

Sizes of constituency electorates

Standard Note: SN/SG/5677
Last updated: 4 March 2011
Author: Feargal McGuinness
Section: Social & General Statistics

The Parliamentary Voting System and Constituencies Act, passed on 16 February 2010, contains measures to reduce the number of parliamentary constituencies to 600 and to limit the permitted variation in the number of registered electors for a constituency. This note considers the possible impact by region of the measures in the Act and compares the sizes of constituency electorates at 1 December 2010 (the Boundary Commissions' 'review date' for the review of constituency boundaries). It looks at the variation in electorate sizes about national and regional means and about the UK Electoral Quota as defined in the Act.

Information on how boundary reviews will be conducted has been published by the respective Boundary Commissions for [England](#), [Scotland](#), [Wales](#) and [Northern Ireland](#).

The background to the Act is examined in detail in Library [Research Paper 10/55](#). The passage of the Bill through the Commons is summarised in [Research Paper 10/72](#) and standard notes [SN/PC/5780](#) and [SN/PC/5863](#) respectively summarise the Lords stages of the Bill and amendments added during the Bill's passage.

1 Measures in the Parliamentary Voting System and Constituencies Act

The Parliamentary Voting System and Constituencies Act¹ sets the number of UK constituencies at 600. With the exceptions of Na h-Eileanan an Iar, Orkney and Shetland and the Isle of Wight, constituencies will need to be within 5% of an **electoral quota of 76,641**. The quota is obtained by dividing the total UK electorate on 1 December 2010 (minus the electorates of the excepted constituencies) by 596. The current UK mean electorate, excluding Na h-Eileanan an Iar, Orkney and Shetland and the Isle of Wight, is 70,600.

Each constituency shall be wholly within one of the four constituent parts of the UK. The geographical area of constituencies will be limited at 13,000 km². Should a constituency be greater than 12,000 km², it does not have to be within 5% of the electoral quota should the relevant Boundary Commission be satisfied that it is not reasonably possible. Currently the only constituency with an area greater than 12,000 km² is Ross, Skye & Lochaber at 12,715 km², but it could still see its boundaries changed under the provisions of the Act.

Clause 11, Rule 5 of the Bill (below) explains other factors the Boundary Commissions may take into account when recommending constituency boundaries. These considerations are secondary to the principle of parity of electorate. The boundaries of the electoral regions specified in Schedule 1 to the European Parliamentary Elections Act 2002 are Government Office Regions:

- (1) A Boundary Commission may take into account, if and to such extent as they think fit—
 - (a) special geographical considerations, including in particular the size, shape and accessibility of a constituency;
 - (b) local government boundaries as they exist on the most recent ordinary council-election day before the review date;
 - (c) boundaries of existing constituencies;
 - (d) any local ties that would be broken by changes in constituencies;
 - (e) the inconveniences attendant on such changes.

- (2) The Boundary Commission for England may take into account, if and to such extent as they think fit, boundaries of the electoral regions specified in Schedule 1 to the European Parliamentary Elections Act 2002 (ignoring paragraph 2(2) of that Schedule and the references to Gibraltar) as it has effect on the most recent ordinary council-election day before the review date.

¹ The Act is available at <http://www.legislation.gov.uk/ukpga/2011/1/contents/enacted>

2 Distribution of parliamentary constituencies

2.1 Current distribution of seats

At 1 December 2010 the average constituency electorate in the UK was 70,530. Wales has the lowest number of electors per constituency, with an average electorate of 57,040. Among English regions the North East has the lowest average electorate at 67,974, compared to the England average of 72,127. The South East has the highest average electorate at 75,041. Table 1 below sets out the mean electorates for constituencies in each constituent part of the UK and electoral region.

Table 1: Parliamentary electorate by region, 1 December 2010

	Total electorate 1 December 2010	Number of constituencies	Mean electorate 1st December 2010	Difference from UK mean
UK	45,844,691	650	70,530	
UK (excluding Orkney & Shetland, Na h-Eileanan an Iar and Isle of Wight)	45,678,175	647	70,600	70
England	38,443,481	533	72,127	1,596
Scotland	3,928,979	59	66,593	-3,937
Wales	2,281,596	40	57,040	-13,490
Northern Ireland	1,190,635	18	66,146	-4,384
East Midlands	3,361,089	46	73,067	2,537
East of England	4,280,707	58	73,805	3,275
London	5,266,904	73	72,149	1,619
North East	1,971,249	29	67,974	-2,556
North West	5,253,019	75	70,040	-490
South East	6,303,428	84	75,041	4,511
South West	4,042,475	55	73,500	2,969
West Midlands	4,115,668	59	69,757	-773
Yorkshire and the Humber	3,848,942	54	71,277	746
Isle of Wight	110,924	1	110,924	40,394
Orkney and Shetland	33,755	1	33,755	-36,775
Na h-Eileanan an Iar	21,837	1	21,837	-48,693

