiscal year 2010/11 the government borrowed nearly 10% less than in the same period of 2009/10. As a result, full-year borrowing in 2010/11 is likely to be less than the OBR's November forecast of £149 billion.

For more information see the Library's [background briefing to the Budget](#). Following the Budget an additional Library briefing will be available.

GDP Growth

[page 1](#)

(% change quarter-on-quarter)

Quarterly GDP contracted by 0.6% in Q4 2010 compared with Q3 2010. This followed GDP growth of 0.7% in Q3 2010.

Inflation (CPI)

[page 7](#)

(% change on year ago)

The rate of CPI inflation rose to 4.4% in the year to February, up from 4.0% in January.

Employment

[page 10](#)

(total, millions)

In the three months to January, the number of people employed rose by 32,000 to 29.2 million.

Unemployment

[page 11](#)

(total, millions, ILO definition)

ILO unemployment rose by 27,000 to just under 2.53 million in the three months to January, the highest level since 1994. The unemployment rate increased to 8.0% from 7.9%.

Oil price

[page 16](#)

(US\$/barrel, Brent Crude)

Oil prices are now at \$115 per barrel, the highest they have been since mid-2008. Oil prices are 43% higher compared with a year ago.

Next issue: 5 April

1 Introduction to *Economic Indicators*

Economic Indicators Research Papers are usually published on the first Tuesday of the month. Individual indicator pages are updated more frequently and are made available through the Library's intranet both under the relevant subject page headings, and collectively on the *Economic Indicators* subject page.¹

Feedback

If you have any comments or suggestions about *Economic Indicators* please contact the editor, Daniel Harari, on x2464.

Weekly email alert

A weekly email alert with updated indicators is available to Members and their staff on request. To subscribe, please visit <http://hcl1.hclibrary.parliament.uk/wdw/subject/EI.asp>

Sources and glossary

A guide to sources is provided in section 5. Economic terms, symbols and abbreviations used in the publication are described in the glossary in section 6.

Contacts

Members and their staff are encouraged to talk to Library subject specialists. A comprehensive guide is available in *Using the Library*.² Researchers are not able to discuss pages with members of the public. For enquiries in these subject areas please contact the following specialists:

A1: Gross Domestic Product

The economy contracted by 0.6% in Q4 2010, following growth of 0.7% in Q3 2010. In March 2011, HM Treasury's average of independent economic forecasts of GDP growth for 2011 was 1.8% and for 2012 was 2.1%. The Office for Budget Responsibility's (OBR) central forecasts from November 2010 are for 1.8% growth in 2010, 2.1% for 2011 and 2.6% for 2012.

Real GDP Growth since 1977

Real GDP Growth since 2007

Gross Domestic Product

- The economy grew by an estimated -0.6% in Q4 2010, compared with Q3 of 2010. This compares with growth of 0.7% in Q3 2010 compared with Q2 2010.
- The contraction in the economy of -2.2% between Q4 2008 and Q1 of 2009 was the largest percentage fall in quarterly GDP since Q3 of 1987 (-2.2%).
- In Q4 2010, GDP rose by an estimated 1.5% compared with the same period a year ago, compared with 2.5% growth in Q3 2010, compared with the same period a year ago.
- Total output of the economy fell by (a revised) 6.4% during the recession.

A2: GDP: International Comparisons

France, Germany and Japan were the first G7 countries to emerge from recession (in Q2 2009), followed by the US, Canada, Italy and the eurozone in Q3 2009, and the UK in Q4 2009.

The UK economy contracted 0.6% in Q4 2010, while the US grew 0.8%. Germany grew 0.4% in Q4, and the eurozone as a whole grew 0.3%. The G7 grew 0.4%.

In **January 2011**, the IMF raised their **October forecast** for 2010 world growth by 0.2 percentage points to 5.0%, and their 2011 forecast by 0.2 percentage points to 4.4%

The IMF left UK growth forecasts unrevised. Forecasts for Germany were revised upward for the third consecutive time, to 3.6% in 2010 and 2.2% in 2011. US growth was also revised upward, by 0.2 percentage points to 2.8% in 2010, and by 0.7 percentage points to 3.0% in 2011.

Among major emerging markets, China's IMF growth forecast was reduced slightly for 2010: it is now expected to grow at 10.3% in 2010 and 9.6% in 2011. Forecasts for India were unchanged, while Brazil's 2011 growth was revised up by 0.4% points to 4.5% in 2011.

The European Commission's **February forecasts** revised down the November forecast for UK 2010 growth from 1.8% to 1.4%, and 2011 growth down from 2.2% to 2%.

OECD **November forecasts** revised OECD-wide growth up by 0.1 percentage points to 2.8% in 2010 and down by 0.5 percentage points to 2.3% in 2011. The US saw significant downward revisions for both 2010 and 2011. The **March 2011 survey of the UK economy** revised 2010 growth for the UK down by 0.4 percentage points, and 2011 growth down by 0.2 percentage points, relative to the November forecasts.

