

RESEARCH PAPER 99/44
21 APRIL 1999

Unemployment by Constituency, March 1999

This paper shows the number of unemployed claimants recorded as resident in each constituency in the United Kingdom in March 1999, together with comparisons with the level in March 1998 and March 1996. This paper also presents up-to-date residence-based unemployment rates not published elsewhere for all 659 constituencies in the United Kingdom (the constituencies on which the general election was contested).

Library Research Papers are compiled for the benefit of Members of Parliament and their personal staff. Authors are available to discuss the contents of these papers with Members and their staff but cannot advise members of the general public.

Users of the printed version of these papers will find a pre-addressed response form at the end of the text.

Summary of main points

Official monthly unemployment rates for parliamentary constituencies are not widely available. This paper presents up-to-date unemployment rates not published elsewhere. The Office for National Statistics is, however, in the process of reviewing the range of unemployment statistics published for small areas (including constituencies). More information on these plans should be available later in the year.

Also shown in the paper are comparisons between the level of unemployment in each constituency presently with that one year and three years previously. Data for the current constituencies are not available prior to January 1996.

I Introduction

These unemployment rates use figures for the number of unemployed claimants from the monthly count and figures for the number of people economically active derived from the 1991 Census of Population.¹

These residence-based rates should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live. For a full exposition of the methodology used to calculate these rates, see Research Paper 96/63, *New Unemployment Rates for Parliamentary Constituencies*.

On 22 April 1998 the Office for National Statistics made changes to the way in which labour market statistics (including unemployment statistics) are presented. Greater weight is now given to data from the Labour Force Survey, and to the International Labour Organisation (ILO) definition of unemployment. The ILO definition is now used as the "headline" measure of unemployment, but figures from the monthly count of unemployed claimants will continue to be published. There has been no change to the way in which unemployment is calculated; only to the presentation of the statistics. In March 1999 there were 1,314,400 people unemployed on the claimant count definition, compared to an average of 1,830,000 unemployed on the ILO definition over the three months December 1998 to February 1999.²

The changes outlined above will have no effect on the residence-based unemployment rates contained in this Paper. The Office for National Statistics is, however, in the process of reviewing the range of unemployment statistics published for small areas (including constituencies). ONS now publishes workplace-based unemployment rates for all local authority districts and unitary authorities. These supplement the workplace-based rates published each month for travel-to-work areas (TTWAs). It is possible that ONS will also publish workplace-based unemployment rates for constituencies. The content of this Research Paper will be reviewed in the light of any changes to the range of statistics published by ONS.

Notes to tables:

1. The Boundary Commission reviews in 1995 defined 659 constituencies in the United Kingdom. These were defined in terms of electoral wards as they stood at the time

¹ These denominators are now rather out-of-date. To the extent that the economically active population resident in a particular constituency has grown since 1991, the unemployment rates in this Paper will over-estimate the true rate of unemployment. Likewise, where the economically population has declined since 1991 the rates shown will under-estimate the true rate of unemployment. The continued use of 1991 Census denominators will be reviewed later this year.

² Both figures are given on a seasonally adjusted basis.

of the review. For the purposes of the unemployment statistics however, constituencies represent a best-fit of frozen 1991 wards to the new constituencies.

Boundary alterations between 1991 and 1995 mean that there will inevitably be approximations to 1995 boundaries in many constituencies. In a number of cases however the changes to ward boundaries were substantial and some wards are now split between new constituencies. These constituencies are indicated with an asterisk in the following tables.

2. The political parties shown against each party are as they stand currently. The following abbreviations for parties have been used:

LAB	Labour	UUP	Ulster Unionist Party
CON	Conservative	DUP	Democratic Unionist Party
LD	Liberal Democrat	SDLP	Social Democratic and Labour Party
PC	Plaid Cymru	UKU	United Kingdom Unionist
SNP	Scottish National Party	SF	Sinn Fein
SPKR	Speaker	IND	Independent
SL	Scottish Labour		

VAC# Newark constituency is currently vacant, but this status is subject to a legal decision by the High Court

MP† Member of Parliament for Falkirk West