2.2 Distribution of seats by parity of electorate

Table 2 below shows how seats will be distributed between constituent parts of the UK according to the method described in the Bill (the Sainte-Laguë method). The Boundary Commission for England has proposed to use boundaries of electoral regions as a template in their review, using the Sainte-Laguë method to determine the distribution of constituencies across the regions (the Commission is consulting on the proposal). Table 2 shows how seats will be distributed should the proposal be followed through.

Of the constituent parts of the UK, Wales would see the greatest percentage decrease in the number of constituencies, losing ten seats (a 25% reduction). England would see the smallest percentage decrease, losing thirty one seats (a 6% reduction).

Table 2: Proposed revised distribution of seats per region

	Current number of seats	Revised distribution of seats ^{i,ii}	Difference	Revised mean constituency electorate ^{i,iii} 1st December 2010
UK	650	600	50	76,641
England	533	502	31	76,665
Scotland	59	52	7	77,468
Wales	40	30	10	76,053
Northern Ireland	18	16	2	74,415
East Midlands	46	44	2	76,388
East of England	58	56	2	76,441
London	73	68	5	77,454
North East	29	26	3	75,817
North West	75	68	7	77,250
South East	84	83	1	76,451
South West	55	53	2	76,273
West Midlands	59	54	5	76,216
Yorkshire and the Humber	54	50	4	76,979

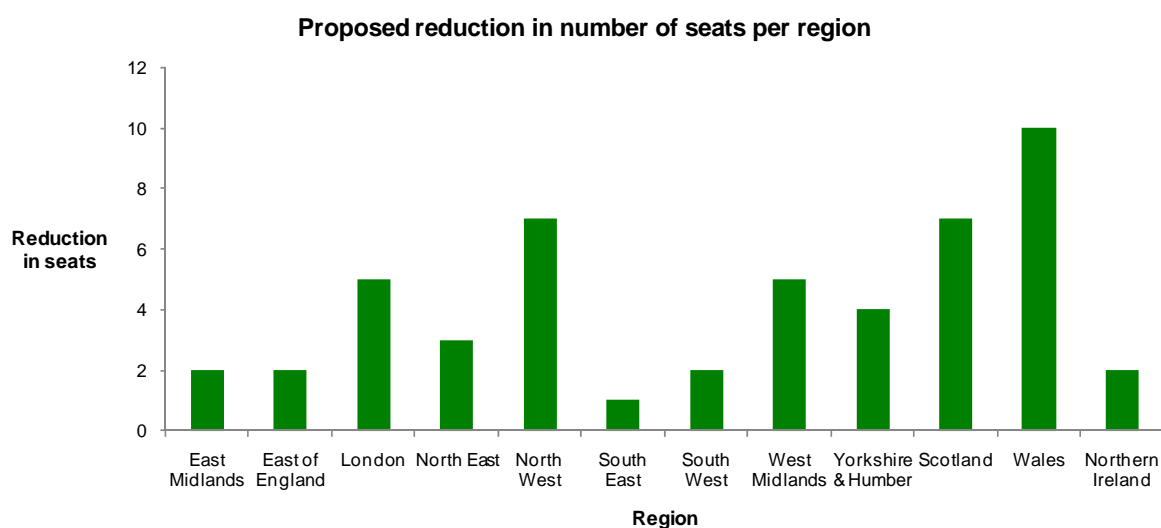

Notes:

(i) The revised distribution has been calculated by the Boundary Commission for England by allocating seats per electoral region based on the Sainte-Laguë method, the same method used to allocate seats across the constituent parts of the UK. The revised mean electorate is then obtained by dividing the areas' electorates by its proposed revised number of seats. The Boundary Commission are consulting as to whether it should use this method of seat allocation for English electoral regions (although under the provisions of the Act they are not obliged to prevent seats from crossing regional boundaries). Note that the Boundary Commission could fit one more seat into each region or one fewer seat into each region and still keep each seat within 5% of the electoral quota.

(ii) Figures for the revised number of seats for Scotland include Na h-Eileanan an Iar and Orkney and Shetland; figures for the revised number of seats in England and in the South East region include two constituencies on the Isle of Wight.

(iii) When calculating the revised mean electorate per region, Na h-Eileanan an Iar, Orkney and Shetland and the Isle of Wight constituencies are excluded.