Real growth forecasts (% changes)

A3: Components of GDP

GDP is made up of a number of elements, including household consumption, government spending, investment and net trade (exports less imports). Household consumption is the largest element accounting for 63% of the total in 2010. Government consumption accounted for 23% and gross fixed capital formation for 15%.

Household consumption, government consumption and GDP

- In Q4 2010, household consumption fell by 0.1%. This is the first fall since Q1 2010.
- Government consumption increased by 0.7% in Q4 2010.
- Exports increased by 2.3% in Q4 2010 while imports increased by 3.0%.

Gross fixed capital formation

- Gross fixed capital formation (GFCF) measures investment in buildings and machinery.
- In Q4 2010 GFCF fell by 2.5%.
- GFCF was 5.6% higher than in Q4 2009.

Components of GDP

% change on previous quarter (real terms)

	Household consumption	Government consumption	GFCF (a)	Exports	Imports	GDP
2009 (annual % change)	-3.3%	1.0%	-15.4%	-10.1%	-11.9%	-4.9%
2010 (annual % change)	0.9%	1.0%	3.1%	5.8%	8.5%	1.3%
2010 Q1	0.0%	0.5%	3.3%	-0.8%	2.2%	0.3%
2010 Q2	0.5%	0.3%	1.1%	3.1%	1.9%	1.0%
2010 Q3	0.1%	-0.3%	3.7%	1.7%	1.6%	0.7%
2010 Q4	-0.1%	0.7%	-2.5%	2.3%	3.0%	-0.6%

Update: ONS, [Quarterly National Accounts](#), 29 Mar

A4: Output and employment by industry

In 2008, services accounted for 77% of UK Gross Value Added (GVA), manufacturing 12%, other production industries (mining & quarrying, and utilities) 5%, construction 6% and agriculture, hunting and fishing 1%. The services sector accounts for 83% of total workforce jobs (September 2010).

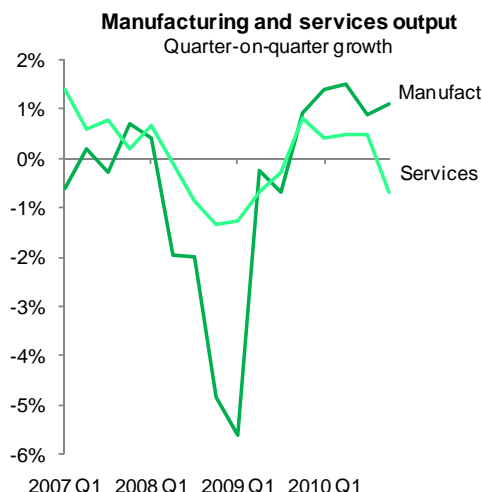

Output

GVA growth by industry

Seasonally adjusted, chained volume measures at basic prices

	Manufacturing	Construction	Services	All industries
<i>Annual % changes</i>				
2009	-10.7%	-10.7%	-3.2%	-4.7%
2010	3.6%	5.7%	1.2%	1.4%
2010 Q2	3.1%	7.2%	1.4%	1.7%
2010 Q3	4.8%	9.8%	2.2%	2.7%
2010 Q4	5.0%	8.0%	0.7%	1.5%
<i>Quarter-on-quarter</i>				
2010 Q2	1.5%	7.1%	0.5%	1.0%
2010 Q3	0.9%	3.8%	0.5%	0.7%
2010 Q4	1.1%	-2.5%	-0.7%	-0.6%

Source: ONS series CKYY, GDQB, GDQS, CGCE

- Following sharp falls in manufacturing output in 2008 and 2009, it is now growing at a faster rate than services, which contracted by 0.5% in Q4 2010. Construction fell sharply in Q4 2010 following strong growth in Q2 and Q3.
- Manufacturing output rose by 5.0% in the year to Q4 2010. Construction output rose by 8.0%
- Services output rose by 0.7% in the year to Q4 2010, with output in the business services and finance sector growing by 0.4%.

Source: ONS series JWR7, JWS2, JWT8, DYDC

- The employment picture is different, with numbers of manufacturing jobs continuing to fall sharply (3.7% in the year to September 2010). Numbers of service sector jobs have been steadier.
- Numbers of jobs in the construction sector fell in Q3 having risen in Q2.
- The public administration, health and education workforce rose by 0.9% in the year to September 2010.

Update: ONS, [Quarterly national accounts release](#), 29 Mar

A5: Manufacturing

ONS produces a monthly index of manufacturing output data. The Markit/Chartered Institute of Purchasing & Supply (CIPS) UK Manufacturing Purchasing Managers' Index is a top leading indicator of manufacturing output. The Society of Motor Manufacturers and Traders (SMMT) publishes monthly vehicle production statistics.

