

RESEARCH PAPER 99/71
14 JULY 1999

Unemployment by Constituency, June 1999

This paper shows the number of unemployed claimants recorded as resident in each constituency in the United Kingdom in June 1999, together with comparisons with the level in June 1998 and June 1996. This paper also presents residence-based unemployment rates not published elsewhere for all 659 constituencies in the United Kingdom.

Library Research Papers are compiled for the benefit of Members of Parliament and their personal staff. Authors are available to discuss the contents of these papers with Members and their staff but cannot advise members of the general public. Any comments on Research papers should be sent to the Research Publications Officer, Room 407, 1 Derby Gate, London, SW1A 2DG or e-mailed to PAPERS@parliament.uk.

Summary of main points

Up until June 1999 the ONS did not publish unemployment rates for parliamentary constituencies since most do not approximate to self-contained labour markets. Therefore, for many years the House of Commons Library has calculated unofficial residence-based unemployment rates for constituencies, which express the number of claimants as a percentage of the economically active population resident in the constituency.

Following local government reorganisation ONS decided to publish unemployment rates for all unitary authorities, even though some of these do not meet the normal self-containment criteria. From June 1999 they have published unemployment rates for all constituencies. ONS unemployment rates express the number of unemployed claimants as a percentage of the workforce in the constituency.

For the time being, this research paper will continue to follow the methodology used previously and will contain only the Library's residence-based unemployment rates. A decision on the longer-term future of the methodology used for this paper will be taken later in the year. The Library believes that for a minority of constituencies – where there is a high level of net commuting – these residence-based unemployment rates provide a more intuitive measure of the incidence of unemployment.

Also shown in the paper are comparisons between the level of unemployment in each constituency presently with that one year and three years previously. Data for the current constituencies are not available prior to January 1996.

I Introduction

The unemployment rates in this Research Paper use figures for the number of unemployed claimants from the monthly count and figures for the number of people economically active derived from the 1991 Census of Population.¹ The national and regional headline unemployment rates are now based on the International Labour Organisation (ILO) definition of unemployment. (However, figures for constituencies are not available on this basis.)

These residence-based rates should be regarded more as a social measure of relative deprivation than as an economic measure of the mismatch between the supply of and demand for labour, as they take no account of people's ability to seek work outside the constituency in which they live. For a full exposition of the methodology used to calculate these rates, see Research Paper 96/63, *New Unemployment Rates for Parliamentary Constituencies*.

Until June 1999 the ONS did not publish unemployment rates for parliamentary constituencies since most do not approximate to self-contained labour markets.² Following local government reorganisation ONS decided to publish unemployment rates for all unitary authorities, even though some of these do not meet the normal self-containment criteria. From 16 June 1999 they have published official unemployment rates for all constituencies.

The difference between the two sets of unemployment rates lies in the denominator used. The House of Commons Library rates express the number of claimants resident in each constituency as a percentage of the economically active population resident in each constituency at the time of the 1991 Census of Population. The ONS unemployment rates express the number of claimants resident in a constituency as a percentage of the 1998 workforce (the number of jobs in the constituency, regardless of whether the jobholders are resident or not).³

In May 1999, of the 659 constituencies in the United Kingdom, 148 (22%) had unemployment rates which varied by more than two percentage points on the two bases. For example, in the Birmingham Ladywood constituency the Library residence-based unemployment rate for May 1999 was 17.7% but the official workforce rate was just 3.7%. There are two main factors that will affect the difference between the two denominators:

- the change that may have occurred in the economically active population resident between the 1991 Census and 1998 in each constituency; and
- the extent of commuting into and out of the constituency, which will determine whether the workforce is significantly different in size from the resident economically active population.

¹ These denominators are now rather out-of-date. To the extent that the economically active population resident in a particular constituency has grown since 1991, the unemployment rates in this Paper will over-estimate the true rate of unemployment. Likewise, where the economically active population has declined since 1991 the rates shown will under-estimate the true rate of unemployment.

² Self contained labour markets are areas where the 70 per cent of the people who live in the area also work there, and 70 per cent of those who work in the area also live there.

³ Under the definitions used for calculating the workforce, a person who has two part-time jobs counts twice.

The following table explains how differences in the denominators used will affect the calculation of the two unemployment rates.

| Factor affecting denominator | Effect on unemployment rate |
|--|---|
| growth in resident economically active population between 1991 and 1998 | Library unemployment rate will be an over-estimate |
| decline in resident economically active population between 1991 and 1998 | Library unemployment rate will be an under-estimate |
| constituency has significant level of net inward commuting (i.e. more people commute into the constituency than commute out) | ONS unemployment rate will be lower than residence-based unemployment rate |
| constituency has significant level of net outward commuting (i.e. more people commute out of the constituency than commute in) | ONS unemployment rate will be higher than residence-based unemployment rate |

The two sets of unemployment rates have different interpretations. If one is principally interested in the proportion of residents in a constituency who are unemployed, then the Library's residence-based unemployment rate is the most appropriate measure. If, however, one wants to express the number of unemployed claimants as a percentage of the total number of jobs in a constituency, then the ONS unemployment rate is the appropriate measure.

Notes to tables:

1. The Boundary Commission reviews in 1995 defined 659 constituencies in the United Kingdom. These were defined in terms of electoral wards as they stood at the time of the review. For the purposes of the unemployment statistics however, constituencies represent a best-fit of frozen 1991 wards to the new constituencies.

Boundary alterations between 1991 and 1995 mean that there will inevitably be approximations to 1995 boundaries in many constituencies. In a number of cases however the changes to ward boundaries were substantial and some wards are now split between new constituencies. These constituencies are indicated with an asterisk in the following tables.

2. The political parties shown against each party are as they stand currently. The following abbreviations for parties have been used:

| | | | |
|------|-------------------------|------|------------------------------------|
| LAB | Labour | UUP | Ulster Unionist Party |
| CON | Conservative | DUP | Democratic Unionist Party |
| LD | Liberal Democrat | SDLP | Social Democratic and Labour Party |
| PC | Plaid Cymru | UKU | United Kingdom Unionist |
| SNP | Scottish National Party | SF | Sinn Fein |
| SPKR | Speaker | IND | Independent |
| SL | Scottish Labour | MP† | MP for Falkirk West |
| VAC | Vacant | | |