2.3 Limits on Northern Ireland constituency electorates

The Act specifies lower and upper bounds for constituency electorates, of 95% and 105% of the UK electoral quota. Therefore constituencies will have to contain between 72,809 electors and 80,473 electors at 1 December 2010. If necessary, constituency electorates in Northern Ireland can lie within a more generous range (between 70,583 and 80,473 electors) because of difficulties that could arise from there being only a small number of seats. The limits for Northern Ireland constituencies are calculated as follows:

Step 1: Do different limits apply?

1. The total electorate of Northern Ireland is 1,190,635. Using the constituency allocation method described in the Act, there will be 16 seats in Northern Ireland with a mean electorate of 74,415.
2. The UK electoral quota, as defined in the Act, is 76,641. The number of seats in Northern Ireland multiplied by the electoral quota is 1,226,260, which is 35,625 electors greater than the total Northern Ireland electorate.
3. The Bill specifies that if this difference (35,625) is greater than one third of the UK quota, then different electorate limits apply to Northern Ireland constituencies. One third of the UK quota is 25,547 and therefore the different limits are introduced.

Step 2: Calculating the new limits

4. Lower Limit

The lower limit is the smaller of:

- 95% of the UK electoral quota = 72,809
- the Northern Ireland mean electorate minus 5% of the UK quota = 70,583

Since 70,583 is the lesser number, it is the new lower limit.

5. Upper Limit

The upper limit is the greater of:

- 105% of the UK electoral quota = 80,473
- the Northern Ireland mean electorate plus 5% of the UK quota = 78,247

Since 80,473 is the greater number, it becomes the new upper limit.

6. Therefore Northern Ireland constituencies will have to contain between 70,583 and 80,473 electors.

2.4 Partisan effects of boundary changes

A study by Lewis Baston for Democratic Audit, *The New Constituency Map of Britain?*, estimated the number of seats each party would notionally have won in a 600 seat House of Commons at the 2010 General Election. Its findings suggest a very wide range of possible outcomes depending on the constituency boundaries used – for example, it estimates the Conservatives could have won as many as 302 seats or as few as 276 seats, indicating the difficulty of conducting such analysis when precise constituency boundaries are unknown. Note the analysis did not treat the Isle of Wight as a special case, as is now provided for in the Act.

3 Tables

3.1 Variation of UK parliamentary constituency electorates about national and regional means, 1 December 2010

The table shows the difference between the electorate of a constituency and the averages for the UK and the relevant Government Office Region.

3.2 Variation of UK parliamentary constituency electorates about UK Electoral Quota, 1 December 2010

The table shows the variation in electorates from the UK Electoral Quota as defined in the Act, in terms of number of electors and as a percentage of the electoral quota. Note that even if a constituency is currently within 5% of the electoral quota, it could still be redrawn to ensure that other constituencies in the area can have electorates close to the quota.

3.3 UK parliamentary constituencies ranked by electorate size at 1 December 2010

Of the 42 constituencies with electorates greater than 80,000, 19 are in London or the South East. Of the 39 constituencies with electorates less than 60,000, two thirds of them (26 constituencies) are in Wales.

3.4 British parliamentary constituencies ranked by mid-2009 population

The table shows the population of each constituency in mid-2009, the latest date for which data are available. Under the provisions of the Act, population will not be taken into account when redrawing boundaries. However as Table 6 shows, an MP may have a relatively small electorate but a large population to represent. For example, Kensington has an electorate of 62,784 (571st largest) but a population of 124,280 (9th largest). Population estimates for the current Northern Ireland constituencies have not yet been published.

The UK Electoral Quota as referred to in the tables is the quota described in the Act for a 600 seat House of Commons, calculated at 76,641 electors.

Constituency	Party	Electorate 1 December 2010	Difference from			Difference from UK Electoral Quota		Population mid-2009 ⁱⁱⁱ
			UK mean ⁱⁱ	UK country mean	Regional mean	No of electors	Percentage	
Strangford	DUP	61,566	-8,964	-4,580	..	-15,075	-19.7%	
Upper Bann	DUP	76,209	5,679	10,063	..	-432	-0.6%	
West Tyrone	Sinn Fein	62,258	-8,272	-3,888	..	-14,383	-18.8%	

(i) A positive figure for the difference indicates that the constituency electorate is greater than the mean/quota; a negative figure indicates it is less than the mean/quota.

(ii) The UK mean electorate has been calculated including the electorates of Na h-Eileanan an Iar, Orkney and Shetland and the Isle of Wight.

(iii) Population data for Northern Ireland 2010 constituencies has not yet been published