Manufacturing Output

	Index Value (2005=100)	% change over month	% change over 12 months
2009	87.2	...	-10.7
2010	90.3	...	3.6
2010 Oct	91.4	+0.5	+5.3
Nov	92.0	+0.6	+5.2
Dec	91.9	-0.1	+4.5
2011 Jan	92.9	+1.0	+6.8

Source: ONS, series CKYY

- Manufacturing output rose by 6.8% in the year to January 2011, the largest increase recorded since November 1994. It increased by 1.0% in January alone.
- Industrial production, which in addition to manufacturing includes mining and quarrying, and electricity, gas and water supply, was up by 4.4%, also the highest since late 1994.

Manufacturing Purchasing Managers' Index

		Index	Monthly change
2009	Feb	34.9	...
2010	Feb	57.4	...
2010	Nov	57.5	+2.1
	Dec	58.7	+1.2
2011	Jan	61.5	+2.8
	Feb	61.5	0.0

Source: Markit/CIPS UK Manufacturing PMI
Data as originally published

- The Markit/CIPS UK Manufacturing PMI remained steady at 61.5 in February 2011 (where 50.0 is no change). This is a record over the 19-year history of the index.
- The employment, consumer goods output and intermediate goods output components of the index each recorded record growth rates in February.

Vehicle Production

		Number '000s	% change over 12 months
2008		1,090	-33.9
2010		1,393	+27.8
2010	Feb	107	+63.7
	Dec	103	+11.3
2011	Jan	120	+8.9
	Feb	122	+13.4

Source: SMMT, not seasonally adjusted

- In 2010, 1.39 million vehicles were produced in the UK, up by 27.8% compared with 2009. Out of the total, 346,000 or 25% were for the UK market and 1,047,000 or 75% were for export.
- UK vehicle production was 122,000 in February 2011, 13% higher than in February 2010. The SMMT said this showed the sector was "continuing to lead a manufacturing recovery".

Update: ONS, [Index of Production](#), 6 Apr
Markit/CIPS [UK Manufacturing PMI](#), 1 Apr
SMMT, [Vehicle Production](#), mid Apr

A6: Productivity

Productivity is a measure of the level of output in an economy and the inputs required to produce it. Three measures are commonly used: output (or GDP) per worker, output per job and output per hour (worked). Data covering the UK economy is published every three months, with international comparisons updated biannually.

Productivity by sector, output per job

Source: ONS, series: LNNP, LNNU, GG5J

- Productivity across the whole economy, measured by output per worker, is estimated to have fallen by 3.2% in 2009 compared with a fall of 0.8% in 2008.
- Output per worker rose by 1.7% in Q3 2010 compared to the same quarter a year ago.
- Manufacturing output per job grew by 8.0% in Q3 2010 compared to the same quarter a year ago, as output in the sector increased while employment fell. Output per job in the service sector rose by 1.0% over the same period.
- Comparing Q3 2010 with Q2 2010, manufacturing output per job increased by 0.8%, services output per job was unchanged while output per job for the whole economy grew by 0.2%.

Productivity growth, seasonally adjusted

Annual % change	Manufacturing		Services		Whole Economy		
	Output per job	Output per hour	Output per job	Output per hour	Output per worker	Output per job	Output per hour
2008	0.2	0.2	-0.8	-0.9	-0.5
2009	-4.8	-3.4	-3.2	-3.3	-1.9
2009 Q3	-5.0	-3.7	-3.1	-1.7	-3.3	-3.5	-1.9
Q4	-0.1	1.2	-1.1	-0.2	-1.0	-1.1	0.1

Latest quarterly % change	0.8	1.1	0.0	0.1	0.1	0.2	0.3

Source: ONS

International comparisons

GDP per worker, 2009, index where UK=100

- International comparisons of productivity are presented as an index where the UK=100.
- In 2009, based on GDP per worker, the UK had higher levels of productivity than Japan, around the same levels as Germany, and lower levels than the US and the G7 average.
- Based on GDP per hour, in 2009 the UK had higher levels of productivity than Japan, around the same levels as Italy, and lower levels than Germany, France, the US and the G7 average.

B1: Inflation

Compared with a year ago, the consumer prices index (CPI) showed inflation at 4.4% in February, up from 4.0% in January and above the Bank of England's 2% target for the fifteenth successive month.

On 10 December 2003 the (then) Chancellor wrote to the Bank of England setting a new UK inflation target of 2.0%, measured by the consumer prices index (CPI). Inflation must remain within 1 percentage point either side.

Consumer Prices Index (CPI)

The CPI annual inflation rate was 4.4% in February, up from 4.0% in January.

- The CPI is now at its highest annual rate since October 2008.
- The main factors behind the rise were increases in heating costs and clothes prices.
- The RPI (all items) measure of inflation rose to 5.5% in February, its highest rate since July 1991.

Retail Prices Index (RPI)

Price Indices

% change on a year ago

		CPI	RPI
2008		3.6	4.0
2009		2.2	-0.5

2010	Sep	3.1	4.6
	Oct	3.2	4.5
	Nov	3.3	4.7
	Dec	3.7	4.8
2011	Jan	4.0	5.1
	Feb	4.4	5.5

Source: ONS database, series: D7G7, CDKQ

CPI and RPI since 1990

B2: Inflation: International

UK inflation, measured by the Consumer Prices Index (CPI), remained positive throughout the recession. Other major economies, including the US, France and Germany, saw deflation (negative inflation, or falling prices).

Inflation in the EU, some other European countries, and the US, can be compared using the standard Harmonised Index of Consumer Prices (HICP), or the CPI as it is known in the UK. National inflation calculations methods differ from this standard to varying degrees. For example, the US' national measure is based on prices in urban areas only, and unlike the HICP includes costs of owner-occupied housing. Care should therefore be taken when making comparisons between national and harmonised measures.

- In the year to February, UK inflation was 4.4%, up from 4% in January and 3.7% in December. The Bank of England's UK inflation target is 2%.
- Euro zone inflation was 2.4% in February, up 0.1%-points from January. The European Central Bank (ECB) aims to keep inflation "below, but close to, 2% over the medium term".
- The highest rate in the EU in February was 7.6% in Romania. Ireland has the lowest annual inflation rate in the EU at 0.9%.
- HICP annual inflation in the US in January was 2.0%, up from 1.9% in December. Using its national definition, US inflation was 2.1% in February, up from 1.6% in January.

B3: Average Earnings

Average weekly earnings (three-month average including bonuses) for the whole economy rose by 2.3% in January compared with a year ago, up from 1.8% in December. Average weekly earnings excluding bonuses were 2.2% higher in the three months to January compared with a year ago, down from 2.3% in December. Inflation as measured by the CPI was 4.0% in January 2011.

Average Earnings in the Public and Private Sectors

- Average total pay (including bonuses) in the private sector rose by 2.3% in January, compared with an increase of 2.3% in the public sector. Excluding financial services, public sector earnings also rose by 2.3%.
- Average weekly earnings (including bonuses) in January in the public sector were £472 compared with £449 in the private sector.
- In 2010, headline (including bonuses) earnings in the public sector averaged a rise of 2.9%, while the private sector averaged a 2.1% increase.

Average Earnings in Services and Manufacturing

- Average total pay growth (including bonuses) in the manufacturing sector was 2.0% in January, compared with 2.7% in the services sector.
- Average weekly earnings (including bonuses) in January in the manufacturing sector were £526 compared with £436 in the services sector.
- In 2010, headline (including bonuses) earnings in the services sector averaged a rise of 2.3% compared with a 4.2% increase in the manufacturing sector.

C1: Employment

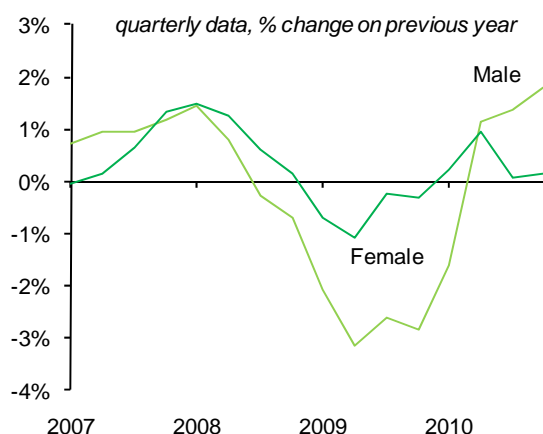

Employment grew by 1% in the last year, to 29.16 million. Employment amongst 16-24 year olds fell in the last quarter by 1.6%.

Total employment

- Over the past year, employment has increased for all age groups.
- Employment of those aged 65 and over has increased by 16.9% in the last year.
- Only the 16-24 age group experienced a fall in employment over the last quarter.
- Employment is now 1.4% lower than its peak of 29.6 million in April 2008.

Male and female employment

- Over the past year, male employment has increased by 1.8% and female employment has increased by 0.1%.
- Full-time employment has increased by 75,000 over the quarter, whilst part-time employment has fallen by 43,000.
- The number of people employed in the public sector has declined by 45,000 in the last quarter, whilst the number employed in the private sector has increased by 77,000.

C2: Unemployment: National

The Office for National Statistics uses the International Labour Organisation (ILO) definition of unemployment as the headline measure of unemployment. In the UK this is obtained from the Labour Force Survey (LFS).

- **ILO unemployment in November to January 2011 was 2,529,000 (8.0% of all economically active) – up by 27,000 from the previous quarter (UK, seasonally adjusted) and the highest level since 1994.**

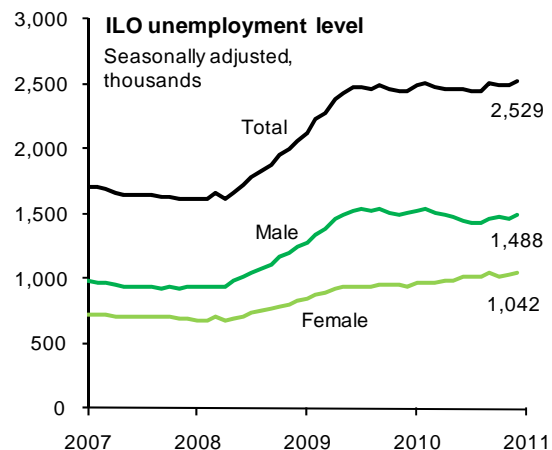

ILO unemployment (November to January 2011)

- There were 848,000 people unemployed for more than 12 months, up 9,000 from the previous quarter;
- The unemployment level among 16- to 24-year-olds was 974,000, 20.6% of all economically active people of this age. (See table below.)

Jobseeker's Allowance (JSA) claimant count

The seasonally-adjusted monthly JSA claimant count decreased by 10,200 between January 2011 and February 2011 to 1,448,600.

C3: Unemployment: Regional

The Office for National Statistics uses the International Labour Organisation (ILO) definition of unemployment as the headline measure of unemployment. In the UK this is obtained from the Labour Force Survey (LFS).

- Over the period November to January 2011, the North East had the highest unemployment rate, at 10.2% of the economically active population, followed by the West Midlands at 9.9%. The lowest rates over the same period were 6.3%, in the South East and South West, and 6.2% in the East of England.

- The largest increase in unemployment over the last quarter was in the West Midlands (+27,000), and the next largest increases were in London and the South West (both +16,000). The largest decreases over the last quarter were in the North West, East of England and Scotland (all -16,000). (See table below.)
- The seasonally-adjusted JSA claimant count increased in two regions and countries and decreased in eight in February 2011 compared with the previous month.

Key regional labour market statistics *seasonally adjusted*

	ILO unemployment				JSA claimant count

C4: Unemployment: International Comparisons

The OECD produces harmonised unemployment rates for OECD members based on the ILO definition of unemployment.

- Using harmonised definitions, the UK unemployment rate in Q3 2010 was 7.7%, below the euro zone rate (10.0%) and below the G7 and OECD rates (8.1% and 8.5% respectively); based on the

(The ONS headline estimate of ILO employment in the UK for Q4 2010 was 7.9%. This measure is not directly comparable with OECD harmonised rates.)

- Between Q4 2009 and Q4 2010 Germany saw a 0.9 percentage-point fall in its unemployment rate (from 7.5% to 6.6%); Canada saw a fall of 0.5 percentage points. The US unemployment rate fell by 0.4 percentage points over the same period. Italy saw the largest rise of the G7 countries (+0.3 percentage points).
- Outside the G7, Spain has the highest harmonised unemployment rate among the 33 OECD member states (20.2% in Q4 2010), having risen particularly sharply over the last three years (up from 8.8% in Q4 2007). The Irish Republic has also seen a sharp rise over the same period (up from 4.8% to 13.8%). This compares with a 2.8 percentage point rise in unemployment in the OECD as a whole (from 5.7% to 8.5%) and a 2.5 percentage-point rise in the euro zone (from 7.5% to 10.0%) over the same period.
- The lowest unemployment rate in the OECD in Q4 was in South Korea (3.6%).
- The most UK recent forecasts published by the OECD ([March 2011 Economic Survey of the UK](#)) suggested the UK unemployment rate would be 7.7% in 2011 and 7.5% in 2012. The respective forecasts for the euro zone (from [Economic Outlook no. 88, Oct 2010](#)) were 9.6% and 9.2%, and for the OECD as a whole 8.1% and 7.5%.

D1: Interest Rates and the Money Supply

In consecutive monthly meetings from October 2008 to March 2009, the Bank of England cut the official Base Rate from 4.50% to 0.50%, the lowest in the Bank’s 315-year history. It has remained at that level since then.

In March 2009, with little room for further cuts in interest rates, the Bank initiated an asset purchase or ‘quantitative easing’ (QE) programme. The Bank has created money which it has used to purchase assets in an effort to stimulate demand and meet its 2% inflation target. Money supply growth has, however, remained weak.

Official interest rates

UK Base/Repo rate changes

% per annum

Date	New rate	Date	New rate
2001 Oct 4	4.50	2007 Jan 11	5.25

Source: Bank of England

- The European Central Bank’s official interest rate has been 1% since 7 May 2009.
- The US Federal Reserve’s target range for the federal funds rate has been 0-0.25% since 16 December 2008.

Asset purchase programme (quantitative easing)

- On 5 March 2009, the Bank of England announced that it would undertake a policy of “quantitative easing”. The Bank said that it would purchase £75 billion of assets using money which it would create. This total was increased to £125 billion in May 2009, £175 billion in August 2009 and £200 billion in November 2009.
- The Bank of England has now purchased £200 billion worth of assets using created reserves. 99% of the purchases by value have been gilts (UK Government securities). No further purchases are currently scheduled.

Money supply

- In its May 2010 *Inflation Report*, the Bank of England noted that money supply growth has been weak, but less so than it would have been in the absence of the asset purchase programme.
- Annual growth in M4 excluding intermediate other financial corporations (a measure monitored by the Bank of England Monetary Policy Committee) was 2.3% in Q4 2010, up from the record low of 0.8% in Q1 2010.
- The value of notes and coins in circulation outside the Bank of England rose by 3.7% in the year to December 2010.

D2: Public Finances

The independent Office for Budget Responsibility (OBR) forecasts that public borrowing will be £148.5 billion in 2010/11, equivalent to 10.0% of GDP. The OBR will publish revised forecasts on 23 March.

- The Government borrowed £156 billion in 2009/10. Over the first eleven months of 2010/11, borrowing was £123.5 billion, 9.6% lower than the same period in 2009/10.
- In November, the OBR forecast that borrowing would fall to 10.0% of GDP in 2010/11 and to 1.0% of GDP by 2015/16. It forecast that debt will fall as a share of GDP in 2014/15.
- The OBR will publish revised forecasts alongside the Budget on 23 March.

D3: Financial Indicators

The leading share index in the UK, the FTSE 100, tracks share-price movements in the country's 100 largest companies (by market capitalisation). It hit an all-time high of 6,930 in December 1999. It approached those highs again in 2007, before falling sharply in 2008. In January 2011, it exceeded 6,000 for the first time since June 2008.

The price of oil reached an all time high above \$145/barrel in July 2008. A steep decline then followed to below \$40 by the end of 2008. Since then prices have recovered and recently rose above \$110.

The price of gold hit an all-time high of \$1,435/ounce in March 2011.

E1: UK Balance of Trade

Annually, the current account deficit in 2009 was £23.9 billion, equivalent to -1.7% of GDP. The surplus on services and income narrowed between 2008 and 2009. The deficit in goods also narrowed, resulting in the current account deficit widening slightly in 2009 compared with 2008.

Current Account

- On a **quarterly** basis, the current account deficit was estimated at £9.6 billion in Q3 2010, widening from a Q2 2010 deficit of £5.2 billion. Between Q2 2010 and Q3 2010 the surplus on services and the deficit on goods widened.
- The **annual** current account deficit with EU27 countries in 2009 was £14.3 billion, compared with a deficit with non-EU countries of £9.6 billion.
- On a **quarterly** basis, the deficit with EU27 countries was £12.8 billion in Q3 2010 (£7.0 billion deficit in Q2 2010). With non-EU countries, the current account was in surplus by £3.2 billion in Q3 2010 (£1.8 billion surplus in Q2 2010).

E2: Exchange rates

The *Sterling Exchange Rate Index* (SERI) measures sterling's value against a 'basket' of currencies, 'trade-weighted' (based on currencies' relative importance in UK trade).

The SERI increased by 0.8% in February, following a 0.4% rise in January. Compared with the same period last year, the SERI was up 1.5%. It is now 5.8% above its March 2009 level, when it was at its lowest point since the series began in 1980, and 22.7% down from its July 2007 peak.

F1: Business and Consumer Confidence

Confidence surveys, with information generally released ahead of official statistical data, can indicate changes to the economic outlook as well as turning points in the economic cycle.

European Commission Economic Sentiment Indicator

	UK Index	monthly change	change on year ago
2009 Feb	65.6
2010 Feb	98.3
2010 Dec	101.7	+1.1	+6.7
Jan	98.8	-2.9	+0.6
Feb	101.9	+3.1	+3.6

Source: European Commission

- The European Commission conducts regular harmonised surveys for different sectors (manufacturing, services, retail, construction and consumers) of EU member states' economies.
- The overall UK sentiment index increased by 3.1 points in February, after a fall of 2.9 points the previous month. The overall EU sentiment index increased by 1.4 points in February.

CBI Industrial Trends Survey

balance (as a %) of those expecting an improvement minus those expecting a deterioration

	Future output expectations	monthly change	change on year ago
2009 Mar	-48
2010 Mar	+5
2011 Jan	+17	+4	+13
Feb	+23	+6	+16
Mar	+27	+4	+22

Source: CBI, *Industrial Trends Survey*

- The CBI carries out monthly and quarterly *Industrial Trends* surveys.
- Manufacturers' output expectations in March were +27% of firms expecting output to rise rather than fall over the next three months. This was up 4 points on last month's +23% and is the highest figure since February 2007.

GfK NOP Consumer Confidence Survey

balance (as a %) of those expecting an improvement minus those expecting a deterioration

	Consumer Conf. Index	monthly change	change on year ago
2009 Feb	-35
2010 Feb	-14
2010 Dec	-21	0	-2
2011 Jan	-29	-8	-12
Feb	-28	+1	-14

Source: GfK NOP, *Consumer Confidence*

- GfK NOP's *Consumer Confidence Barometer* measures a range of consumer attitudes, including forward expectations of the general economic situation and households' financial positions, and views on making major household purchases.
- Overall confidence increased by 1 point in the month to February. In January confidence had dropped by 8 points to -29, the lowest level since March 2009.

F2: Retail Sales

Retail sales are an indicator of household consumption. A number of retail sales surveys are conducted, for instance by the CBI; however, this page only uses data and information from the ONS.

Value of Retail Sales

- The rate of annual increase in the value of retail sales increased sharply in the three months to January to 4.0%.
- The value of retail sales in January alone was up by 3.0% compared with December (in seasonally adjusted terms). Analysis of this is complicated by the cold weather and VAT increase.
- The estimated total value of sales in January was £23.6 billion (non-seasonally-adjusted).

Value of Food & non-Food Store Sales

- The value of sales in food stores in the three months to January rose by 2.0% compared with the previous year.
- The annual rate of increase of the value of sales in non-food stores rose to 4.1% in the three months to January.
- Sales in household goods stores were 4.7% lower than a year ago, a slowing of recent rapid declines.
- Sales in clothing and footwear stores were up by an annual rate of 6.0% in the three months to January.

Value of Retail Sales

Update: ONS, [Retail Sales](#), 24 Mar

F3: Housing Market

House prices on the Halifax index fell by 0.9% in February compared with a month ago. However, this follows a 0.8% rise in January. Prices were 2.6% lower in February compared with a year ago. House prices on the Nationwide index rose by 0.3% in February. Prices were 0.1% lower than a year ago on this measure.

After recovering in 2009, numbers of mortgage approvals fell again over the course of 2010. Housing starts have increased since the recession but still remain well below pre-recession levels.

House price indices

Halifax house price index

Nationwide house price index

Latest monthly data
UK, seasonally adjusted

	Halifax	Nationwide
Latest data	Feb-11	Feb-11
Change in month	-0.9%	+0.3%
Change in year	-2.6%	-0.1%
Peak date	Aug-07	Jul-07
Change since peak	-18.5%	-9.6%
Trough date	Apr-09	Feb-09
Change since trough	+5.2%	+9.4%

- The recovery in house prices since early 2009 has stalled, with recent data showing prices falling in year-on-year terms on both the Halifax and Nationwide measures.
- There is considerable regional variation. In Q4 2010 prices fell by 9% in Northern Ireland but rose by 4% in East Anglia compared with a year earlier (Nationwide data).

Mortgage approvals

- Bank of England data on the number of mortgages approved to finance house purchases are a leading indicator of house sales.
- Mortgage approvals rebounded in January after a sharp drop in December. There were 45,723 mortgage approvals in January, up 7% from December. However, January's figure is still lower than every month in 2010 except December.

House-building

- There were 23,000 house building starts in England in Q4 2010, down from 25,780 in Q3 2010. This is 7,500 higher than the low of 15,510 in Q1 2009, but still below half of the 50,000 starts in Q1 2007.
- The number of dwelling completions fell to 23,190 in Q4 2010 and is still nearly 50% lower than it was three years ago.
- The DCLG stated that poor weather in December likely negatively affected starts and completions in Q4.

F4: Household debt

Monthly net lending, £bn

Data on lending to individuals is published on a monthly basis and is seasonally adjusted.

- Total net lending to individuals grew by £1.5 billion in January 2011. This compares with an increase of £0.5 billion in December.
- Monthly net unsecured lending fell by £0.3 billion in January 2011.
- Monthly net secured lending (mortgages) grew by £1.8 billion in January 2011, compared with a £0.3 billion fall in December.

Net outstanding lending to individuals

£ billions; seasonally adjusted

	Secured	Unsecured	Total
2007 Jan	1,086	213	1,300
2008 Jan	1,188	228	1,416
2009 Jan	1,226	233	1,459
2010 Jan	1,237	225	1,463
2010 Jul	1,239	217	1,456
2010 Oct	1,238	216	1,454
2011 Jan	1,240	212	1,452

Source: Bank of England, series: LPMVTXK, LPMVZRI, LPMVTXC

- Total net outstanding lending to individuals was £1,452 billion at the end of January 2011, 0.7% lower than in January 2010.
- Secured lending (mortgages) is the largest form of lending accounting for 85% of the total.
- Unsecured lending outstanding (including credit cards) was £212 billion at the end of Jan. 2011.

Current average mortgage interest rates

- Average interest rates offered by banks and building societies have fallen sharply since late 2008.
- The average Standard Variable Rate (SVR) in January was 4.02%, an increase of 0.11 percentage points on December 2010.
- The average fixed and discounted rates offered (75% LTV) in January were 3.70% and 2.99% respectively.

Individual insolvencies, England and Wales

- Q4 2010 provisional data indicates there were 30,729 individual insolvencies in England and Wales (not seasonally adjusted), a 13.6% decrease on Q4 2009. In 2010 as a whole, there were 135,089 insolvencies – a record high.
- In Scotland in Q4 2010 there were 4,583 individual insolvencies, a fall of 19.5% on Q4 2009.
- In N Ireland in Q4 2010 there were 582 individual insolvencies, a rise of 1.6% on Q4 2009.

Definitions¹

Balance of payments: A country's financial position, with other countries of the world, comprising two parts:

Current account: the balance of imports and exports of goods and services, income and transfers combined;

Capital account: the difference between a country's capital invested in other countries, and the capital invested by other countries in it.

Technically, the two parts always balance. A balance of payments deficit normally refers to a **current account deficit**.

Balance of trade: The difference between a country's exports and imports of either goods only or goods and services combined. Trade in financial services account for around a third of UK exports, and thus partially offsets trade in goods deficits.

Basic prices: Prices excluding taxes and subsidies on products.

Claimant count: The number of people claiming Jobseeker's Allowance (JSA) benefits.

Consumer Prices Index (CPI): This is the headline UK domestic measure of inflation. It measures the average change from month to month in the prices of consumer goods and services purchased in the UK.

Current account balance: The difference between receipts/payments due to transactions in goods, services, income and transfers between the UK and all other countries. A current account deficit means that total payments exceed total receipts; in the reverse case, the current account is in surplus.

Current budget: Measures the balance of public sector current account revenue over public sector current expenditure.

Current/constant prices: Current prices are the actual or estimated recorded monetary value over a defined period for a group of industries or products. They show the value for each item expressed in terms of the prices of that period.

Constant prices refer to volume measures whose values are derived by applying to current quantities, prices for a specific base period. They allow figures to be represented so that the effects of inflation are removed. The values for each time period are expressed in terms of the prices in a particular base period.

Economically active: Those aged 16 and over who are either in employment or unemployed.

Economically inactive: Those aged 16 and over who are neither in employment nor unemployed. This includes those who do not want a job, those who want a job but have not been seeking work in the last four weeks and those who want a job and are seeking work but not available to start work.

Employment: The number of people with jobs as estimated by the Labour Force Survey (LFS). This includes all people aged 16 or over who did paid work, those who had a job that they were temporarily away from, those on government supported training and employment programmes, and those doing unpaid family work during the survey period. The employment rate refers to the number of people employed as a percentage of the working age population as measured by the LFS.

Exchange rate: The rate at which one currency is traded against another.

Gross Domestic Product (GDP): The total market value of goods and services produced after deducting the cost of goods and services used up in the process of production (intermediate consumption) but before deducting consumption of fixed capital (depreciation).

Gross Domestic Product – Real GDP: Also known as constant price or chained volume measure, this is a measure used to indicate change in the actual quantity of goods and services produced, by adjusting for inflation.

Gross Fixed Capital Formation (GFCF): Expenditure on fixed assets (buildings, vehicles etc.) either for replacing or adding to the stock of existing assets. Business investment is GFCF by the private sector and public corporations on transport equipment, other machinery and equipment and new dwellings and structures other than dwellings.

1. Sources: ONS, HM Treasury, HM Revenue and Customs, Finance-Glossary.com.

Gross Value Added (GVA): The difference between output and intermediate consumption for any given sector/industry. That is the difference between the value of goods and services produced and the cost of raw materials and other inputs which are used up in production. GVA is used to measure the productivity of sectors/industries and economies.

Harmonised Indices of Consumer Prices (HICP): Harmonised indices of consumer prices for Member States of the European Union, which enable comparisons to be made across countries. The UK's CPI measure uses HICP methodology.

Market prices: The prices actually paid by the purchaser for goods and services, including transport costs, trade margins and taxes. $GDP \text{ at market prices} = GDP \text{ at basic prices} + \text{transport prices paid separately} + \text{non deductible taxes on expenditure} - \text{subsidies received}$.

Money supply: The total amount of money in an economy at a given time.

The Public Sector Net Borrowing (PSNB): This measures the public sector's accumulation of debt net of liquid financial assets. Its approximate stock equivalent is net public sector debt.

Public Sector Net Debt: This is approximately the stock analogue of the PSNB. It measures the public sector's financial liabilities to the private sector and abroad, net of short-term financial assets such as bank deposits and foreign exchange reserves.

Retail Prices Index (RPI): A domestic indicator of inflation. It measures the average change from month to month in the prices of goods and services purchased in the UK. It is similar to the CPI, but differs in terms of methodology and coverage. For example, the RPI includes housing costs such as mortgage interest payments while the CPI doesn't.

Seasonally adjusted: Estimates in which the element of variability due to seasonal influences, which may distort the data, has been removed.

Sterling Exchange Rate Index (SERI): This measures the value of sterling against a trade-weighted 'basket' of other currencies. The weights used in this index measure currencies' relative importance to UK trade in goods and services.

UK Base/Repo rate: The rate at which the Bank of England lends to discount houses by buying their bills. The base rate is usually the minimum rate at which banks are prepared to lend money. The high street bank base rate follows that set by the Bank of England, and it acts as the benchmark for [cont]

other interest rates, including mortgages and personal loans.

Unemployment: The ILO definition includes all people who are: out of work, want a job, have actively sought work in the previous four weeks and are available to start work within the next fortnight; or are out of work and have accepted a job that they are waiting to start in the next fortnight.

Unemployment rate: The number of unemployed persons expressed as a percentage of the total economically active population.

Volume/value of retail sales: The volume of retail sales is the total takings adjusted for inflation and the value of retail sales is the total actual takings.

Workforce jobs: The sum of employee jobs, self-employment jobs, those in HM Forces and government-supported trainees.
